Cities in the county of Middlesex,	86
Town and county of Nantucket,	86
Towns in the county of Norfolk,	86
Towns in the county of Plymouth,	86
Cities and towns in the county of Suffolk,	86, 87
Recapitulation. By Counties,	87, 88
Recapitulation. For the State,	88
 ESTIMATED NUMBER OF PERSONS ENGAGED IN THE FISHERIES: BY TOWNS,	89-92
Towns in the county of Barnstable,	91
Cities and towns in the county of Bristol,	91
Towns in the county of Dukes,	91
Cities and towns in the county of Essex,	91
Cities in the county of Middlesex,	91
Town and county of Nantucket,	92
Towns in the county of Norfolk,	92
Towns in the county of Plymouth,	92
Cities and towns in the county of Suffolk,	92
Recapitulation,	92
 TABULAR ANALYSIS,	93-134
Introduction,	93, 94
 INVESTMENTS AND PRODUCTS,	94-116
Principal cities and towns making return,	94
Amounts and percentages of classified investments for the State,	95
Amounts and percentages of classified products for the State,	95
Value and percentages of details of investments,	96
Value and percentages of details of products,	96, 97
Investments and products: By towns (with percentages of products of investments),	98-102
Towns in the county of Barnstable,	98
Cities and towns in the county of Berkshire,	98
Cities and towns in the county of Bristol,	98, 99

INVESTMENTS AND PRODUCTS — Con.

Investments and products : By towns (with percentages of products of investments) — Con.	Page
Towns in the county of Dukes,	99
Cities and towns in the county of Essex,	99
Towns in the county of Franklin,	99
Cities and towns in the county of Hampden,	99
Towns in the county of Hampshire,	100
Cities in the county of Middlesex,	100
Town and county of Nantucket,	100
Towns in the county of Norfolk,	100
Towns in the county of Plymouth,	100
Cities and towns in the county of Suffolk,	100
Cities and towns in the county of Worcester,	100, 101
Recapitulation. For the State and Counties,	101, 102
Number of cities and towns representing specified percentages,	102
Comparative investments in 1885 and 1895 : By towns,	103-105
Towns in the county of Barnstable,	103
Cities and towns in the county of Bristol,	103
Towns in the county of Dukes,	103
Cities and towns in the county of Essex,	103, 104
Cities in the county of Hampden,	104
Towns in the county of Hampshire,	104
Cities in the county of Middlesex,	104
Town and county of Nantucket,	104
Towns in the county of Norfolk,	104
Towns in the county of Plymouth,	104
Cities and towns in the county of Suffolk,	104
Recapitulation. For the State and Counties,	105
Number of cities and towns showing gain or loss in investments in 1895 as compared with 1885,	105
Comparative value of products in 1885 and 1895 : By towns,	106-110
Towns in the county of Barnstable,	106
Cities and towns in the county of Berkshire,	106
Cities and towns in the county of Bristol,	106, 107
Towns in the county of Dukes,	107
Cities and towns in the county of Essex,	107
Towns in the county of Franklin,	107
Cities and towns in the county of Hampden,	107, 108
Towns in the county of Hampshire,	108
Cities in the county of Middlesex,	108
Town and county of Nantucket,	108
Towns in the county of Norfolk,	108
Towns in the county of Plymouth,	108
Cities and towns in the county of Suffolk,	108
Cities and towns in the county of Worcester,	108, 109
Recapitulation. For the State and Counties, with number of cities and towns making return in 1885 and 1895,	109, 110
Number of cities and towns showing gain or loss in value of products in 1895 as compared with 1885,	110
Investments and products : Comparisons by name — 1885 and 1895,	111-114
Working capital,	111
Apparatus,	111
Salt and ice,	111
Food fish,	111, 112
Fish products,	112, 113
Food fish products,	113
Shell fish,	113
Whale and seal products,	113
Other products,	113
Aggregates,	113
Explanation of tabular presentation,	114
Inland and shore fisheries for the year 1895,	115
Comparison by name of the inland and shore fisheries for the years 1885 and 1895,	115, 116
Preceding table presented for purposes of record only,	116

	Page
FOOD FISH: BY NAME,	116-123
Consideration of the principal kinds of food fish, giving brief description and statistical details of each,	116-121
Bluefish,	116
Clams,	116
Cod,	116, 117
Cusk,	117
Haddock,	117
Hake,	117
Halibut,	117
Herring,	118
Lobsters,	118
Mackerel,	118-120
Oysters,	120, 121
Pollock,	121
Scallops,	121
Other edible food fish,	121
Quantities of fish received at the port of Boston—1895,	121-123
Comparisons of quantities and prices,	122, 123
 VESSELS (REGISTERED) AND BOATS: BY TOWNS,	 123-126
Extent of presentation,	123
Increase or decrease between 1895 and 1885 for the State as regards number of registered vessels,	124
Increase or decrease between 1895 and 1885 for the State as regards tonnage of registered vessels,	124
Increase or decrease between 1895 and 1885 for the State as regards number of boats,	124, 125
Number and kinds of vessels carrying boats and number of boats so carried,	125
Comparative number of boats carried on vessels, and number engaged in the shore fisheries,	125
Increase or decrease between 1895 and 1885 for the State as regards value of registered vessels and boats,	125, 126
 TIME ENGAGED IN THE FISHERIES, FOR REGISTERED VESSELS: BY MONTHS,	 126-128
Explanation of presentation,	126
Number of vessels and tonnage engaged specified months in the fishing industry, with percentages,	126
Number of registered vessels for each city and town engaged both in the fisheries and in other business, with average number of months engaged in each,	127, 128
Employment of vessels when not engaged in the fisheries,	128
 PARTNERS AND STOCKHOLDERS IN FIRMS AND CORPORATIONS,	 128, 129
Comparison of firms, corporations, and number of returns for 1885 and 1895,	129
 ESTIMATED NUMBER OF PERSONS ENGAGED IN THE FISHERIES: BY TOWNS,	 129, 130
Increase or decrease between 1895 and 1885 for the State and Counties,	129, 130
Three different ways of ascertaining the number of fishermen,	130
Population schedule of the Census,	130
Aggregate returns from owners of vessels and purchasers at wholesale of fish,	130
The fisheries schedule,	130
 DISABLEMENTS AND DEATHS,	 130, 131
Number of disablements and deaths by accident during 1895,	131
 THE AMERICAN WHALE FISHERY,	 131
Products of the whale fishery for 1889 and 1890,	131
Comparative summary,	131
 FOREIGN FISHERY TRADE OF THE UNITED STATES: 1821-1894,	 132, 133

	Page
COMMERCE,	135-202
COASTWISE AND OCEAN COMMERCE. UNDER AMERICAN FLAG,	137-176
Investments and earnings,	139-145
Towns in the county of Barnstable,	139
Cities and towns in the county of Bristol,	140
Towns in the county of Dukes,	140
Cities and towns in the county of Essex,	141
Cities in the county of Middlesex,	142
Town and county of Nantucket,	142
Towns in the county of Plymouth,	142
Cities in the county of Suffolk,	142
Recapitulation: Investments,	143
Recapitulation: Earnings,	143-145
Number and value of vessels, with aggregate and average receipts,	146, 147
Recapitulation,	146, 147
Number of vessels and tonnage: By kinds of commerce and vessels,	148-150
Recapitulation: By Counties, etc.,	149, 150
Recapitulation: For the State,	150
Date of establishment of firms and corporations,	151, 152
Towns in the county of Barnstable,	151
Cities and towns in the county of Bristol,	151
Towns in the county of Dukes,	151
Cities and towns in the county of Essex,	151
Cities in the county of Middlesex,	151
Town and county of Nantucket,	151
Towns in the county of Plymouth,	152
Cities in the county of Suffolk,	152
Recapitulation. By Counties,	152
Recapitulation. For the State,	152
Firms and corporations. Partners and stockholders,	153-155
Towns in the county of Barnstable,	153
Cities and towns in the county of Bristol,	153
Towns in the county of Dukes,	153
Cities and towns in the county of Essex,	153, 154
Cities in the county of Middlesex,	154
Town and county of Nantucket,	154
Towns in the county of Plymouth,	154
Cities in the county of Suffolk,	154
Recapitulation. By Counties,	154, 155
Recapitulation. For the State,	155
Ownership of vessels,	156-158
Towns in the county of Barnstable,	156
Cities in the county of Bristol,	156
Towns in the county of Dukes,	156
Cities and towns in the county of Essex,	156
Town and county of Nantucket,	156
Town and county of Plymouth,	156
Cities in the county of Suffolk,	157
Cities in Other States,	157
Not given,	157
Recapitulation. By Counties, etc.,	157, 158
Recapitulation. For the State,	158
Officers and crew required to man,	159-161
Towns in the county of Barnstable,	159
Cities in the county of Bristol,	159
Towns in the county of Dukes,	159
Cities and towns in the county of Essex,	159
Town and county of Nantucket,	159
Town and county of Plymouth,	159
Cities in the county of Suffolk,	159, 160
Cities in Other States,	160
Not given,	160

COASTWISE AND OCEAN COMMERCE. UNDER AMERICAN FLAG—CON.

Officers and crew required to man—CON.

	Page
Recapitulation. By Counties, etc.,	160, 161
Recapitulation. For the State,	161
Principal ports visited,	162-167
Cargo carried to principal ports,	168-175

PILOTAGE AND TOWAGE. UNDER AMERICAN FLAG, 177-184

Number of vessels and tonnage: By kinds of commerce and vessels,	179, 180
Recapitulation. By Counties, etc.,	179
Recapitulation. For the State,	180
Ownership of vessels,	181, 182
Recapitulation. By Counties, etc.,	181
Recapitulation. For the State,	182
Officers and crew required to man,	183, 184
Recapitulation. By Counties, etc.,	183
Recapitulation. For the State,	184

OCEAN COMMERCE. UNDER FOREIGN FLAGS, 185-191

Investments and earnings,	187
Cities in the county of Suffolk,	187
Number and value of vessels, with aggregate and average receipts,	187
Number of vessels and tonnage: By kinds of commerce and vessels,	188
Recapitulation,	188
Officers and crew required to man,	189
Recapitulation,	189
Ports visited,	190
Cargo carried to ports visited,	191

TABULAR ANALYSIS, 192-202

COASTWISE AND OCEAN COMMERCE. UNDER AMERICAN FLAG, 192-197

Explanation of titles,	192

THE
DECENNIAL CENSUS OF THE COMMONWEALTH.
1895.

VOLUME VI.

INTRODUCTION.

This volume contains the following sections :

Part 1. The Fisheries and Commerce.

Investments and Products.

Food Fish : By Name.

Vessels (Registered) and Boats : By Towns.

Time Engaged in the Fisheries, for Registered Vessels : By Months.

Partners and Stockholders in Firms and Corporations.

Estimated Number of Persons Engaged in the Fisheries : By Towns.

Coastwise and Ocean Commerce. Under American Flag.

Pilotage and Towage. Under American Flag.

Ocean Commerce. Under Foreign Flags.

Part 2. Agriculture.

Agricultural Products and Property : By Towns.

Part 3. Agriculture.

Agricultural Products : By Name.

Animal Products.

Dairy Products.

Poultry Products.

Other Products.*

Part 4. Agriculture.

Agricultural Products : By Name.

Cereals.

Fruits, Berries, and Nuts.

Vegetables.

Products from Mines, Quarries, Pits, etc.

* Including certain specified products classified under this title.

Part 5. Agriculture.

Agricultural Property: By Name.

Land.

Buildings.

Domestic Animals, etc.

Fruit Trees and Vines.

Mines, Quarries, Pits, etc.

Farm Statistics.

Farm Land Classified by Acreage: By Towns.

Comparisons of Farm Acreage: 1885 and 1895.

Total Wages paid in Agriculture.

Commercial Fertilizers.

Destruction by Forest Fires.

Classification of Farm Land; With Comparative Values of Products and Property, Acreage, etc.: By Towns.

Farms, Market Gardens, etc. Number Owned, Hired, Worked on Shares, etc.: By Towns.

Farms, Market Gardens, etc. Number Owned, Hired, etc.; With Comparative Acreage, and Values of Products and Property: By Towns.

These several Parts have been given to the public in pamphlet form, and fully reviewed by the press as serially completed. Although the specific separation into Parts is not preserved in the completed volume, the different sections follow each other in order named.

It will be noticed that the volume relates to two important subjects each of which is closely connected with the prosperity of the Commonwealth. The development of the Fisheries especially is, from the earliest years, interwoven with the history of the State, and the agriculture of Massachusetts although largely confined to products consumed within our own territorial limits, and obviously controlled by the peculiar local conditions under which its operations are conducted, nevertheless remains to-day as in the past a progressive and important element in our industrial and social life.

Of course, the term "Agriculture" cannot be restricted to the cultivation of the staple crops that occupy the chief place in the great farming states of the West. In the production of wheat, corn, or other standard cereals Massachusetts indeed occupies a subordinate place. The enlargement of the cities and towns in our populous centres is constantly transforming agricultural land into residential estates, but if the loss in this way be disregarded, the number of acres under cultivation here has not materially declined within recent years, the aggregate product for the year considered, measured in value, is larger than that disclosed in any previous Census, and at the present time there are probably more persons than ever before obtaining a living within the State from the cultivation of the ground, the operations of the dairy, the production of poultry and eggs, or engaged in other branches which are properly included under the statistics of the farm.

During the last thirty years the industrial development of the State has completely changed the social characteristics of Massachusetts, and although the competitive influence of the great farms of the West prevents the remunerative production of breadstuffs here on a large scale, the growth of the factory towns and the concentration of population in the prosperous cities of the Commonwealth have brought to the farmer's door a constantly enlarging market for vegetables, milk, butter, eggs, and fruit, thus compensating, in part, for the decline in other products. The agriculture of Massachusetts has not declined. It has simply changed its form to meet the different conditions of the time. There is still opportunity for its successful prosecution here, and within it energy, enterprise, and skill may still find adequate reward.

The statistics contained in this volume were collected after the general work of the Census, relating to the enumeration of the people, was completed, by agents especially selected with reference to the technicalities of the work. The greatest possible care has been exercised at every stage, in order that the results might be both accurate and complete. The tabular presentations throughout are accompanied by full analyses in text, and as these interpret and explain the figures, they should receive the careful attention of the reader.

HORACE G. WADLIN,
Chief.

BUREAU OF STATISTICS OF LABOR,
STATE HOUSE, BOSTON,
November, 1899.

THE FISHERIES.

THE FISHERIES.

The statistics of the fisheries of the Commonwealth of Massachusetts, based upon the returns of the Decennial Census of 1895, are shown hereinafter in six presentations which may be briefly summarized as follows:

INVESTMENTS AND PRODUCTS.—Under “Investments” are shown in detail, the working capital invested in those cities and towns of the State in which the industry is carried on; the quantity and value of apparatus employed, and the quantity and value of salt and ice used. Under “Products” are shown, for the same cities and towns, the quantity and value of food fish, fish products, food fish products, shell fish, whale and seal products, and other products. The recapitulation by name for the State gives, in addition, the average value per pound, gallon, etc., the number of persons making return, and the average value (or “stock”) to each person in the industry making return.

FOOD FISH: BY NAME.—This presentation shows for each of the thirteen principal food fish, the quantity and value of the specified catch in each city and town in the State in which the industry was carried on.

VESSELS (REGISTERED) AND BOATS: BY TOWNS.—The number and kinds of “registered” vessels (which comprise those of five tons or over) with the tonnage (net) and value, and the number and kinds of boats with their respective values, are shown for each city and town engaged in the industry.

TIME ENGAGED IN THE FISHERIES, FOR REGISTERED VESSELS: BY MONTHS.—In this presentation is shown, by cities and towns, and also by kinds of vessels and tonnage, the number of months each fishing vessel was actively engaged in the industry.

PARTNERS AND STOCKHOLDERS IN FIRMS AND CORPORATIONS.—The number and size of firms with the total number of partners, and the number and size of corporations with the total number of stockholders are given for each city and town; also the number of returns, and the total number of persons interested in the fisheries.

ESTIMATED NUMBER OF PERSONS ENGAGED IN THE FISHERIES: BY TOWNS.—This presentation shows the aggregate number of officers and crew required to man the registered vessels reported from the cities and towns engaged in the fisheries, the number of fishermen not on registered vessels, usually called “shore” fishermen, and the total number of fishermen represented on schedules including those on registered vessels.

ESTIMATED NUMBER OF PERSONS ENGAGED IN THE FISHERIES: BY TOWNS,	89-92

The division of the Census relating to the fisheries has received careful attention and supervision from inception to finish. Guided by the experience gained in the State Censuses of 1875 and 1885, the Bureau has endeavored to cover such points as had, apparently, received inadequate treatment in the past, while, at the same time, preserving the highest standard of completeness and accuracy in all other parts of the work.

The plan adopted was to divide the State into districts and place each in the charge of a competent special agent. These agents were instructed, first, to make complete lists from the records at the United States Custom Houses of all registered vessels engaged in the fisheries. Second, their instructions required them to patrol the coast line and ascertain the names of all persons engaged in what is known as the "shore" fisheries. Third, they were directed to obtain by inquiries, or by engaging the services of persons who could supply the necessary information, the names and addresses of all persons who, though relying upon some other occupation for their principal means of support, yet engaged in fishing during some portion of the Census year which ended, as fixed by law, on December 31, 1895. From the owners of the registered vessels, and from all individual fishermen, certified returns were obtained upon The Fisheries schedule, and the tabular presentations to which this analysis applies are based upon these certified returns.

In spite of all these precautions and our wish to approach as near as possible to absolute accuracy, we have no hesitation in saying that the value of products actually taken by fishermen during the Census year was undoubtedly somewhat larger than the figures we report. This is due to two facts: first, that it is impossible, without an extravagant outlay of money, to patrol inward from the coast line far enough to reach all those persons who may come to the shore to fish; second, many of the fishermen counted by us as being on registered vessels at some time or other during the year, engage in shore fishing while vessels are laid up. Thus the same man becomes both a "shore" and a "vessel" fisherman. Many fishermen who are not resident in Massachusetts engage in shore or vessel fishing and return to their native countries, so that no trace of them can be obtained. It would be manifestly impossible to follow them up and secure returns, as it would also be to endeavor to learn from vessel fishermen, absent on trips, how much fish they caught while fishing from the shore between

trips, or when the vessels were laid up. Two other classes of fishermen may have been omitted: those who had left town before the special agent's arrival, leaving no trace behind, and also those who died before the special agent's visit.

Thus, it will be seen, such omissions as may have been made are unavoidable. We have generally found the estimates of persons engaged in the industry to be in excess of the results obtained in the Census. We in no way impugn the honesty of those who make these estimates, nor should they doubt the conscientious efforts which have been made to secure complete returns in the Census. The absolute, but unattainable, truth lies somewhere between the facts as recorded and the estimates. We do not consider the omissions as materially important, however, either as affecting the statistics, or the deductions that may be drawn from them relative to the industry. Hundreds and possibly thousands of men engage in the fisheries when the financial inducement is sufficient, and other hundreds or thousands forsake the industry for more profitable employment. Many step from the fishing schooner to the foreign bound ship, the ocean liner, or the man-of-war. Fishing vessels are employed in carrying freight, passengers, or excursion parties when this is found more remunerative than fishing. Again, the presence or absence of certain varieties of fish has a marked influence on "the catch," and in considering the totals for any Census year, and particularly in comparing returns for two or more Census years, the variation in the kinds of vessels forming the fishing fleet, in the number of persons engaged in the industry, and the abundance or scarcity of fish in their accustomed haunts must be taken into consideration.

Investments and Products.

To measure the manufacturing industries of the State, we ascertain the capital invested and the value of goods made and work done; the status of agriculture is indicated by the values of agricultural products and property; and the condition of the fisheries is shown by analogous figures representing investments and value of products. Of course other statistics are obtained relating to Manufactures, Agriculture, and The Fisheries, but none so plainly show the practical results of an industry as the figures indicating the amount of money invested and the result of such investment.

On pages 7-43 the investments and products in detail, and under classified heads, are shown for each city and town in the State engaged in the fisheries. A recapitulation of city and town aggregates is given on pages 44-49; a recapitulation for the State and counties appears on pages 48 and 49, and a recapitulation for the State, by the name of each class of investment and each kind of product, will be found on pages 50-53.

The total capital invested in the fisheries in Massachusetts in the year 1895 was \$5,338,828, while the total value of the product of the fisheries during the same year was \$5,703,143. There were 145 cities and towns engaged in the industry, but 82.68 per cent of the investments and 78.37 per cent of the value of product were returned by four cities and towns. These facts are fully shown in the following table:

CITIES AND TOWNS.	Counties	INVESTMENTS		PRODUCTS	
		Amounts	Percent-ages	Amounts	Percent-ages
Provincetown,	Barnstable . .	\$329,520	6.17	\$434,487	7.62
NEW BEDFORD,	Bristol	546,598	10.24	313,197	5.49
GLOUCESTER,	Essex	3,248,122	60.84	3,212,985	56.34
BOSTON,	Suffolk	289,722	5.43	508,801	8.92
Other cities and towns (141),	-	924,866	17.32	1,233,673	21.63
TOTALS,	-	\$5,338,828	100.00	\$5,703,143	100.00

The county of Essex had 64.24 per cent of the total investment and 63.52 per cent of the total value of products. It should be noted that no investments were reported from the counties of Berkshire, Franklin, Hampden, Hampshire, and Worcester. These, as is well-known, are not maritime counties, but are wholly inland, and the industry as carried on in these counties is usually designated as "the inland fisheries." The food fish taken by the inland fishermen are caught in brooks, ponds, and rivers, and no more investment is usually required than for the purchase of hooks and lines, although in many cases small row boats are used. As stated in the first part of this analysis, undoubtedly many fishermen have been omitted for the various reasons there given, and it is probable that more of such omissions occurred in the case of the inland fisheries than in any other division of the industry. But this is manifestly unavoidable. The "inland fisherman" in nearly every instance has another business or occupation. In no way could all of them be located and returns secured excepting by a house to house canvass as is done in the taking of the population. Another method, although it would not be complete, would be to have lists of the members of all fish clubs or associations reported to the Fish and Game Commissioners, and to have such lists made available to the Bureau in Census years.

In the subjoined table we show, for the State, the amounts and percentages, respectively, for the various elements included under the general designation of "Investments."

CLASSIFICATION OF INVESTMENTS.	Amounts	Percentages
Working capital,	\$4,488,564	84.07
Apparatus,	599,267	11.23
Salt and ice,	250,997	4.70
TOTALS,	\$5,338,828	100.00

A similar presentation for "Products" follows :

CLASSIFICATION OF PRODUCTS.	Amounts	Percentages
Food fish,	\$4,647,914	81.50
Fish products,	122,327	2.14
Food fish products,	9,923	0.17
Shell fish,	546,351	9.58
Whale and seal products,	351,613	6.17
Other products,	25,015	0.44
TOTALS,	\$5,703,143	100.00

The edible products, including food fish, food fish products, shell fish, and carrageen (included under "Other Products") represented a value of \$5,228,507, or 91.68 per cent of the value of all products.

We have considered the general or condensed classifications only under the two subjects under analysis—viz., investments and products. An examination of details will show that they are often important and worthy of more extended consideration. We bring together in the table which follows the principal details under investments, showing value in each case, and also the percentage of the classification under which they appear, and the percentage of total investments.

DETAILS OF INVESTMENTS.	Classification	Value	PERCENTAGES OF —	
			Classifi- cation Total	Total Investments
Land, buildings, fixtures, and machinery, .	Working capital	\$478,519	10.66	8.96
Cash and credit capital,	Working capital	918,617	20.46	17.21
Vessels, and outfit, and boats,	Working capital	2,725,743	60.73	51.06
Oyster beds,	Working capital	142,183	3.17	2.66
Wharves,	Working capital	223,502	4.98	4.19
Pounds and pockets,	Apparatus . .	2,980	0.50	0.06
Gear, swordfishing and whaling	Apparatus . .	112,685	18.80	2.11
Pots and traps,	Apparatus . .	96,544	16.11	1.81
Weirs,	Apparatus . .	101,112	16.87	1.89
Lines, poles, nets, and seines,	Apparatus . .	127,301	21.24	2.38
Trawls and trawl gear,	Apparatus . .	89,142	14.88	1.67
Forks, spears, tongs, rakes, hoes, dredges, etc.,	Apparatus . .	11,998	2.00	0.22
Wheelbarrows, cars, etc., for moving fish, .	Apparatus . .	4,262	0.71	0.08
Apparatus for drying and pickling products,	Apparatus . .	45,166	7.54	0.85
Barrels, kegs, etc., for packing products, .	Apparatus . .	895	0.15	0.02
Other apparatus,	Apparatus . .	7,182	1.20	0.13
Salt,	Salt and ice . .	143,155	57.03	2.68
Ice,	Salt and ice . .	107,842	42.97	2.02

Upon examination we find that cash and credit capital forms 20.46 per cent of working capital, and 17.21 per cent of total investments. Vessels and outfit and boats represent 60.73 per cent of working capital, and 51.06 per cent of total investments. Lines, poles, nets, and seines form 21.24 per cent of the value of apparatus, but only 2.38 per cent of total investments. The combined value of salt and ice is 4.70 per cent of total investments. The other lines may be read in a similar manner, and supply a complete financial analysis of the investments required to carry on the fishing industry.

The following table for "Products" is prepared on the same plan as the one for "Investments" shown above:

DETAILS OF PRODUCTS.	Classification	Value	PERCENTAGES OF —	
			Classifi- cation Total	Total Products
Alewives,	Food fish	\$40,435	0.87	0.71
Bass,	Food fish	11,640	0.25	0.20
Bluefish,	Food fish	54,735	1.18	0.96
Butterfish,	Food fish	4,345	0.09	0.08
Cod,	Food fish	1,778,119	38.26	31.18
Cusk,	Food fish	53,517	1.15	0.94
Eels,	Food fish	35,088	0.76	0.62
Flounders,	Food fish	17,902	0.39	0.31
Haddock,	Food fish	648,640	13.96	11.37
Hake,	Food fish	83,399	1.79	1.46
Halibut,	Food fish	542,007	11.66	9.50
Herring,	Food fish	136,048	2.93	2.39
Mackerel,	Food fish	670,775	14.43	11.76
Perch,	Food fish	7,983	0.17	0.14
Pickrel,	Food fish	4,852	0.10	0.09
Pollock,	Food fish	58,724	1.26	1.03

Whalebone,	Whale and seal products	127,600	36.29	2.24
Whale oil,	Whale and seal products	212,283	60.37	3.72
Other whale and seal products,	Whale and seal products	11,730	3.34	0.21
Irish moss (carrageen),	Other products	24,319	97.22	0.43
Other products,	Other products	696	2.78	0.01

We find that the value of cod caught is 38.26 per cent of the total value of food fish, and 31.18 per cent of the total value of all fishery products. The value of the mackerel catch was 14.43 per cent of the value of food fish, and 11.76 per cent of the total value of all fishery products. The comparative percentages for haddock are 13.96 and 11.37, showing that in the year 1895 the value of haddock caught approximated very closely to the value of the mackerel catch. The value of bait was but 0.90 per cent of the total value of all products of the fisheries. Clams represent 3.60, lobsters 2.49, and oysters 2.10 per cent of the total value of all fishery products. Whale oil, once a leading product of the fisheries, now represents but 3.72 per cent of the total value of all products of the fisheries. A careful survey of the table will enable the reader to ascertain similar ratios for all the products of the fishing industry in the Commonwealth for the Census year 1895.

We next present a table which shows for each city and town in the State in which the fishing industry was carried on in the Census year 1895, the total investment, the total product, and the percentage of value of product of amount invested. To insure the proper reading of this table we present a brief illustration of the correct method of using the figures. In the town of Barnstable we see that the total investment was \$29,238 and the total product was \$27,212; this means that for each dollar in money invested there was a product return of 93 $\frac{1}{3}$ cents, or 93.07 per cent. In the town of Chatham, the investment was \$79,911, and the product was worth \$82,867, which means a product return of \$1.03 + for each dollar invested, or 103.70 per cent. The reader must remember, however, that this product return is not "profit" in the sense in which that word is generally used. Out of this product return must come an allowance for the labor of catching the fish. On the vessels, the crew usually receive one-third, or 33.33 per cent. The shore fisherman, on the other hand, gets the whole amount for which his catch is sold.

The town of Provincetown, and the cities of New Bedford, Gloucester, and Boston, as shown on page 94, *ante*, had 78.37 per cent of the total product of the fisheries. The percentages of products of investments in these four places were as follows: Provincetown, 131.85; New Bedford, 57.30; Gloucester, 98.92; and Boston, 175.62. These places had 82.68 per cent of the total money investment. If we deduct the fisherman's usual "lay" of one-third of the product, the resulting percentages of product value of money investment are as follows: Provincetown, 87.90; New Bedford, 38.20; Gloucester, 65.95; and Boston, 117.08.

The State and county percentages are shown in the recapitulation which follows:

THE STATE, AND COUNTIES.	Investments	Products	Percentages of Products of Investments

THE STATE, AND COUNTIES.	Investments	Products	Percentages of Products of Investments
Nantucket,	\$40,662	\$77,653	190.97
Norfolk,	6,086	17,001	279.35
Plymouth,	125,473	163,499	130.31
Suffolk,	300,090	526,575	175.47
Worcester,	-	3,942	-

Considering percentages only, and omitting comparative value of product in the counties, the county of Middlesex shows the largest product return, relative to the amount of capital reported, namely, 347.16 per cent. Norfolk County comes next with 279.35 per cent, but in the case of both counties the investments and products are very small when compared with counties like Barnstable, Bristol, Essex, and Suffolk. The State percentage is 106.82. If the usual "lay" of one-third is deducted it would indicate an average gross income upon the amount of capital reported in the fishing industry of 71.22 per cent. This in no way indicates net profits, for the loss of vessels, their depreciation in value, and the loss and wear and tear of boats and apparatus are large items and materially affect the net profits. Our purpose in attempting to indicate to some degree the income of the fisheries has not been with the intention of disclosing private business, or to intimate that the profits are excessive. But we wish to call attention to the evident fact that the fishing industry is profitable, and that all proper means should be employed both by the State and nation to foster it by wise legislation. It is the fashion to speak of the decadence of our fisheries, but, as we have previously stated, in all comparisons of Census figures very much depends upon whether the Census year was a "good" or "poor" fish year. Again, a reduction in prices has a marked influence on the figures compared. In fact, the most indicative and manifestly fair way to compare the fisheries for two or more Census years is to compare *quantities* and this is done on pages 122 and 123, *post*.

In the next table the cities and towns reporting inland fisheries are omitted. Considering the State line showing percentages of products of investments, we find but one town reported less than 25 per cent; one town reported 25 but less than 50 per cent; nine towns 50 but less than 75 per cent; eight towns 75 but less than 100 per cent; while 48 towns, or 71.64 per cent of the 67 considered, reported 100 or more per cent.

THE STATE, AND COUNTIES.	NUMBER OF CITIES AND TOWNS REPRESENTING SPECIFIED PERCENTAGES:					Total Number of Cities and Towns Considered
	Under 25 per cent	25 per cent but under 50 per cent	50 per cent but under 75 per cent	75 per cent but under 100 per cent	100 per cent and over

We continue our consideration of investments and products, presenting next a table which shows the amount invested in the fisheries in the years 1885 and 1895 for each city and town engaged in the industry in the years specified. We present also the increase or decrease in amount in 1895 as compared with 1885, with corresponding percentages.

Comparative Investments in 1885 and 1895: By Towns.

We shall confine our analysis of this table to the recapitulation for the State and counties, which follows :

THE STATE, AND COUNTIES.	INVESTMENTS		INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
THE STATE.	\$8,660,581	\$5,338,828	—\$3,321,753	—38.35
Barnstable,	2,009,437	730,436	—1,279,001	—63.65
Bristol,	1,521,970	631,011	—890,959	—58.54
Dukes,	174,721	74,525	—100,196	—57.35
Essex,	4,239,493	3,429,436	—810,057	—19.11
Hampden,	85	—	—85	—
Hampshire,	10	—	—10	—
Middlesex,	430	1,109	+679	+157.91
Nantucket,	45 900	40,662	—5,238	—11.41
Norfolk,	69,801	6,086	—63,715	—91.28
Plymouth,	189,340	125,473	—63,867	—33.73
Suffolk,	409,394	300,090	—109,304	—26.70

The total amount reported as being invested in the fisheries in 1885 was \$8,660,581. The returns for the year 1895 show a total of \$5,338,828. The decrease is \$3,321,753, or 38.35 per cent. Examining the counties, we find that in one only, Middlesex, was there an increase, but the amounts involved in both years were small and have no influence upon the industry. The largest percentage of decrease is shown in the county of Norfolk; then follow, in order named, the counties of Barnstable, Bristol, Dukes, Plymouth, Suffolk, Essex, and Nantucket. The counties of Hampden and Hampshire which reported investments in 1885 have none in 1895. The counties of Berkshire, Franklin, and Worcester had no investments in 1885; in 1895 they reported the value of products only for inland fisheries, the amount invested being simply in hooks and lines, for which the value was not asked.

The following table gives the number of cities and towns showing an increase or decrease in investments in 1895 as compared with 1885, by counties and for the State :

THE STATE, AND COUNTIES.	Number of Cities and Towns Showing Gain	Number of Cities and Towns Showing Loss	Total Number of Cities and Towns Considered
THE STATE.	30	39	69
Barnstable,	3	12	15
Bristol,	6	6	12
Dukes,	6	1	7
Essex,	7	8	15
Middlesex,	1	—	1
Nantucket,	—	1	1
Norfolk,	—	2	2
Plymouth,	6	7	13
Suffolk,	1	2	3

There are 69 cities and towns considered in this table of which 30 show a gain, and 39 a loss in the amounts invested in the fisheries. The cities and towns making returns of inland fisheries are not given in this table for reasons previously stated.

We next pass to the consideration of the comparative value of the products of the fisheries in the years 1885 and 1895.

Comparative Value of Products in 1885 and 1895: By Towns.

COUNTIES, CITIES, AND TOWNS.	PRODUCTS		INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885

Middlesex,	1	1	1,260	3,850	+2,590	+20.56
Nantucket,	1	1	35,389	77,653	+42,264	+119.43

THE STATE, AND COUNTIES.	NUMBER OF CITIES AND TOWNS MAKING RETURN		PRODUCTS		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	1885	1895	Amounts	Percentages
Norfolk,	2	1	\$29,997	\$17,001	—\$12,996	—43.32
Plymouth,	11	13	169,343	163,499	—5,844	—3.45
Suffolk,	2	3	466,074	526,575	+60,501	+12.98
Worcester,	—	30	—	3,942	+3,942	—

The total value of the product of the fisheries in 1885 was \$6,462,692. In 1895, the value was \$5,703,143, showing a decrease of \$759,549, or 11.75 per cent. The counties of Dukes, Essex, Hampden, Hampshire, Middlesex, Nantucket, and Suffolk, show an increase in the values of products in 1895 as compared with 1885. The increases in the counties of Hampden and Hampshire appear very large when percentages are considered, but they are derived from small amounts which have no appreciable effect upon the industry as a whole. The counties of Barnstable, Bristol, Norfolk, and Plymouth show decreases in the value of products in the year 1895 as compared with 1885. The counties of Berkshire, Franklin, and Worcester, which reported the product of inland fisheries in 1895, did not make returns in 1885.

The table which follows gives, for the State and counties, the number of cities and towns showing gains or losses respectively, in the value of products, in 1895 as compared with 1885:

THE STATE, AND COUNTIES.	Number of Cities and Towns Showing Gain	Number of Cities and Towns Showing Loss	Total
THE STATE.	29	40	69
Barnstable,	4	11	15
Bristol,	2	10	12
Dukes,	6	1	7
Essex,	6	9	15
Middlesex,	1	—	1
Nantucket,	1	—	1
Norfolk,	—	2	2
Plymouth,	7	6	13
Suffolk,	2	1	3

The number of cities and towns showing a gain in the value of products in 1895 as compared with 1885 is 29, while 40 show a loss. The cities and towns making returns of value of inland fisheries are not included in this table.

In the preceding tables varying numbers of cities and towns have been considered, in the analyses of which explanations of omissions have been made. In order to more fully explain these variations, we would state that in comparing the statistics of the fisheries for the years 1885 and 1895, there are 147 cities and towns considered: of these 66 made returns for both 1885 and 1895, two made returns in 1885 but not in 1895, and 79 made returns in 1895 but not in 1885.

Thus far our consideration of investments and products has been limited to presentations for, and comparisons between, cities and towns for the Census year 1895, and the preceding Census year, 1885.

The table next presented considers investments and products by name for the two Census periods previously referred to. It shows the increase or decrease, both by amounts and percentages, for each kind of investment and each article of product in 1895 as compared with 1885.

The totals for each of the general headings under investments and products are obviously the same as in the presentation for towns, and do not call for further consideration here.

* Classified under "Shell Fish" in 1885.

The decrease in working capital in 1895 as compared with 1885 is \$3,163,525, or 41.34 per cent. Land, machinery, and oyster beds show increases, but all the other items under working capital show material decrease, ranging from 12.23 per cent in the case of buildings and fixtures, to 51.05 in the case of wharves. The falling off of the vessels engaged in the fisheries amounts to \$2,267,273, or 45.41 per cent.

The decrease in the value of apparatus in 1895 as compared with 1885 is \$125,885, or 17.36 per cent. There are 22 details included under the general heading "apparatus": 10 of these details show an increase, and seven a decrease in 1895 as compared with 1885; in the case of five details comparisons are not possible as their value was returned in only one Census period (1895).

It will be noted that salt, both domestic and imported, shows a decrease, while ice shows an increase in value in 1895 as compared with 1885.

The first classification under products relates to food fish, the catch of which in 1895 as compared with 1885 shows an increase in value of \$81,235, or 1.78 per cent. The number of different food fish considered is 39, of which 22 show an increase in value, and nine a decrease in value in 1895 as compared with 1885. In the case of eight species of food fish, comparisons were not possible, three of them being returned in the 1885 Census only, and five in that for 1895 only. In the comparisons for food fish, and in those relating to other fishery products, as well as in the previous considerations of details of investments, the *percentages* of increase and decrease should not be used as indicative of gain or loss except when taken in conjunction with the *amounts* upon which the percentages are based. For instance, the value placed opposite a detail of investment or kind of product may be \$100 in 1885 and \$1,000 in 1895. This shows an increase of \$900 or *nine hundred per cent.* This percentage is very large comparatively, but, as will be seen, it is based upon small values.

Considering the principal kinds of food fish showing marked increases in the value of the 1895 catch as compared with the 1885, we find haddock with a gain of 76.70 per cent; herring, 46.24 per cent; halibut, 14.17 per cent; and cod, 5.75 per cent. The most marked decreases are bluefish, 60.77 per cent; mackerel, 57.39 per cent; and alewives, 10.31 per cent.

Fish products show a decrease in value of \$105,455 in 1895 as compared with 1885, or 46.30 per cent. There are 14 details included under this classification, of which three show an increase and four a decrease; in the case of seven, comparisons were not possible as in five details the value was returned in 1895 only, and two in 1885 only. The most marked increase is in the case of bait, 23.60 per cent. The value of the menhaden catch shows a large falling off, 87.13 per cent.

Food fish products show an increase of \$7,566, or 321 per cent. Of the five details, one shows an increase, two a decrease, while in the case of two, comparisons are not possible as one was returned in 1895 only, and the other in 1885 only. An examination of the details will disclose the relative percentages of increase or decrease.

Shell fish products show an increase in value of \$187,094, or 52.08 per cent. Of the six details, four show an increase. Comparisons cannot be made as regards the other two, for they were returned in 1885 only. The percentages of increase are as follows: scollops, 517.27; clams, 68.17; oysters, 33.90; and lobsters, 5.14. The percentage of increase in the value of scollops is very large but an examination will show that it is sustained by a corresponding increase in value amounting to \$66,655.

Whale and seal products show a decrease in 1895 as compared with 1885 of \$918,930, or 72.33 per cent. Of the nine details, three show a decrease in 1895, while in the case of six, comparisons cannot be made, three making no returns in 1885, and a corresponding number in 1895. The decreases, in percentages, are as follows: ambergris, 86.09; whale oil, 72.65; and whalebone, 72.45.

Other products include three details, all of which show a decrease, amounting in the aggregate to \$11,959, or 59.66 per cent. Carrageen, known also as sea moss or Irish moss, declined in value from \$34,293 in 1885 to \$24,319 in 1895, a decrease of 29.08 per cent.

A recapitulation of aggregates with which the comparisons of investments and products by name closes (see page 113) has been previously analyzed in detail.

From the report of the Commissioners of Inland Fisheries and Game for the year 1895, we extract the following table:

Inland and Shore Fisheries for the Year 1895.

KINDS OF FISH.	Pounds and Weirs	Gill Nets and Sea Seines	Merrimac River Seines	Taunton River Seines	Other Fresh Water Seines	Totals
Alewives,	1,000,958	111,806	49	1,201,697	491,084	2,805,594
Bluefish,	26,024	23,549	-	-	-	49,573
Flounders and flatfish,	356,933	106,570	-	-	-	463,503
Mackerel,	786,987	353,769	-	-	-	1,140,756
Menhaden,	1,052,983	207,987	70,400	-	-	1,331,370
Scup,	1,464,697	690	-	600	-	1,465,987
Sea herring,	22,182,517	957,582	1,223,600	-	-	24,363,699
Shad,	14,823	18,109	94	3,804	-	36,830
Spanish mackerel,	58	3	-	-	-	61
Squeteague,	145,331	2,123	-	-	-	147,454
Squid,	3,006,544	68,882	-	-	-	3,075,426
Striped bass,	2,465	209	3	2	-	2,679
Tautog,	435,267	823	-	-	-	436,090
Other edible or bait fish,	4,209,153	584,402	8,963,240	-	-	13,756,795
Number of persons making return,	102	144	6	8	5	265

We bring into comparison with the report for 1895 similar returns for 1885 made to the same board of commissioners. The table shows the increases or decreases, by amounts and percentages, for each kind of fish considered in 1895 as compared with 1885 on the basis of number, as the returns to the commissioners do not state either weight or value.

KINDS OF FISH.	1885	1895	INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
			Number	Percentages
Alewives,	3,747,750	2,805,594	-942,156	-25.14
Bluefish,	133,946	49,573	-84,373	-62.99
Flounders and flatfish,	348,030	463,503	+115,473	+33.18
Mackerel,	2,826,346	1,140,756	-1,685,590	-59.64
Menhaden,	15,801	1,331,370	+1,315,569	+8,325.86
Scup,	1,267,484	1,465,987	+198,503	+15.66
Sea herring,	6,646,770	24,363,699	+17,716,929	+266.55
Shad,	25,347	36,830	+11,483	+45.30
Spanish mackerel,	25	61	+36	+144.00
Squeteague,	19,402	147,454	+128,052	+659.99
Squid,	-	3,075,426	+3,075,426	-
Striped bass,	1,881	2,679	+798	+42.42
Tautog,	47,464	436,090	+388,626	+818.78
Other edible or bait fish,	142,860	13,756,795	+13,613,935	+9,529.56

There are 14 kinds of food fish considered, of which 10 show an increase, and three a decrease as regards number caught in 1895 as compared with 1885. No comparisons are possible as regards one species as the catch was returned for 1895 only. The two

preceding tables are presented for purposes of record only, as it is impossible to institute reliable comparisons for the returns made under the Census law and those made to the Commissioners of Inland Fisheries and Game; as catch reckoned simply by number cannot be compared, it is evident, with the catch reckoned by weight and value. It is well-known that many of the fish caught in weirs and pounds are so small that they are turned back into the sea again. At other times, the catch is so large that there is no demand for them as an article of food, and they are sold at merely nominal rates as fertilizers.

Food Fish: By Name.

This presentation covers pages 55 to 64. It considers 13 of the principal kinds of food fish obtained by those engaged in the Massachusetts fisheries during the Census year 1895. The table shows each city and town making return, together with the quantity and value of the catch for each place specified.

We shall consider each kind of fish separately, preceding the statistical details with a brief description, partly scientific and partly popular, drawn from information issued in print by the United States Census Office and the United States Commission of Fish and Fisheries.

Bluefish.

[*Pomatomus saltatrix*. — A very gamey food fish found on the Atlantic and Gulf coasts. Bluefish vary in weight from 1 to 20 pounds, according to season and locality. Large numbers are caught during the summer months with nets, traps, seines, and hand lines.]

The number of cities and towns reporting the catch of bluefish was 33, with a total value of \$54,735. The town of Nantucket reported the largest catch, having a value of \$27,309.

Clams.

[A mollusk largely used for food and bait; found on all our coasts. There are various species most of which are edible. The fishing or digging these bivalves forms an important industry in both the Atlantic and Pacific states. Dredges, rakes, tongs, hoes, forks, and baskets are used in gathering them. Large quantities are salted or pickled and sold for bait.]

There are 37 cities and towns which report the quantity of clams dug. The total value was \$205,447. The largest values reported are as follows: Boston, \$73,050; Newburyport, \$34,290; Ipswich, \$27,900; and Edgartown, \$12,345.

Cod (FRESH AND SALTED).

[*Gadus callarias*. — One of the most important food fishes of the United States. It is caught on both the eastern and western coasts, but most extensively along the coasts of the Middle States, New England, and British America. It varies in weight from 3 to 75 pounds. It is caught with hand lines, trawls, nets, etc., and is sold fresh, pickled, salted, and dried. Food preparations, such as boneless and desiccated fish, are also made from cod. The sounds are used in the manufacture of glue.]

The value of the codfish catch was reported from 40 cities and towns, amounting in the aggregate to \$1,778,119. Gloucester holds the post of pre-eminence in this trade, the value of its catch reaching \$1,314,852, or 73.95 per cent of the entire catch.

The following table shows the New England catch of cured cod and other ground fish landed at New England ports for the year 1895. We are indebted for this table to the Report of the Boston Fish Bureau for the year 1895.

STATES.	Vessels on Grand and West- ern Banks (Number)	Vessels on New Eng- land Shore and Georges Banks (Number)	Total Sail (Number)	Total Crew (Number)	Catch on Grand and West- ern Banks (Quintals)	Catch on New Eng- land Shore and Georges Banks (Quintals)	Total Catch (Quintals)
Massachusetts, . . .	101	252	346	6,002	188,369	237,610	425,979
Maine,	11	24	55	696	22,100	36,900	59,000
TOTALS,	112	276	401	6,698	210,469	274,510	484,979

From a Review of the Foreign Fishery Trade of the United States by Charles H. Stevenson, published in Washington in 1896, we extract the following table relating to the codfish trade of the United States for the years 1885 to 1894:

YEAR ENDING JUNE 30—	IMPORTS FOR CONSUMPTION		DOMESTIC EXPORTS		BALANCE OF TRADE *		AVERAGE VALUE PER 100 POUNDS	
	Pounds	Value	Pounds	Value	Pounds	Value	Imports	Exports
1885, . .	32,326,686	\$943,116	18,178,987	\$724,858	+14,147,699	+\$218,258	\$2.92	\$3.99
1886, . .	10,998,072	286,505	15,664,195	602,934	—4,666,123	—316,429	2.61	3.85
1887, . .	8,997,750	264,260	16,943,748	587,082	—7,945,998	—322,822	2.94	3.46
1888, . .	10,446,892	316,259	17,820,883	819,559	—7,373,991	—503,300	3.03	4.70
1889, . .	9,752,941	317,687	15,625,928	754,619	—5,872,987	—436,932	3.26	4.83
1890, . .	8,303,585	247,327	17,030,019	793,186	—8,726,434	—545,859	2.98	4.66
1891, . .	6,845,576	254,074	17,313,170	890,277	—10,467,594	—636,203	3.71	5.14
1892, . .	5,804,548	229,255	14,435,878	765,199	—8,631,330	—535,944	4.95	5.30

TOTALS, .	106,377,963	\$3,352,739	162,600,083	\$7,370,841	—56,222,120	—\$4,018,102	—	—

* In balance of trade, + indicates excess of imports over exports, and — indicates excess of exports over imports.

Cusk (FRESH AND SALTED).

[*Brosmius brosme*.—A deep water food fish found in the Atlantic ocean north of Cape Cod. They are taken in small quantities, and are generally sold salted. Leather, oil, and glue are valuable products.]

But four cities and towns report the catch of cusk, the aggregate value being \$53,517, of which \$40,742 is credited to the city of Gloucester.

Haddock.

[*Melanogrammus aeglefinus*.—A food fish found in the Atlantic north of the Delaware capes. It averages in weight from 4 to 6 pounds. It is extensively caught for a fresh food fish, and is also salted, pickled, and dried. When slack-salted and smoked, it is sold under the name of "Haddie." The sounds are used in the manufacture of glue. Trawls and hand lines are used in catching them.]

A total catch of \$648,640 worth of haddock is reported from 13 cities and towns. Gloucester leads, with a catch valued at \$341,922; Boston is second, with a value of \$180,100; and Provincetown third, with a value of \$81,401.

Hake (FRESH AND SALTED).

[*Phycis*.—A food fish found off the Atlantic coast from Newfoundland to Cape Hatteras. They average from 1½ to 2 feet in length and 3 to 4 pounds in weight, and are caught at night near muddy bottoms with trawls and hand lines and in weirs and traps. They are eaten fresh, and are salted and dried, and pickled in barrels. The sound, or air-bladder, is of great commercial importance in the manufacture of isinglass.]

There were nine cities and towns making returns of the catch of this fish, the aggregate value being \$83,399, of which Gloucester reported a value of \$60,110, and Boston, \$20,575.

Halibut.

[*Hippoglossus vulgaris*.—The largest and most valuable of the flatfishes; found in the North Atlantic and Pacific oceans. It is one of the largest species used for food, sometimes weighing over 300 pounds. The average weight is from 50 to 75 pounds. It is caught with trawls and hand lines. There are three grades of halibut. The "White," which has its under side immaculate, is considered best, and brings the highest price; the "Gray" is blotched on the under side and sells for a third less; the "Sour" is tainted, and brings only about one-fourth as much as the "White." Small young fish, weighing from 10 to 20 pounds, are called "Chickens," and are much sought after by epicures. Halibut are sold fresh, and are also cured and smoked; the napes are pickled. An oil used for currying purposes is made from the head, and the residue is used as a fertilizer under the name of "chum."]

There were eight cities and towns reporting the value of the catch of halibut, which aggregated \$542,007. Gloucester leads in this branch of the fisheries, with a product value of \$460,882, or 85.03 per cent of the total catch.

Herring.

[*Clupea harengus*. — A very important food fish found in the North Atlantic as far south as Sandy Hook; it is never found in brackish or fresh waters. They weigh from ½ to 1 pound; average length 10 inches. They are caught in pounds, traps, weirs, and gill nets, and by torching. As a food fish they are used fresh, salted, pickled, smoked, and canned; used also extensively for bait in the cod, haddock, halibut, catfish, and hake fisheries.]

The herring catch was reported from 36 cities and towns, the value aggregating \$136,048. Of this, Gloucester is credited with a value of \$59,690, and Provincetown with a value of \$19,020.

Lobsters.

[*Homarus americanus*. — A crustacean of great economic importance, found on the Atlantic coast from Delaware to Labrador. It averages about 11 inches in length and about 2 pounds in weight, but the size varies with localities and seasons. It is caught in pots and traps especially constructed for this fishery. The refuse of the canneries is much valued as a fertilizer.]

The catch of lobsters was returned by 41 cities and towns. Of a total catch valued at \$141,760, Cohasset is credited with a value of \$13,520; Marblehead, \$12,971; Chatham, \$11,176; and Plymouth, \$10,254.

We make the following extract from the Report of the Chief of Massachusetts District Police for the year 1895:

By authority of Chapter 389 of the Acts of 1888, an additional district police officer was appointed for service under the direction of the Commissioners on Inland Fisheries and Game. The total number of cases investigated was 61; total number of arrests, 17; amount of fines imposed, \$705; number of short lobsters seized, 21,204; number of egg-bearing lobsters seized, 300; number of lobster eggs planted, 9,000,000; blanks furnished to fishermen and returned by them, 1,000.

Mackerel.

[*Scomber scombrus*. — A very important food fish found in the North Atlantic south to Cape Hatteras. They range from 9 to 18 inches in length and ½ to 3 pounds in weight, and are caught in purse seines, pounds, weirs, gill nets, etc., and with hook and line. They are sold fresh, salted, pickled, and canned, and are sometimes used for bait. When pickled they are sold in barrels (200 pounds), half-barrels, kits (20 pounds), etc.]

The mackerel catch was returned from 42 cities and towns. The aggregate value was \$670,775. As has been previously stated, the catch in the year 1895 was much below the average, and to this fact may be wholly attributed the decrease in the value of the products of the fisheries in 1895 as compared with 1885. The value of the catch in 1885 was \$1,574,183. This shows a decrease in 1895 of \$903,408. Taking the fisheries as a whole, as has been previously shown, the decrease in the value of products in 1895 as compared with 1885 was \$759,549. It will be seen that the decrease in the mackerel catch accounts for this deficit, and also obliged the other branches of the fishing industry to compensate for a still greater deficit in the mackerel catch, amounting to \$143,859.

From the Reports of the Boston Fish Bureau and the American Fish Bureau of Gloucester, we have compiled the following table showing the total number of barrels of pickled mackerel inspected from the years 1809 to 1894, both inclusive. Values are given from the years 1830 to 1894.

YEARS.	BARRELS OF MACKEREL INSPECTED		YEARS.	BARRELS OF MACKEREL INSPECTED

We present next a table taken from the Report of the Boston Fish Bureau for 1895, which shows for that year, by countries, the catch in barrels of fresh and salted mackerel.

COUNTRIES	SALT MACKEREL	FRESH MACKEREL
	Barrels	Barrels
United States,	24,939	12,000
Nova Scotia, Cape Breton, and Prince Edward Island, . . .	17,000	7,000
Magdalen Islands,	4,500	-
Ireland,	35,000	156,189
Norway,	4,500	10,000
England,	3,000	185,806
Scotland,	4,000	866
TOTALS,	92,939	371,861

From the same report we reproduce a table which shows for the years 1894 and 1895, by months, the receipts of imports of salted mackerel in barrels at Boston, New York, and Philadelphia.

MONTHS.	BOSTON		NEW YORK		PHILADELPHIA		TOTALS	
	1894	1895	1894	1895	1894	1895	1894	1895

Oysters.

[The most important bivalve found on the coast. There are two classes, "Natives" and "Plants." The former are found on the entire coast; the latter in localities where the cultivation of the oyster is particularly profitable. Oysters are obtained by dredging, raking, and tonging, and are very extensively used in the canning industry. The shells are used in manufacturing lime and cement and for building highways. Native oysters will open about one gallon to the bushel; plants do somewhat better.]

The products of the oyster industry amounted to \$109,670, being reported from 10 cities and towns. Wareham leads, with a product value of \$35,495, and Wellfleet ranks second, with a product value of \$25,527.

The following table, drawn from Mr. Stevenson's Review, shows the number of barrels of oysters exported from the United States to Europe from 1879 to 1894, inclusive :

YEAR ENDING JUNE 30 —	Barrels	YEAR ENDING JUNE 30 —	Barrels
1879,	50,063	1887,	100,906
1880,	67,116	1888,	99,123
1881,	70,768	1889,	103,109
1882,	65,012	1890,	122,163
1883,	64,437	1891,	98,802
1884,	71,021	1892,	109,657
1885,	98,802	1893,	68,966
1886,	98,997	1894,	75,428

Pollock.

[*Pollachius virens*. — A food fish of importance, found mainly off the New England coast. It sometimes occurs as far south as Virginia. The average weight of the fish is about 10 pounds. They are caught with seines, nets, and hand lines. For food they are sold fresh, salted, and dried. The sounds are used in the manufacture of glue, the livers are sold in large quantities for the manufacture of oil, and the tongues are cut out and sold fresh.]

The catch of pollock was returned by 16 cities and towns. The product value for the State was \$58,724, of which Gloucester reported a product of \$34,797, or 59.26 per cent of the entire catch.

Scollops.

[*Pecten irradians*. — An edible bivalve found off the coasts of Long Island, Rhode Island, and southern Massachusetts in paying quantities; less numerous South. It is obtained by dredging and raking. The powerful central muscle by which the animal opens and closes its shell forms the edible portion. The shells are of commercial value. The rims or refuse are used for fertilizers.]

There were 18 cities and towns which reported the product value of scollops taken. The aggregate was \$79,541. The product values were nearly the same in the towns of Nantucket and Chatham, being \$15,401 and \$15,373, respectively.

Other Edible Food Fish.

Other edible food fish to the value of \$631,883 was reported, but the value of each kind was not sufficiently large to warrant its presentation by name.

From the Report of the Boston Fish Bureau for 1895 we reproduce a table showing the quantities of fish received at the port of Boston during the year 1895, classified as home and foreign.

Quantities of Fish Received at the Port of Boston — 1895.

Pollock, cwts.,	8,038	-	8,038
Swordfish, lbs.,	836,900	-	836,900

The comparisons of the catch of fish for the years 1885 and 1895 have been based upon the value of the product. It has been deemed advisable, however, to make a further comparison, as regards food fish, by quantity and price. We have therefore brought into a table the 13 kinds of food fish included in the presentation — Food Fish:

Comparisons of Quantities and Prices.

CLASSIFICATION OF FOOD FISH.		BASIS	QUANTITY OF SPECIFIED CATCH	
			1885	1895
1	Bluefish,	pounds	2,785,342	992,515
2	Clams,	bushels	253,862	372,883
3	Cod,	pounds	77,729,196	81,002,958
4	Cusk,	pounds	631,297	3,829,183
5	Halibut,	pounds	20,902,676	45,134,609
6	Hake,	pounds	3,231,121	7,938,082
7	Halibut,	pounds	11,331,922	8,724,564
8	Herring,	number	10,335,117	27,151,709
9	Lobsters,	pounds	3,376,724	2,119,587
10	Mackerel,	barrels	391,514½	56,544
11	Oysters,	bushels	86,961	71,222
12	Pollock,	pounds	4,636,758	6,582,188
13	Scallops,	gallons	18,271	86,544

Of the 13 kinds of food fish considered, eight show an increase in quantity. They follow in order named: haddock, 24,231,990 pounds; herring, 16,216,553 in number; hake, 4,706,661 pounds; cod, 3,363,762 pounds; cusk, 3,238,276 pounds; pollock, 1,945,430 pounds; clams, 119,021 bushels; and scallops, 68,273 gallons. The decreases in quantity are as follows: halibut, 2,667,358 pounds; bluefish, 1,793,927 pounds; lobsters, 1,257,137 pounds; mackerel, 334,970½ barrels; and oysters, 15,742 bushels.

Mackerel show an increase in value of \$7.84 per barrel in 1895 as compared with 1885; oysters, 61 cents per bushel; scallops, 21 cents per gallon; clams, seven cents per bushel; lobsters, 2½ cents per pound; halibut, two cents per pound; bluefish, ½ of a cent per pound; and hake, ⅓ of a cent per pound.

Quantities of Fish Received at the Port of Boston — 1895 — Concluded.

VARIETIES.	1895		
	Home Total	Foreign Total	Grand Total
FRESH AND FROZEN FISH — COIL.			
Other fresh fish, bbls.,	15,367	243	15,610

Live lobsters, crates,	10,617	28,144	38,761
Clams, bbls.,	9,090	204	9,294
Oysters, bbls.,	19,719	6	19,725
Other shell fish, bbls.,	4,682	1	4,683

By Name." The table shows the quantities and values in 1885 and 1895 for each kind of fish specified, together with the increase or decrease by quantities and values in 1895 as compared with 1885; the average price per basis in 1885 and 1895, and the increase or decrease in average price per basis.

Comparisons of Quantities and Prices.

TOTAL VALUE		AVERAGE PRICE PER BASIS		INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885			
1885	1895	1885	1895	Quantity	Value	Average Price	
\$6139,523	\$54,735	\$0.050	\$0.055	—1,793,027	—\$84,788	+\$0.005	1
122,169	205,447	0.481	0.551	+119,021	+83,278	+0.070	2
1,681,386	1,778,119	0.022	0.022	+3,363,762	+96,733	=	3
21,736	53,517	0.034	0.014	+3,238,276	+31,781	—0.020	4
367,093	648,640	0.018	0.014	+24,231,990	+281,547	—0.004	5
28,728	83,399	0.009	0.011	+4,706,661	+54,671	+0.002	6
474,751	542,007	0.042	0.062	—2,667,358	+67,256	+0.020	7
93,033	136,048	0.009	0.005	+16,216,553	+43,015	—0.004	8
134,834	141,760	0.040	0.067	—1,257,137	+6,926	+0.027	9
1,574,183	670,775	4.021	11.863	—331,970	—903,408	+7.842	10
89,322	109,670	1.027	1.540	—15,742	+20,348	+0.513	11
40,859	58,724	0.009	0.009	+1,945,430	+17,865	=	12
12,886	79,541	0.705	0.919	+68,273	+66,655	+0.214	13

The decreases in average price in 1895 as compared with 1885 are as follows: eusk, two cents per pound; herring, $\frac{1}{10}$ of a cent apiece; and haddock, $\frac{1}{10}$ of a cent per pound. The price of cod and of pollock per pound was the same in 1895 as in 1885.

Vessels (Registered) and Boats: By Towns.

This presentation covers pages 65 to 72. It shows, for each city and town engaged in the fisheries, the kinds of vessels, the number of each kind owned in the city or town specified, and the aggregate tonnage and value for each kind of vessel. The table also shows, with the exception of tonnage, a similar line of facts for boats of all kinds used in the fisheries, either on vessels or engaged in the shore fisheries.

For purposes of analysis we will consider the recapitulation for the State on page 72. The number of registered vessels engaged in the fisheries in the Census year 1895 was 726; of these, 539, or 74.24 per cent, were schooners, so that type of vessel must be regarded as particularly suited to the needs of the industry. The total tonnage of the 726 registered vessels was 46,397.24 and the total value reached \$2,460,923. The total tonnage of the 539 schooners was 37,883.95 and the total value \$2,079,729, being 81.65 per cent of the total tonnage of all vessels, and 84.51 per cent of the total value of all vessels.

The total number of boats used in the fisheries was 6,312, with an aggregate value of \$264,820. Of these, 4,374 were dories (a flat-bottomed boat usually accommodating two men, with or without a sail), or 69.30 per cent of the whole number of boats. There were 727 sail boats returned, 167 seine boats, 592 skiffs, and 174 whale boats.

The average value of barks engaged in the fisheries was \$7,746; of brigs, \$7,250; of schooners, \$3,858; and of steamers, \$11,203. The average value of dories was \$15; of sail boats, \$173; of seine boats, \$183; of skiffs, \$11; and of whale boats, \$98.

The following table supplies a comparison as regards the number of registered vessels in 1895 as compared with 1885, with increases and decreases both by number and percentages:

CLASSIFICATION.	NUMBER		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
REGISTERED VESSELS.	866	726	-140	-16.17
Schooners,	736	539	-197	-26.77
Other vessels,	130	187	+57	+43.85

The table shows a decrease in the number of registered vessels amounting to 140, or 16.17 per cent. The number of schooners in 1895 as compared with 1885 has decreased 197, or 26.77 per cent, while "Other Vessels" show an increase of 57, or 43.85 per cent.

A similar table is shown as regards tonnage.

CLASSIFICATION.	TONNAGE		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
REGISTERED VESSELS.	68,211.49	46,397.24	-21,814.25	-31.98
Schooners,	47,767.28	37,883.95	-9,883.33	-20.69
Other vessels,	20,444.21	8,513.29	-11,930.92	-58.36

A comparison by number of vessels might not be conclusive, but the preceding comparison as regards tonnage shows distinctly a marked decrease in the capacity of the fishing fleet. The decline in 1895 as compared with 1885 for all classes of vessels is 21,814.25 tons, or 31.98 per cent; in schooners, 9,883.33 tons, or 20.69 per cent; in "Other Vessels," 11,930.92 tons, or 58.36 per cent.

We present next a comparative showing of the number of boats engaged in the fisheries in 1885 and in 1895.

CLASSIFICATION.	NUMBER		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
BOATS.	5,806	6,312	+506	+8.72
Dories,	4,531	4,374	-157	-3.47
Sail boats,	293	727	+434	+148.12

CLASSIFICATION.	NUMBER		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
BOATS — CON.				
Seine boats,	539	167	—372	—69.02
Skiffs,	17	592	+575	+3,382.35
Whale boats,	10	174	+164	+1,640.00
Other boats,	416	278	—138	—33.17

The increase in the number of boats is 506, or 8.72 per cent. This in itself is not very indicative. An examination of the kinds of boats shows that there have been marked increases in the number of skiffs, sail boats, and whale boats. There is a slight decrease in dories, and a marked falling off in the number of seine boats. These variations may be due in a great degree to a difference in classification, and too much dependence should not be placed upon the returns for any one class of boats.

The next table shows the number of vessels classified by kinds carrying boats, and the number of boats so carried.

THE STATE, AND KINDS OF VESSELS.	Number of Specified Vessels Having Boats Attached	Number of Boats
THE STATE.		
<i>Registered Vessels.</i>	665	3,438
Barks,	17	88
Brigs,	2	6
Catboats,	58	111
Schooners,	510	3,044
Sloops,	69	154
Steamers,	9	35

A comparative number of boats carried on vessels, and the number engaged in the shore fisheries are shown in the table which follows :

THE STATE.	Number of Boats Attached to Regis- tered Vessels	Number of Boats Engaged in Shore Fishing	Total Number of Boats	Percentage of Boats on Regis- tered Vessels of Total Number	Percentage of Boats Engaged in Shore Fishing of Total Number
The State,	3,438	2,874	6,312	54.47	45.53

Of 6,312, the total number of boats returned in 1895, there were 3,438, or 54.47 per cent, carried on registered vessels; and 2,874, or 45.53 per cent, engaged in the shore fisheries.

We now present the comparative values of registered vessels and boats for the years 1885 and 1895.

CLASSIFICATION.	VALUES		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
Registered vessels, ✓	\$4,708,305	\$2,460,923	—\$2,247,382	—47.73
Boats,	284,711	264,820	—19,891	—6.99

The decrease in the value of registered vessels has been \$2,247,382, or 47.73 per cent. The decrease in the value of boats has been \$19,891, or 6.99 per cent; if we consider the combined value of vessels and boats as representing the value of the fishing fleet, we find a net decrease of \$2,267,273, or 45.41 per cent.

Time Engaged in the Fisheries, for Registered Vessels: By Months.

This presentation is on pages 73 to 79 inclusive. It shows for each city and town engaged in the fishing industry in 1895, the number of registered vessels classified by kinds engaged in the fisheries one month, two months, three months, up to 12 months, or the entire year, and the aggregate tonnage, by kinds of vessels so engaged for the number of months specified. The table shows also the total number of vessels and total amount of tonnage.

In order to show the proper reading of the table we will consider the presentation for the city of Gloucester, on pages 76 and 77. The total number of vessels was 377, with a total tonnage of 27,817.65.

Of these 377 vessels, there were 249, with a total tonnage of 20,354.65, which were engaged the entire 12 months in the fisheries. There were 13 vessels with an aggregate tonnage of 1,150.28 engaged 11 months; there were 19 vessels with an aggregate tonnage of 1,298.84 that were employed 10 months; there were 31 vessels employed for nine months only; 31 for eight months, 10 for seven months, 10 for six months, seven for five months, two for four months, two for three months, one for two months, and two for one month.

We shall conclude our analysis of this feature with the State recapitulation on pages 78 and 79. If the statement were made that there were 703 vessels, with a combined tonnage of 43,952.40, engaged in the fishing industry in the State in the year 1895, the casual reader would infer that the number of vessels mentioned were employed for the entire year, but the following table drawn from the recapitulation referred to presents the matter in a far different light:

MONTHS.	Number of Vessels	Tonnage	PERCENTAGES OF —	
			Vessels	Tonnage
One month,	7	210.81	0.99	0.48
Two months,	12	151.82	1.71	0.34
Three months,	15	303.51	2.13	0.69
Four months,	17	473.22	2.42	1.08
Five months,	22	785.34	3.13	1.79
Six months,	41	1,789.22	5.83	4.07
Seven months,	44	1,555.42	6.26	3.54
Eight months,	66	2,852.97	9.39	6.49
Nine months,	75	2,865.32	10.67	6.52
Ten months,	36	2,179.07	5.12	4.96
Eleven months,	22	3,773.86	3.13	8.58
Twelve months,	346	27,011.84	49.22	61.46
TOTALS,	703	43,952.40	100.00	100.00

We find that 49.22 per cent of the vessels and 61.46 per cent of the total tonnage were employed 12 months; 3.13 per cent of the vessels and 8.58 per cent of the tonnage were employed 11 months; 5.12 per cent of the vessels and 4.96 per cent of the tonnage were employed 10 months; while 42.53 per cent of the vessels and 25 per cent of the tonnage were employed for nine months or less.

Bringing the entire fishing fleet of registered vessels to an average for the year, it represents an employment of 9.62 months, and 80.19 per cent of the total number of

vessels, and 88.15 per cent of the aggregate tonnage engaged. This is the true criterion by which to judge the products of the fishing fleet. Comparative figures do not exist for 1885 except as regards number of vessels, but it will be possible as regards time and commission to make a complete comparison when the next State Census is taken.

We next present a table which shows for each city and town reporting registered vessels, the number of such vessels engaged both in the fisheries and in other business, that is, either laid up or pursuing some other branch of industry. The table also shows the average number of months each vessel was engaged in the fisheries, and the average number of months engaged in other branches of industry.

COUNTIES, CITIES, TOWNS, AND THE STATE.	Number of Vessels	Average Number of Months each Vessel was Engaged in The Fisheries	Average Number of Months each Vessel was Engaged in Other Business than The Fisheries

Nantucket,	19	6.53	5.47
Plymouth,	3	5.67	6.33
Suffolk,	20	6.55	5.45

From the recapitulation for the State we learn that there were 380 vessels not engaged in the fishing industry the entire year; of these, 23 vessels, although nominally belonging to the fishing fleet, were "laid up" the entire year. The 357 vessels engaged both in the fisheries and in other business devoted, on the average, 6.88 months to fishing, and 5.12 months to other business.

The nature of this "Other Business," which includes the 23 vessels laid up for the entire year, and 284 vessels laid up for a portion of the year, is summarized in the following table which shows the number of vessels and the total number of months engaged in the specified branches of employment or unemployment:

THE STATE, AND EMPLOYMENT OF VESSELS WHEN NOT ENGAGED IN THE FISHERIES.	Total Number of Vessels	Total Number of Months
THE STATE.		
	380	1,947
Building and repairs,	3	23
Laid up,	307	1,485
Lost,	2	15
Towage,	5	34
Towage and laid up,	1	3
Transportation,	48	301
Transportation and laid up,	9	73
Not given,	5	13

The total fishing capacity of the fleet expressed in months would be indicated by 726 vessels multiplied by 12, or a product of 8,712 months. There were 23 vessels laid up for the entire year which represent 276 months. The time for 357 other vessels engaged in other business amounts to 1,671 months. These two items added together make 1,947 months, which indicates the period of non-employment in the fisheries of 726 vessels. In other words, these 726 vessels were actually engaged in the fishing industry 6,765 months, or 77.65 per cent of the Census year.

Partners and Stockholders in Firms and Corporations.

This presentation extends from page 81 to page 88. It shows for each city and town engaged in the fishing industry the number of firms, classified as regards the number of partners, and the total number of partners together with a similar classification of

the number of corporations, and total number of stockholders. There are also shown total number of returns, which means the combined number of firms and corporations, and the total number of persons interested in the fisheries, which means the combined number of partners and stockholders.

A recapitulation by counties is given on pages 87 and 88, and a recapitulation for the State on the last-named page. The size of firms and corporations ranges from one to 125 persons. The number of firms making returns was 2,175, with 3,256 partners. There were five corporations, with 97 stockholders. The combined number of firms and corporations was 2,180, the partners and stockholders numbering 3,353. Among the partners constituting firms, there were six estates included.

The following table shows comparisons, as far as possible, regarding firms and corporations for the years 1885 and 1895 :

THE STATE.	TOTAL NUMBER OF RETURNS		TOTAL NUMBER OF FIRMS		TOTAL NUMBER OF PARTNERS IN FIRMS		TOTAL NUMBER OF CORPORATIONS	
	1885	1895	1885	1895	1885	1895	1885	1895
The State,	*877	2,180	809	2,175	947	3,256	27	5

* Includes 41 city, town, or village returns besides firms and corporations.

The total number of firms in 1885 was 809 ; in 1895, 2,175, an increase in 1895 of 1,366, or 168.85 per cent. The decrease in the number of corporations in 1895 was 22. The total number of returns in 1885, including 41 city, town, or village returns, was 877 ; in 1895, 2,180, an increase of 1,303, or 148.57 per cent. The increase in the number of firms is no doubt due to the fact that the 41 city, town, or village returns in 1885 were returned by firms in 1895. A portion of the increase is also due to the increased efforts made in 1895 to secure a more complete enumeration.

Estimated Number of Persons Engaged in the Fisheries : By Towns.

This presentation covers pages 89 to 92 inclusive. We have used the term "Estimated" in presenting the number of persons engaged in the fisheries for the year 1895.

The presentation shows for each city and town the number of officers and crew required to man the registered vessels as returned by the owners of the vessels ; the number of fishermen not on registered vessels ; and the total number of fishermen represented on schedules including those on registered vessels.

A reference to the recapitulation on page 92 shows the following totals : officers. 850 ; crew, 7,679 ; combined officers and crew on registered vessels, 8,529. The number of fishermen not on registered vessels was 2,564. Of the total number of fishermen, 76.89 per cent were on registered vessels, and 23.11 per cent were engaged in the shore fisheries.

We present a comparative table for the years 1885 and 1895. The statistics for 1885 included non-resident fishermen, shore laborers, factory hands (in-door work), and curers and packers (not in factories) ; but these have been dropped in our comparison and only the figure showing resident fishermen has been used.

THE STATE, AND COUNTIES.	ESTIMATED NUMBER OF PERSONS ENGAGED IN THE FISHERIES		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	11,743	11,093	-650	-5.54
Barnstable,	2,631	1,871	-760	-28.89
Bristol,	1,606	1,225	-381	-23.72

THE STATE, AND COUNTIES.	ESTIMATED NUMBER OF PERSONS ENGAGED IN THE FISHERIES		INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
Dukes,	157	249	+92	+58.60
Essex,	5,697	6,266	+569	+9.99
Middlesex,	6	9	+3	+50.00
Nantucket,	225	125	—100	—44.44
Norfolk,	106	44	—62	—58.49
Plymouth,	483	349	—134	—27.74
Suffolk,	832	955	+123	+14.78

The returns for the two years are very nearly equal, 1895 showing a decrease of 650, or 5.54 per cent.

As stated previously, we have used the term "estimated" in regard to the number of persons engaged in the fisheries, and it has been used advisedly. There are three different ways of ascertaining the number of fishermen, of which each has elements of truthfulness, while all three, statistically considered, are but approximations, or estimates. The first way is the population schedule of the Census. The casual reader would expect the figure given under occupations to show the number of fishermen, but it must be remembered that the population schedule enumerates only resident fishermen. Again, the population schedule considers as a man's occupation that upon which he depends principally for a livelihood; but a farmer who works eight months upon his farm, and fishes for four months would call himself a farmer; a carpenter out of a job who made a three months' fishing trip would be called a carpenter. It is plainly evident, then, that the Census population schedule must necessarily report less than the actual number of fishermen.

Another way is to aggregate the returns from owners of vessels and purchasers at wholesale of fish; but here we meet another difficulty. The owners of vessels would include both resident or native fishermen, and non-resident or fishermen who are not citizens of this country. Again, if a fisherman is employed by two or more firms during the same year, he is reported by each, and duplications occur. The same objections apply to returns made by dealers who purchase fish from the fishermen, for they include both citizens and those who are not, and different firms report the same individuals.

The third way is that adopted by the Census Bureau in filling out the schedule relating to the fisheries. We have accepted the returns of the owners of vessels as to the number of officers and crew required to man their vessels, necessarily including many fishermen who are not citizens, and who do not appear upon the population schedule. To ascertain the shore fishermen, the most strenuous efforts have been made in every maritime city and town to learn the name of every person engaged in catching fish for sale during any part of the Census year. Parties have been employed who were acquainted with their respective towns to accompany our special agents, and point out the residences of fishermen. But many fishermen live in towns not contiguous to the shore, and no doubt have been omitted. There have also been omitted those who had left the town and gone into other business, as well as some whose names were not obtained by our special agents.

We consider the third way, however, as statistically the most exact. The number of fishermen from the population schedules for the Census of 1895 has not, as yet, been ascertained, but a further consideration of this subject will be made in that part of the analysis of Volume IV of the Census which relates to the occupations of the people.

Disabilities and Deaths.

The Census schedule for The Fisheries called for the number of disabilities and deaths *by accident* during the Census year 1895. The particulars, not sufficient for a tabular presentation, are shown in the following table:

CITIES AND TOWNS.	Number of Disabilities by Accident	Number of Deaths by Accident	Number of Lives Lost
BEVERLY,	-	-	2
BOSTON,	-	5	4
GLOUCESTER,	4	77	94
NEW BEDFORD,	1	1	-
Provincetown,	-	2	2
TOTALS,	5	85	102

The total number of disabilities by accident reported was five; number of deaths by accident, 85. In the right-hand column of the table is given the "number of lives lost" as reported to the Boston Fish Bureau, but this total, 102, includes, we are informed, deaths from natural causes as well as those from accident. The returns of disabilities and deaths from accident in 1885 were very incomplete.

The American Whale Fishery.

The following table, extracted from official sources, shows the products of the whale fishery, by customs districts in this State, and also for other American cities engaged in that fishery for 1889 and 1890:

CUSTOMS DISTRICTS.	SPERM OIL		WHALEBONE		TOTALS	
	1889	1890	1889	1890	1889	1890
Barnstable, Mass.,	\$42,614	\$9,619	-	\$84	\$42,614	\$9,703
Beaufort, S. C.,	-	2,363	-	-	-	2,363
Boston, Mass.,	35,436	7,502	\$1,500	11,650	36,936	19,152

COASTWISE AND OCEAN COMMERCE. UNDER AMERICAN FLAG,	137-176
PILOTAGE AND TOWAGE. UNDER AMERICAN FLAG,	177-184
OCEAN COMMERCE. UNDER FOREIGN FLAGS,	185-191

Coastwise and Ocean Commerce. Under American Flag.

Under this sectional title are included all vessels flying the American flag, engaged in commerce, exclusive of pilotage and towage, registered at the customs ports of Massachusetts; and all such vessels below the registry standard (under five tons), if owned wholly or in part by citizens of Massachusetts. Under coastwise commerce is included all vessels plying between ports on the American seaboard, while ocean commerce includes vessels sailing between American and foreign ports. The returns comprise nine tabular presentations, each of which will be analyzed separately.

Investments and Earnings.

The first presentation relates to investments and earnings and is contained on pages 139-145. The presentation shows, by cities and towns, the investments in coastwise and ocean commerce under the American flag, classified so as to show the following details: Buildings and fixtures, cash capital, credit capital, total cash and credit capital, land, vessels including outfit, wharves, and total investments; and also earnings classified so as to show whether derived from freight or passengers, with total earnings. Recapitulations with county and State aggregates appear on pages 143-145.

Confining our attention in this analysis to these recapitulations we note that the investments in coastwise and ocean commerce under the American flag for the State include, in an aggregate of \$14,394,432, the following details: Buildings and fixtures, \$313,235; cash capital, \$1,150,870; credit capital, \$94,040; land, \$352,414; vessels including outfit, \$12,220,132; and wharves, \$263,741. The cash and credit capital aggregate \$1,244,910. It may be stated here that owing to omissions in the returns made on commerce, all of these amounts representing details of investment are smaller than actual figures would show. This is particularly true in regard to cash and credit capital, as over 30 per cent of the firms and corporations did not include these two items in their returns.

The total investments by counties are as follows: Barnstable, \$510,364; Bristol, \$4,150,359; Dukes, \$43,612; Essex, \$652,961; Middlesex, \$94,700; Nantucket, \$30,100; Plymouth, \$14,810; and Suffolk, \$8,897,526. It should be explained that in tabulating the investments by cities and towns, and therefore in making up the recapitulation by counties, the city or town in which the managing owner lived has been credited with the investment. The same explanation applies to the statistics of earnings. The port or ports at which the vessels, owned either wholly or in part in the several cities and towns, were registered is shown by a note preceding the statistics for the city or town, in the main presentation.

Naturally, Suffolk County exceeds all others in the aggregate value of the investments, and these are mainly credited to the city of Boston. The only investments

reported in the county outside of Boston are cash capital \$500, and vessels including outfit, \$15,000, from the city of Chelsea.

With respect to earnings, the total amount reported for the State is \$9,339,321; the amount derived from freight being \$7,253,503, and from passengers, \$2,085,818. In terms of percentages therefore, 77.67 per cent of the earnings is from freight and 22.33 per cent from passengers.

The earnings by counties are as follows: Barnstable, \$235,380, wholly from freight; Bristol, \$2,565,116, of which \$1,462,654 represents freight and \$1,102,462 passenger earnings; Dukes, \$21,590, the earnings from freight being \$18,610 and from passengers \$2,980; Essex, \$305,885, including \$274,626 from freight and \$31,259 from passengers; Middlesex, \$56,000, of which \$54,500 is from freight and \$1,500 from passengers; Nantucket, \$17,274, the earnings from freight being \$8,876 and from passengers \$8,398; Plymouth, \$16,326 wholly from freight; and Suffolk, \$6,121,750, including \$5,182,531 from freight and \$939,219 from passengers.

There were 25 vessels reported and included in the returns relating to investments which were laid up or otherwise withdrawn from regular freight or passenger service during the Census year 1895, and, of course, from these no earnings were returned. These vessels are distributed by cities and towns as follows: Barnstable, Dennis, Falmouth, New Bedford, Beverly, and Gloucester, one each; Fall River and Boston, six each; Edgartown, three; Nantucket and Salem, two each.

Number and Value of Vessels, with Aggregate and Average Receipts.

The second tabular presentation relating to coastwise and ocean commerce under the American flag shows the number and value of vessels carrying freight only, passengers only, and both freight and passengers, with earnings from freight and passengers separately and in the aggregate, the tons of freight carried, the number of passengers carried, the average gross earnings per vessel, and the percentages of gross earnings of value of vessels. This presentation, pages 146 and 147, is by counties, cities, and towns, followed by the State and county recapitulation.

For the State, the returns include 461 vessels carrying freight only; 104 carrying passengers only; and 50 carrying both freight and passengers; the aggregate number of vessels engaged in carrying freight or passengers or both being 615, having an aggregate value of \$12,086,982. The aggregate value of the investment in vessels and outfit as reported in the preceding presentation was \$12,220,132, but this included certain vessels which were laid up during the Census year and others not engaged in carrying either freight or passengers and therefore not reporting earnings, the number of such vessels, with values, being as follows:

CITIES AND TOWNS.	Number of Vessels	Aggregate Value	Condition during Census Year
Barnstable,	1	\$1,000	Laid up.
Dennis,	1	1,500	Anchor sweeping and wrecking.
Falmouth,	1	300	In use by scientific parties, etc.
FALL RIVER,	6	55,850	Laid up, 5; dock construction, etc., 1.
NEW BEDFORD,	1	1,000	Laid up.
Edgartown,	3	4,500	Laid up.
BEVERLY,	1	3,500	Laid up.
GLOUCESTER,	1	400	Laid up.
SALEM,	2	3,200	Laid up.
Nantucket,	2	1,400	Laid up.
BOSTON,	6	60,500	Laid up.

The value of vessels carrying freight only is \$5,099,763; passengers only, \$447,032; and passengers and freight together, \$6,540,187. In the aggregate there were 4,994,177

tons of freight carried and 7,763,629 passengers transported, the earnings from each branch of the traffic, respectively, being \$7,253,503, and \$2,085,818, as shown in the preceding presentation. The aggregate amount received for freight and passenger traffic was, as previously stated, \$9,339,321, the average gross earnings per vessel being \$15,186, equivalent to 77.27 per cent gross on the value of vessels.

The percentages of gross earnings of value of vessels, by counties, are as follows: Barnstable, 48.58; Bristol, 73.91; Dukes, 57.84; Essex, 85.17; Middlesex, 64.70; Nantucket, 68.14; Plymouth, 128.05; and Suffolk, 80.43. These gross percentages do not in any way indicate net profit, as the latter depends upon expenses for wages, coal, food, and other supplies, wharfage, pilotage, etc.; all of which must be met out of gross earnings.

Number of Vessels and Tonnage: By Kinds of Commerce and Vessels.

This is the third tabular presentation relating to coastwise and ocean commerce under the American flag. It is contained upon pages 148-150, the statistics being by cities and towns, with county aggregates, and a recapitulation for the State, given upon page 150.

Referring to this recapitulation we note that of the entire number of vessels, 640, returns as to tonnage are not given for 49, the others, 591 in number, showing an aggregate tonnage of 275,663.62.

The aggregate tonnage of the vessels engaged in coastwise traffic only (excluding from the grand total, 531, the 49 vessels for which tonnage is not reported), is 211,147.85; of the 55 vessels engaged in ocean traffic only, 36,543.04; and of the 54 vessels engaged in both coastwise and ocean traffic, 27,972.73.

Of the vessels engaged in coastwise commerce only, the largest aggregate tonnage is returned by the steamers. There are 101 such steamers, returns as to tonnage being supplied for all but two of them. The tonnage of the other 99 aggregates 93,572.91, or 44.32 per cent of the total tonnage reported for the vessels engaged in coastwise traffic under the American flag. The next largest aggregate amount of coastwise tonnage is covered by the schooners, 247 in number, 238 reporting tonnage amounting to 75,240.27. Next to the schooners rank the 52 coastwise barges, from four of which tonnage is not reported, the tonnage of the others aggregating 37,814.78. The other vessels in the coastwise traffic, flying the American flag include two barkentines, 34 catboats, 15 lighters, four scows, 73 sloops, together with one brig, one yawl, and one sail boat, not otherwise described.

In ocean commerce exclusively, under the American flag, the returns show 55 vessels, aggregating 36,543.04 tonnage, and including seven barkentines, tonnage 3,979.61; 20 barks, tonnage 15,663.21; eight brigs, tonnage 2,567.63; 12 schooners, tonnage 3,585.76; and eight ships, tonnage 10,746.83.

The number of vessels in both coastwise and ocean traffic is 54, the aggregate tonnage being 27,972.73. These include two barges, one barkentine, seven barks, four brigs, 37 schooners (aggregate tonnage 18,794.82, or 67.19 per cent of the total), two ships, and one steamer.

Date of Establishment of Firms and Corporations.

This presentation, pages 151 and 152, shows for the number of firms and corporations engaged in commerce under the American flag, the dates of establishment with the number established in each specified year, classified by cities and towns according to the residence of the managing owner, with recapitulations by counties and for the State.

This table is chiefly valuable as showing the continuity of the firms or corporations existing in 1895, the Census year. A few points from the recapitulation, page 152, may be summarized.

The firms or corporations in existence in 1895 include two which date their origin from early colonial times, one having been established in 1638 and one in 1670. The first is credited to Boston and the other to Gloucester. There are, besides these, nine

which were established prior to 1850, all of them having originated within the present century, as follows: two in 1845, and one in each of the years 1824, 1825, 1828, 1836, 1840, 1841, and 1846.

Of the existing firms or corporations 14 were established in the decade 1850-1859, the others, not previously referred to, originating in the decades subsequent to 1859, as follows: 1860-1869, 18; 1870-1879, 68; 1880-1889, 120; and subsequent to 1889, 105. There were two firms or corporations for which the date of establishment was unobtainable.

Firms and Corporations. Partners and Stockholders.

This presentation, contained on pages 153-155, shows the number of firms, and the number of corporations engaged in specified kinds of commerce, together with the number of partners and stockholders in such firms and corporations, the total number of returns, and the aggregate number of partners and stockholders, by cities and towns, with county and State recapitulations.

For the State, the number of firms is 308, including 550 partners; the number of corporations is 30, with 1,983 stockholders, the establishments thus aggregating 338, with 2,533 partners and stockholders. The firms interested in coastwise commerce only, number 266, with 442 partners; and the corporations 24, with 1,702 stockholders. There are 16 firms engaged in ocean commerce only, with 26 partners; while there are 26 firms, with 82 partners, and six corporations, with 281 stockholders, engaged in both coastwise and ocean commerce. Of course, it will be borne in mind that this presentation, like others of the series we are now reviewing, relates to commerce under the American flag.

Ownership of Vessels.

The presentation, included on pages 156-158, shows, as will be seen by reference to the recapitulation for the State, page 158, that of the 640 vessels engaged in coastwise or ocean commerce under the American flag, the aggregate value is \$12,220,132; the amount owned by citizens of Massachusetts represents \$8,765,182; and the amount owned by citizens of other States, \$3,453,544; while \$1,406 represents the aggregate interest in ownership of foreigners. The foreign ownership is confined entirely to the schooners credited to Nantucket, as shown by the county recapitulation, pages 157 and 158. Of the interest held by citizens of other States, \$2,066,339, or 59.83 per cent of the entire amount, is in steamers whose home ports are in other States. The balance of the interest of citizens of other States, aggregating \$1,387,205, is distributed among vessels whose home ports are in different counties as shown in the following summary, which also gives the kinds of vessels, with aggregate amount owned by citizens of other States:

Barnstable, schooners, . . .	\$163,676	Nantucket, catboats, . . .	\$3,300
Bristol, . barks, . . .	1,092	Suffolk, . barges, . . .	30,942
schooners, . . .	103,876	barkentines, . . .	33,849
steamers, . . .	3,000	barks, . . .	70,958
Dukes, . schooners, . . .	4,600	brigs, . . .	17,708

Officers and Crew Required to Man.

This presentation, the seventh in the series relating to commerce under the American flag, shows by home ports the number of vessels, classified by kinds, with the number of men required to man them, classified as officers and crew. The presentation covers pages 159-161, the recapitulation by counties and for the State appearing on pages 160 and 161. Only the vessels carrying crews in service during the Census year are included in the presentation, aggregating 609; 25 vessels of the entire fleet being out of commission during the year, as previously stated, and there being six barges in service but without crews.

It requires 5,700 men to man these 609 vessels, 1,504 being officers, and 4,196 in the crews. The steamers take a larger number than any other type of vessel, the aggregate being 2,885, including 601 officers, and 2,284 comprising the crews. Next to the steamers rank the schooners, 292 in number, requiring 1,708 men, of whom 576 are officers, and 1,132 forming the crews. These two types of vessels require 80.58 per cent of the aggregate number of men required to man the vessels of the fleet which were in commission under the American flag during the Census year.

Principal Ports Visited.

The presentation, pages 162-167, shows the principal ports visited, classified by divisions, states, and countries, with number of vessels and tonnage. We summarize the aggregates under the different subheads as follows: the number of vessels sailing from ports in Massachusetts to ports in the North Atlantic States was 308, tonnage 72,505.36; the number sailing to ports within the South Atlantic States was 14, tonnage 22,703.94. There were also six vessels which sailed from ports in Massachusetts to ports in British America, tonnage 1,799.43; 14 to ports in the West Indies, tonnage 6,059.88; seven to ports in South America, tonnage 4,199.62; and seven to ports in Africa, tonnage 2,476.88. The presentation of course shows in detail the principal ports visited under each of the subheads specified, and also shows the number of other ports visited.

Besides the Massachusetts vessels plying from Massachusetts ports to the ports above specified, the statistics also include Massachusetts vessels plying from ports in Maine, New Hampshire, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, ports in New England (not specified), Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, and Louisiana to other United States and foreign ports; also from ports in British America, West Indies, Mexico, South America, Europe, Africa, Asia, and ports in islands of the Pacific Ocean to various American and foreign ports.

Cargo Carried to Principal Ports.

This tabular presentation covers pages 168-175. It shows quite fully the nature of the commerce carried on under the American flag in which Massachusetts is interested through ownership. The statistics are classified by cargo and ports, so as to show the number of vessels, with tonnage, engaged in transportation of the various specified cargoes between the ports specified, and the number of other ports visited. It is impossible to analyze this table in detail, nor is such analysis needed. Several of the principal lines may be referred to, however. There are 412 vessels (the tonnage of four not being reported), with an aggregate tonnage of 251,565.31, which were devoted to the transportation of coal mainly from ports in Massachusetts, Connecticut, New York, Pennsylvania, Maryland, and Virginia to various coastwise ports in America, and to South America, West Indies, British America, and Europe. The number of vessels carrying general merchandise only is 57, aggregate tonnage 41,967.66, the traffic being mainly from ports in Massachusetts and New York to coastwise ports, and to ports in British America, West Indies, South America, and to islands of the Pacific Ocean. Besides these, there are 50 vessels which carried general merchandise and passengers, the aggregate tonnage being 63,159.58, mainly from ports of Massachusetts to coastwise ports: 41 vessels, aggregate tonnage 7,375.43, carried granite from ports in Massachusetts and Maine to coastwise ports: 44 others, aggregate tonnage 13,579.39, carried stone from ports in Massachusetts, Maine, and New York to other coastwise ports, and to British America: 65 vessels, aggregate tonnage 41,067.94, carried ice from ports in Maine to ports in New York, Pennsylvania, and the South; while one vessel, tonnage 874.53, carried ice and lumber from ports in Massachusetts to ports in South America. Fifteen vessels, aggregate tonnage 3,506.43, were engaged in the transportation of logwood from ports in the West Indies and South America to Massachusetts, Rhode Island, and New York; two others tonnage 380.78, brought logwood and sugar from

the West Indies to Massachusetts; while 41, aggregate tonnage 21,878.01, brought sugar from ports in Louisiana, West Indies, and South America mainly to Massachusetts and New York. Ninety-eight vessels, aggregate tonnage 41,187.13, carried lumber mainly from ports in the North to those in the South, or the reverse, while others carried cargoes of which lumber formed a part. The number of vessels carrying passengers was 104, the aggregate tonnage reported being 2,091.63, not including, however, 29 vessels for which no tonnage was reported. Most of these vessels were engaged in local passenger traffic between ports in Massachusetts.

Pilotage and Towage. Under American Flag.

The returns relating to commerce under the above sectional head are included in three tabular presentations. As in the tables which have preceded them, the information is given by home ports, with county and State recapitulations.

Number of Vessels and Tonnage: By Kinds of Commerce and Vessels.

This showing is contained upon pages 179 and 180, the recapitulation for the State appearing upon page 180. This recapitulation shows that the entire number of vessels engaged in pilotage and towage under the American flag is 92, the aggregate tonnage returned being 3,539.86, the tonnage of one vessel being omitted in this aggregate. In the coastwise traffic, exclusively, there are 76 vessels employed, comprising eight schooners, aggregate tonnage 607.78; four sloops, aggregate tonnage 45.63; 17 steamers, aggregate tonnage 369.48; and 47 steamer tugs, of which the aggregate tonnage returned (one vessel being omitted) is 1,518.07. In the ocean traffic, exclusively, 12 steamer tugs are employed, having an aggregate tonnage of 733.33. Besides these, there are four vessels employed in both coastwise and ocean traffic, having an aggregate tonnage of 265.57.

Of the entire number of vessels, namely 92, returned as engaged in pilotage and towage, for the State, 67 are credited to the city of Boston, no others being returned from Suffolk County; and the aggregate tonnage returned is 2,781.16, the tonnage of one vessel being omitted. Of these 67 vessels, 55 were engaged in coastwise traffic, including eight schooners, nine steamers, and 38 steamer tugs; and 12 in ocean traffic, these being steamer tugs.

Ownership of Vessels.

This presentation is shown upon pages 181 and 182. The recapitulation for the State appears upon page 182 and shows that the aggregate value of the vessels engaged in pilotage and towage is \$879,875, of which \$799,066 represents the amount owned by citizens of Massachusetts, and \$80,809 that owned by citizens of other States. The ownership of citizens of other States is confined to the investment of \$1,500 in steamers, and \$79,309 in steamer tugs. The amounts owned by citizens of Massachusetts represent in detail the following: Eight schooners, aggregate value \$93,100; four sloops, aggregate value \$2,100; investments in steamers aggregating \$129,600, and in steamer tugs aggregating \$574,266. The total number of vessels, as shown in the preceding presentation, is 92; of steamers, 21; of steamer tugs, 59; a part of the value of the steamers and steamer tugs, as just stated, is held by citizens of other States, the aggregate value of the former being \$131,100, and of the latter, \$653,575. Of the total value of the vessels engaged in pilotage and towage, \$718,475, or 81.66 per cent, is credited to the city of Boston.

Officers and Crew Required to Man.

The presentation under this title appears upon pages 183 and 184. It shows, by home ports, the number and kinds of vessels, and the number of persons required to man the specified vessels, classified as to officers and crew. The recapitulation for the State, given on page 184, summarizes the returns for 91 vessels, one vessel being laid up during the Census year 1895, and therefore not being included in the returns relative to officers and crew. The number of persons required to man these 91 vessels is 541,

160 being classified as officers and 381 as crew. By classes, the statistics are as follows: Eight schooners, requiring 32 officers and 39 in the crew, aggregating 71; four sloops, requiring four officers and three in the crew, aggregating seven; 20 steamers, requiring 36 officers and 64 in the crew, aggregating 100; 59 steamer tugs, requiring 88 officers and 275 in the crew, aggregating 363. Of the total number of men required to man the vessels returned in the aggregate for the State, 432 (as shown on page 183), or 79.85 per cent, are required for vessels returned from the city of Boston.

Ocean Commerce. Under Foreign Flags.

Under this final sectional head there are six tabular presentations relating to commerce. They include the operations of regularly established lines only, having resident agents in Massachusetts, and for that reason no returns appear except from the chief port, Boston.

It is impossible to include in the Census returns the operations of foreign vessels which may have taken cargoes in or out of Massachusetts ports when not connected with established lines having resident agents here, as no data are of record enabling the Census office to make up a return, the only information in existence relating to such vessels being that contained on the manifests on the files at the custom houses. It will be understood that the Census returns under this head do not make a complete exhibit of the ocean commerce of the State carried on in foreign vessels, but of only that part which, as explained, is included within the operations of the regularly established lines of vessels. The presentations will now be considered *seriatim*.

Investments and Earnings.

This presentation appears upon page 187. It relates entirely to the city of Boston and the county of Suffolk, no ocean commerce under foreign flags being returned from any other port for the reasons previously stated. As shown in the note preceding the table, the number of vessels reported is 61; registered at home ports as follows: Liverpool, Eng., 31; Glasgow, Scot., 13; Great Britain, *n. s.*, 12; Yarmouth, N. S., 3; Halifax, N. S., 1; Antigua, W. I., 1. The aggregate value of these vessels including outfit, as returned, is \$14,464,000, and the earnings for the Census year aggregate \$6,014,074, including \$4,775,985 received from freight traffic and \$1,238,089 received from passengers.

Number and Value of Vessels, with Aggregate and Average Receipts.

The statistics appear upon page 187. They show that of the total number of vessels, namely, 61, 44 were engaged in carrying freight only, and 17 both freight and passengers. The value of the vessels carrying freight only is \$12,124,500, and of those carrying freight and passengers, \$2,339,500. The aggregate number of tons of freight carried, excluding 12 vessels, for which returns were not available, is 1,247,057, and the receipts for freight traffic, \$4,775,985. The aggregate number of passengers carried was 81,446, and the receipts for passenger traffic \$1,238,089. The aggregate amount received for freight and passengers was \$6,014,074; the average gross earnings per vessel being \$98,591, and the percentage of gross earnings of value of vessels 41.58. It was necessary in some cases to estimate values and earnings, and, for that reason, the amounts given are less rather than greater than the actual.

Number of Vessels and Tonnage: By Kinds of Commerce and Vessels.

This presentation is shown upon page 188. In the aggregate, 61 vessels are included, comprising one bark, tonnage 1,417; one brig, tonnage 232; and 59 steamers, tonnage 212,678.87; the aggregate tonnage of all the vessels being 214,327.87. The largest number of vessels, as well as the largest aggregate tonnage, is credited to Liverpool, England, the vessels numbering 31 with an aggregate tonnage of 143,302.08, or 66.86 per cent of the total tonnage returned. The vessels credited to Glasgow, Scotland, rank next to those from Liverpool, numbering in the aggregate 13 steamers, with an aggregate tonnage of 43,243.79.

Officers and Crew Required to Man.

This presentation, contained upon page 189, gives the statistics of the vessels engaged in commerce under foreign flags, classified by kinds according to their several home ports, with the number of persons required to man such vessels in the aggregate, and classified as officers and crew. The 61 vessels credited to foreign ports require 3,342 men, of whom 490 are classed as officers and 2,852 as crew; seven men are required upon the bark, and 10 upon the brig; the others, 3,325 in number, are required to man the steamers, which, in the aggregate, number 59, the number of officers required being 486 and the number comprising the crew, 2,839.

Ports Visited.

The presentation under this title, appearing upon page 190, shows for the 61 vessels presented in the preceding tables, engaged in commerce under foreign flags, the ports visited, as well as the ports from which the vessels sailed during the Census year, with tonnage and number of other ports visited. The information may be summarized as follows: Out of the 61 vessels, there were 59 which sailed from ports in Massachusetts to ports in British America, West Indies, or Europe; of these, three sailed to the British Provinces, the aggregate tonnage being 3,218; six to the West Indies, aggregate tonnage 6,307; and 50 to European ports, either England or Great Britain (not specified), aggregate tonnage 203,153.87. There was one vessel which sailed from New York to China, aggregate tonnage 1,417; one which sailed between a port in British America and a port in the West Indies, aggregate tonnage 232; and one which sailed from a port in the West Indies to a port in Nova Scotia, aggregate tonnage 232.

Cargo Carried to Ports Visited.

This final presentation of the series relating to the commerce of Massachusetts under foreign flags shows the number of vessels, tonnage, and number of other ports visited, with a classification of cargo carried and ports from whence the vessels sailed and to which they were destined. The statistics appear upon page 191. Of the 61 vessels, 42, the aggregate tonnage being 168,192.66, carried cattle and general merchandise from ports in Massachusetts to ports in Europe; two, aggregate tonnage 1,480, carried fish and general merchandise from ports in Massachusetts to ports in British America; six, tonnage 6,307, carried fruit, general merchandise, and passengers from ports in Massachusetts to ports in West Indies; one, tonnage 2,459, general merchandise from ports in Massachusetts to ports in Europe; one, tonnage 1,417, general merchandise and kerosene from ports in New York to ports in Asia; one, tonnage 232, lumber from a port in British America to a port in the West Indies; bringing on the return voyage molasses from the West Indies to British America. Besides these, there were eight vessels, aggregate tonnage 34,240.21, which carried general merchandise and passengers from ports in Massachusetts to ports in British America and Europe, the last-named comprising seven vessels, aggregate tonnage 32,502.21.

Comparisons for 1885 and 1895.

We present a series of four tables which supply comparisons for certain elements appearing in the Censuses of commerce in the years 1885 and 1895. To conform with the returns made in 1885 we have excluded, in this comparison, all vessels from our 1895 showing that were not actually engaged in commerce during the Census year; the latter includes vessels engaged in pilotage and towage, besides those laid up, etc. These comparisons are for State aggregates only.

The first table shows the number of vessels and tonnage, classified by kinds of commerce, with increases or decreases in 1895 as compared with 1885.

NUMBER AND TONNAGE OF VESSELS AND YEARS, WITH INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885.	KINDS OF COMMERCE			Aggregates
	Coastwise	Ocean	Coastwise and Ocean	
NUMBER OF VESSELS.				
1885,	461	259	77	797
1895,	509	115	52	676
Increase (+), or decrease (—), . .	+48	—144	—25	—121
TONNAGE OF VESSELS.				
1885,	171,660.37	323,864.62	30,674.83	526,199.82
1895,	202,095.26	249,900.40	27,767.01	479,762.67
Increase (+), or decrease (—), . .	+30,434.89	—73,964.22	—2,907.82	—46,437.15

The number of vessels engaged in coastwise commerce shows an increase of 48 in 1895 over 1885. Ocean commerce, on the other hand, shows a decrease of 144 vessels in the decade mentioned. Similarly, the number engaged both in coastwise and ocean commerce has fallen off 25 vessels in the period considered. In the aggregate, the number of vessels engaged in commerce in 1895 shows a decrease of 121 as compared with 1885.

Coastwise commerce shows an increase of 30,434.89 tons; ocean commerce, a decrease of 73,964.22 tons; coastwise and ocean commerce, a decrease of 2,907.82 tons. The aggregate tonnage of vessels in 1895 shows a decrease of 46,437.15 as compared with 1885.

The next table presents the total value of the vessels, classified as to ownership.

OWNERSHIP OF VESSELS AND YEARS, WITH DECREASE (—), IN 1895 AS COMPARED WITH 1885.	AMOUNT OWNED BY—			Total Value
	Citizens of Massachusetts	Citizens of Other States	Foreigners	
OWNERSHIP OF VESSELS.				
1885,	\$9,765,319	\$3,928,031	\$14,217,254	\$27,910,604
1895,	9,062,758	3,597,318	13,890,906	26,550,982
Decrease (—),	—702,561	—330,713	—326,348	—1,359,622

As would naturally be inferred from the fact that commerce shows a falling off in 1895 as compared with 1885 in number of vessels and tonnage, the value of vessels shows a decrease in aggregate holdings of \$1,359,622. An examination of the table shows general decreases for the three classes of ownership considered.

The third table presents the receipts for the transportation of freight and passengers separately, and combined.

RECEIPTS FROM VESSELS AND YEARS, WITH INCREASE (+), IN 1895 AS COMPARED WITH 1885.	Amount Received for Freight	Amount Received from Passengers	Amount Received for Freight and from Passengers
RECEIPTS FROM VESSELS.			
1885,	\$10,731,637	\$2,184,337	\$12,915,974
1895,	12,029,488	3,323,907	15,353,395
Increase (+),	+1,297,851	+1,139,570	+2,437,421

Uniform increases may be noted in the preceding table. Despite the falling off in the number of vessels, the increase in business done has been marked. The joint receipts for freight and from passengers in 1895 shows an increase of \$2,437,421 over those reported in 1885.

In the fourth and final table we summarize the aggregates for the three preceding showings.

AGGREGATES AND YEARS, WITH INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885.	Number of Vessels	Value of Vessels	Tonnage of Vessels	Receipts from Vessels
AGGREGATES.				
1885,	797	\$27,910,604	526,199.82	\$12,915,974
1895,	676	26,550,982	479,762.67	15,353,395
Increase (+), or decrease (—), . . .	—121	—1,359,622	—46,437.15	+2,437,421

TABULAR ANALYSIS.

AGRICULTURAL PRODUCTS AND PROPERTY: BY TOWNS, Pages
205-345

The presentation showing Agricultural Products and Property, by towns, is the first section of the Decennial Census returns relating to agriculture.

Under the provisions of the Census law, the information respecting agriculture was collected by means of a direct personal canvass of the farms of the Commonwealth, conducted by agents of the Department especially selected for this particular work after the close of the Census year 1895. The facts relate to the year ending on the 15th day of November, 1895, and, so far as property is concerned, report it as it existed on that day. Great care was taken in the preparation of the schedules, in the instruction of the agents, in the supervision of their work, in inspecting the returns for the purpose of eliminating errors, and in the classification and tabulation of results. The returns cover the operations of every person owning, hiring, or carrying on a farm, market garden, orchard, nursery, seed garden, etc., or who was engaged in raising agricultural products or conducting domestic manufactures, without limitation as to value of property or extent of product, provided the operations were carried on upon a farm, or upon property which should be classed as a farm.

A farm, as understood and defined by the Census office, is the home of a farmer, his workshop, and his means of obtaining a subsistence; this necessitates certain appliances to enable him to carry on successfully the work of the farm: these necessary adjuncts comprise arable soil for crop land, pasture land for stock, woodland for material for fuel, fences, etc., in short all the land from which he obtains his crops, or devoted to pasturage, woodland, etc., whether in direct connection with his homestead or not; and the buildings requisite for housing family, products, and animals, together with the necessary machinery and implements required for the proper cultivation of the land.

It is not expected, of course, that those persons carrying on market gardens, orchards, nurseries, and seed gardens, should have upon their land all the adjuncts or appliances required to constitute a modern farm, but the returns for such kinds of agricultural property contain full information as to the particular adjuncts and appliances needed to carry them on. As a general rule, a *farm* means land cultivated for the support or profit of the proprietor, and it is for this reason that market gardens, nurseries, seed gardens, etc., are included under the general title, farm. Sometimes the same individual farmers have more than one farm. In all such cases, every separate farm has been separately enumerated. From the foregoing statement it will be plain that the returns do not cover village lots, products of small independent house or kitchen gardens, or of property not on farms.

The values, both of products and property, are the values returned by the farmers themselves, and bear no reference to any valuation that may have been made by assessors for the purpose of taxation. The values of products are not based upon prices ruling at the date of the enumeration, but upon the amount received for the articles when sold — market values, — and, if not sold, the estimated value on the same basis. The building values are, in general, the amounts that would be required to replace the building if destroyed by fire, that is, the insurable values. The values of dairy products in-

clude only such products sold from or used on farms, the product of creameries and cheese factories being taken in the Census of Manufactures. Special attention was given by the Department to securing for each city and town a complete return of agricultural products and property belonging to non-residents, but properly accredited to the city or town. It is believed that in all respects the returns are entirely trustworthy, and that no operations properly included have escaped enumeration by the agents of the Department.

The classified titles used in the presentation are as follows :

PRODUCTS.	PRODUCTS — Concluded.
Animal products.	Fruits, berries, and nuts.
Clothing, needle work, etc.	Hay, straw, and fodder.
Dairy products.	Meats and game.
Food products.	Vegetables.
Greenhouse products.	Products from mines, quarries, pits, etc.
Hothouse and hotbed products.	
Liquors and beverages.	
Nursery products.	
Poultry products.	
Wood products.	
Wooden goods.	
Other products.	
Cereals.	

PROPERTY.

Land.
Buildings.
Machines, implements, etc.
Domestic animals, etc.
Fruit trees and vines.
Mines, quarries, pits, etc.

The principal kinds of products classified alphabetically under these general heads are as follows :

Animal Products.

Calf skins.	Pelts.
Candles.	Wool, merino.
Hides.	Wool, Saxony.
Honey.	Wool, other than merino or Saxony.
Manure.	

Clothing, Needle Work, etc.

(Of Domestic Manufacture.)*

Boots and shoes, including work on the same.	Clothing, including work on the same.
Carpeting, rag.	Hats, including work on the same.

Dairy Products.†

Butter.	Cream.
Cheese.	Milk.

Food Products.

Canned fruits.	Maple molasses.
Catsup.	Maple sugar.
Dried fruit.	Pickles.
Horse-radish, grated.	Vinegar.
Ice.	

* Not intended for the use of the family wherein produced.

† As previously stated, this applies to such products sold from or used upon the farms where produced. The product of creameries and cheese factories is considered a factory product and is taken in the Census of Manufactures.

Greenhouse Products.

Flowers, leaves, and vines, cut.	Plants, flowering and other.
----------------------------------	------------------------------

Hothouse and Hotbed Products.

Cabbage plants.	Tomato plants.
Celery plants.	

*Liquors and Beverages.**

Cider.	Wine.
Cider, boiled.	

Nursery Products.

Shrubs.	Trees, ornamental.
Trees, fruit.	Vines.

Poultry Products.

Eggs.	Poultry, dressed: geese.
Eggs, fancy.	Poultry, dressed: turkeys.
Eggs, game.	Poultry, dressed: other than chickens,
Feathers.	geese, and turkeys.
Manure.	Poultry (sold alive).
Poultry, dressed: chickens.†	

Wood Products.

Ashes.	Logs, box-board.
Bark.	Lumber.
Charcoal.	Poles: telegraph, telephone, etc.
Fence rails.	Posts, fence.
Firewood.	Railroad sleepers.
Hoop-poles.	Shingles.
Logs.	Wood (for pulp).

Wooden Goods.

Axe handles.	Hoops.
Barrels, half.	Hoops, barrel.
Baskets.	Hoops, nail keg.
Brooms.	Ox-yokes.
Brushes.	

Other Products.

Carrageen.	Liniment.
Chairs, cane seating.	Manure, sea.
Corn, broom.	Roots and herbs, medicinal and aromatic.
Evergreen goods.	Seeds: garden, field, and flower.
Harnesses.	Soft soap.
Hops.	Tobacco.
Hotbed mats.	

* Produced on farms only. Cider mills, etc., not connected with farms are included in the Census of Manufactures.

† Live chickens, geese, turkeys, etc., kept on the farms are classed as property under "Domestic Animals."

Cereals.

Barley.
Buckwheat.
Corn, Indian.
Corn, pop.

Oats.
Rye.
Wheat.

Fruits, Berries, and Nuts.

Apples.
Barberries.
Blackberries.
Blueberries.
Butternuts.
Cherries.
Chestnuts.
Citron.
Crab-apples.
Cranberries.
Currants.
Gooseberries.

Grapes.
Huckleberries.
Mangoes.
Melons.
Peaches.
Pears.
Plums.
Quinces.
Raspberries.
Shellbarks.
Strawberries.
Thimbleberries.

Hay, Straw, and Fodder.

Hay, clover.
Hay, English.
Hay, meadow.
Hay, millet.
Hay, salt.
Hay, not classified.
Straw.

Fodder, barley.
Fodder, corn.
Fodder, dry.
Fodder, oat.
Fodder, rye.
Beets (for stock).
Turnips (for stock).

Meats and Game.

Beef.
Mutton.
Pork.

Tripe.
Veal.
Game, wild.

Vegetables.

Asparagus.
Beans.
Beans, string and shell.
Beet greens.
Beets, table.
Cabbage.
Cabbage greens.
Carrots.
Cauliflower.
Celery.
Corn, green.
Cucumbers.
Dandelions.
Horse-radish.
Lettuce.
Lettuce (hotbed).
Martyrnias.
Mushrooms.

Onions.
Oyster plant.
Parsley.
Parsnips.
Pease.
Pease, green.
Peppers.
Potatoes.
Pumpkins.
Radishes.
Rhubarb.
Spinach.
Squashes.
Tomatoes.
Tomatoes (hothouse).
Turnips, table.
Not classified.

Products from Mines, Quarries, Pits, etc.

Clay.	Muck.
Fish.	Granite.
Gravel.	Limestone.
Marl.	Marble.
Asbestos.	Sandstone
Coal.	Slate.
Iron.	Soapstone.
Other metals.	Sand.
Peat.	Salt.

The classification under the titles representing property are as follows :

Land.

Cultivated Land :	Uncultivated Land : — Con.
Hay land (used for).	Mines, quarries, pits, etc. (the land surface only).
Principal crops (used for).	Woodland :
Market gardens.	Of over 30 years' natural growth.
Nurseries.	Of 30 years' natural growth, or less.
Orchards (the land).	From seeds or transplanted seedlings.
Seed gardens.	Other woodland (not classified).
Cranberry bogs.	Land Owned by Non-residents :
Other cultivated land.	Not classified (acreage and value only returned).
Uncultivated Land :	
Permanent pasture land.	
Other unimproved land.	
Unimprovable land.	

*Buildings.**

Dwelling-houses.	Ice-houses.
Barns.	Milk-houses.
Bee-hives.	Outbuildings.
Bee-houses.	Poultry-houses.
Breeding-houses.	Pumping-houses.
Carriage-houses.	Sheds.
Charcoal kilns.	Shops.
Cheese-houses.	Slaughter-houses.
Cider mills.	Stables.
Engine-houses.	Storehouses.
Granaries.	Sugar-houses.
Greenhouses.	Tobacco barns.
Grist and saw mills.	Tool-houses.
Hog-houses.	Water tanks.
Hop kilns.	Windmills.
Hotbed sashes.	

Machines, Implements, etc.

Cultivators.	Hay tedders.
Feed cutters.	Horse hoes.
Harrows.	Horse powers.
Hay cutters.	Horse rakes.

* Connected with farms only.

Machines, Implements, etc. — Concluded.

Hot air engines.	Seed sowers.
Implements.*	Steam engines.
Manure-spreaders.	Threshing machines.
Mowing machines.	Other machines.
Plows.	Carts, wagons, harnesses, etc.†
Reaping machines.	

Domestic Animals, etc.

Asses.	Lambs.
Bees (swarms of).	Milch cows.
Bulls.	Mules.
Calves.	Oxen.
Colts.	Pea fowls.
Dogs.	Pigeons.
Ducks.	Pigs.
Geese.	Sheep, merino.
Goats.	Sheep, Saxony.
Guinea fowls.	Sheep, other than merino or Saxony.
Heifers.	Steers.
Hens and chickens.	Turkeys.
Hogs.	Animals (sold alive).
Horses.	

Fruit Trees and Vines.

Apple.	Pear.
Butternut.	Plum.
Cherry.	Quince.
Chestnut.	Shellbark.
Crab-apple.	Grape vines.
Peach.	

Mines, Quarries, Pits, etc.‡

Clay pits.	Mines.
Fish ponds (private).	Peat bogs and muck beds.
Fish ways (private).	Quarries.
Gravel pits.	Sand pits.
Marl deposits.	Salt works.

There are some articles of minor importance which were found in the course of the canvass, and which were tabulated under the appropriate class titles. The same classification was made in the tabulation of the Census returns in 1885, and the statistics contained in the present volume may therefore be compared with the results shown in that year. A subsequent presentation will show in detail the statistics relating to the leading products which are classified under the general title heads.

The values shown in the returns as to products and property under each of the town designations, are also accompanied by percentages showing the proportion which each particular class of products or property bears to the total; and the figures relating to the leading products, that is to say, those aggregating 25 per cent or more than 25 per

* Small tools and appliances not elsewhere named or specified in detail.

† Not including horses or carriages used solely for pleasure driving, or for some business other than farming.

‡ Not including the value of the land surface, which is classed under "Land."

cent of the total value of products in the city or town, are presented in **full-face** type, so that they may at once strike the attention of the reader.

The recapitulation of aggregates, pages 308 and 315, brings together the totals for the State, by counties. With regard to products, the total value is \$52,880,431, and the total value of agricultural property, \$219,957,214. The county which stands first with respect to agricultural products is Worcester, for which the aggregate value is \$9,647,216; Middlesex ranks next, with \$9,174,999. The aggregate product value returned in Bristol County was \$5,007,991, this county ranking next to Middlesex; followed by Essex, with \$4,776,865, and Berkshire, with \$4,365,318. Next in order, will be found the county of Hampshire, with \$3,968,231; closely followed, however, by the counties of Franklin, Hampden, and Plymouth, in which the product values are, respectively, \$3,858,359, \$3,780,042, and \$3,241,023. The county of Norfolk returned \$2,857,517; the county of Barnstable, \$1,053,915; the county of Suffolk, \$733,191; the county of Dukes, \$271,693; and the county of Nantucket, \$144,071.

In property values the county of Middlesex leads, the aggregate being \$42,071,200; followed by the county of Worcester, with \$39,692,754. Essex ranks next to Worcester, with \$22,244,721; followed by Berkshire, with \$19,111,110, and Bristol, with \$18,557,043. The next county below Bristol is Hampden, in which the value of agricultural property is \$14,124,579, followed by four counties which rank close together, namely: Norfolk, \$13,006,280; Plymouth, \$12,769,715; Hampshire, \$12,062,798; and Franklin, \$10,897,594. The value returned in Suffolk County was \$9,541,880; in Barnstable, \$4,246,169; in Dukes, \$1,276,245; and in Nantucket, \$355,126.

The following table brings forward the aggregates for products and property, by counties, with percentages showing the relative standing of each county with respect to the aggregate for the State.

Total Products and Property. Value and Percentages.

THE STATE, AND COUNTIES.	VALUE		PERCENTAGES	
	Products	Property	Products	Property
THE STATE.	\$52,880,431	\$219,957,214	100.00	100.00
Barnstable,	1,053,915	4,246,169	1.99	1.93
Berkshire,	4,365,318	19,111,110	8.26	8.69
Bristol,	5,007,991	18,557,043	9.47	8.44
Dukes,	271,693	1,276,245	0.52	0.58
Essex,	4,776,865	22,244,721	9.03	10.11
Franklin,	3,858,359	10,897,594	7.30	4.95
Hampden,	3,780,042	14,124,579	7.15	6.42
Hampshire,	3,968,231	12,062,798	7.51	5.48
Middlesex,	9,174,999	42,071,200	17.33	19.13
Nantucket,	144,071	355,126	0.27	0.16
Norfolk,	2,857,517	13,006,280	5.41	5.91
Plymouth,	3,241,023	12,769,715	6.13	5.81
Suffolk,	733,191	9,541,880	1.39	4.34
Worcester,	9,647,216	39,692,754	18.24	18.05

Worcester County returned 18.24 per cent of the products and held 18.05 per cent of the agricultural property in the State. Middlesex gave 17.33 per cent of the products, and contained 19.13 per cent of the property. The other counties which returned more than five per cent of either the products or the property are the following, the percentages being as annexed: Berkshire, products, 8.26; property, 8.69; Bristol, products, 9.47; property, 8.44; Essex, products, 9.03; property, 10.11; Franklin, products, 7.30; property, 4.95; Hampden, products, 7.15; property, 6.42; Hampshire, products,

7.51; property, 5.48; Norfolk, products, 5.41; property, 5.91; and Plymouth, products, 6.13; property, 5.81. The counties of Barnstable, Dukes, Nantucket, and Suffolk do not return, individually, as much as five per cent of the products or property of the State.

In the following analysis table the aggregate values of products and property, as classified for the State, are brought forward, with percentages showing the relative rank of each class with respect to the aggregate.

Classified Products and Property. Value and Percentages.

PRODUCTS.	Value	Percentages
Animal products,	\$2,434,548	4.60
Clothing, needle work, etc.,	27,749	0.05
Dairy products,	16,234,049	30.70
Food products,	516,787	0.98
Greenhouse products,	1,749,070	3.31
Hothouse and hotbed products,	97,227	0.18
Liquors and beverages,	174,315	0.33
Nursery products,	182,906	0.35
Poultry products,	3,871,318	7.32
Wood products,	2,780,314	5.26
Wooden goods,	19,200	0.04
Other products,	632,142	1.19
Cereals,	1,104,578	2.09
Fruits, berries, and nuts,	2,850,585	5.39
Hay, straw, and fodder,	12,491,090	23.62
Meats and game,	1,098,471	2.08
Vegetables,	6,389,533	12.08
Products from mines, quarries, pits, etc.,	226,549	0.43
TOTALS,	\$52,880,431	100.00

PROPERTY.	Value	Percentages
Land,	\$110,271,859	50.13
Buildings,	77,920,357	35.43
Machines, implements, etc.,	8,128,031	3.70
Domestic animals, etc.,	14,854,417	6.75
Fruit trees and vines,	7,924,878	3.60
Mines, quarries, pits, etc.,	857,672	0.39
TOTALS,	\$219,957,214	100.00

The aggregate value of products being \$52,880,431, it will be seen that the value of dairy products amounts to \$16,234,049, or 30.70 per cent; and that hay, straw, and fodder comprise an aggregate value of \$12,491,090, or 23.62 per cent. More than one-half of the total agricultural products of the State are found within these two classes. The value of vegetables is \$6,389,533, or 12.08 per cent of the aggregate; poultry products, \$3,871,318, or 7.32 per cent; fruits, berries, and nuts, \$2,850,585, or 5.39 per cent; and wood products, \$2,780,314, or 5.26 per cent. The animal products aggregate \$2,434,548, or 4.60 per cent of the total, and meats and game, \$1,098,471, or 2.08 per cent. Greenhouse products aggregate \$1,749,070, or 3.31 per cent of the total, and

cereals, \$1,104,578, or 2.09 per cent. No other single class shows a product value amounting to as much as one per cent of the total, except miscellaneous articles classed under the head of "Other products," and not otherwise specified by name, of which the aggregate value returned was \$632,142, or 1.19 per cent of the total.

As to property, the aggregate being \$219,957,214, land constitutes \$110,271,859, or 50.13 per cent; buildings, \$77,920,357, or 35.43 per cent; machines, implements, etc., \$8,128,031, or 3.70 per cent; domestic animals, etc., \$14,854,417, or 6.75 per cent; fruit trees and vines, \$7,924,878, or 3.60 per cent; and the remainder, \$857,672, comprises the value of mines, quarries, pits, etc., amounting to thirty-nine one-hundredths of one per cent of the total. This last sum is the value of the mines, quarries, and pits, as such, exclusive of the value of the land upon which they are located, which is included in the value of "land" previously given.

The relation which products bear to property is shown by a series of percentages in a recapitulation on page 318. So far as the State at large is concerned, the agricultural products for the Census year amounted to 24.04 per cent of the total property value as it existed November 15, 1895. In the county of Nantucket, however, the products amounted to 40.57 per cent of the property value; in the county of Franklin, to 35.41 per cent; and in the county of Hampshire, to 32.90 per cent. In Bristol County the products amounted to 26.99 per cent of the value of the property; in Hampden, to 26.76 per cent; and in Plymouth, to 25.38 per cent. The percentage of products of property shown for the State at large is nearly matched in the following counties, in which the percentages annexed appear: Barnstable, 24.82; Worcester, 24.30; Berkshire, 22.84; Norfolk, 21.97; Middlesex, 21.81; Essex, 21.47; and Dukes, 21.29. In the county of Suffolk a very large property value appears in proportion to the value of products, the latter being only 7.68 per cent of the former. Of course, the values both of products and property have a somewhat wide range. Considerations of nearness to market, character of product, and whether it is intended for sale or for use, affect the product values returned in the cities and towns, and, of course, influence the aggregates for the counties. In the same way, the values of property are affected by its location. In cities, and in towns near cities, values range much higher than in the remote parts of the State, because the agricultural land may in many cases be readily transformed into building land, or has a relatively high value on account of its proximity to a market and the character of the product to which it is devoted.

In the main presentation it appears that 212 cities and towns show an increase since 1885 in the value of agricultural products, and 141 cities and towns show a decrease. The recapitulation on page 324 exhibits the number of towns showing increase or decrease, respectively, in each county, with the aggregate value for the county returned from such towns in 1885 and 1895, and the amounts of increase or decrease, with percentages.

For the State at large, the value of products returned in 1885 in the towns which show an increase since that date, was \$26,998,560, and the value of products returned in 1895 in the same towns was \$35,385,139, an increase of \$8,386,579, or 31.06 per cent. On the other hand, the aggregate product value returned in 1885 in the 141 towns showing a decrease, was \$20,757,473, declining to \$17,495,292 in 1895, a decrease of \$3,262,181, or 15.72 per cent. The net increase since 1885 is \$5,124,398, the net percentage of increase being 10.73. With regard to property, the value returned in 1885 in the 155 towns which show an increase since that date, was \$88,582,935, rising to \$122,283,482 in 1895, an increase of \$33,700,547, or 38.04 per cent. In the 198 towns which show a decrease since 1885, there was returned in that year an aggregate property value amounting to \$127,647,615, declining to \$97,673,732, a decline of \$29,973,883, or 23.48 per cent. The net increase since 1885 is \$3,726,664, the net percentage of increase being 1.72.

The recapitulation, pages 326-331, brings forward, for the State and for each of the counties, the aggregate value of each class of products, with comparisons between 1895 and 1885, with increase or decrease shown in amounts and percentages. This is followed by a similar recapitulation as to property.

We confine ourselves to the figures for the State. The value of animal products in 1885 was \$3,218,444, declining to \$2,434,548 in 1895, a decrease of 24.36 per cent. The value of clothing, needle work, etc., the same being products of domestic manufacture conducted on the farms, was \$84,141 in 1885, while the amount returned in 1895 was \$27,749, a decrease of 67.02 per cent. The value of food products declined from \$632,537 in 1885 to \$516,787 in 1895, a decrease of 18.30 per cent. The value of liquors and beverages of domestic manufacture upon farms declined from \$395,173 in 1885 to \$174,315 in 1895, a decrease of 55.89 per cent. Wood products declined from \$2,921,574 in 1885 to \$2,780,314 in 1895, or 4.93 per cent; and wooden goods produced on farms, from \$33,948 to \$19,200, or 43.44 per cent. The cereal products in 1885 aggregated \$1,855,145, declining to \$1,104,578 in 1895, a decline of 40.46 per cent. The only other class which shows a decline in values is meats and game, in which the product value dropped from \$2,252,748 in 1885 to \$1,098,471 in 1895, a decline of 51.24 per cent, partly due, no doubt, to the transfer of the butchering industry from the farms to abattoirs. On the other hand, dairy products rose from \$13,080,526 to \$16,234,049, an increase of 24.11 per cent; greenhouse products from \$688,813 to \$1,749,070, or 153.93 per cent; hot-house and hotbed products from \$73,983 to \$97,227, or 31.42 per cent; nursery products from \$138,439 to \$182,906, or 32.12 per cent; poultry products from \$2,227,799 to \$3,871,318, or 73.77 per cent; and other products (not otherwise specified), from \$609,989 to \$632,142, or 3.63 per cent. The value of fruits, berries, and nuts produced rose from \$2,680,804 to \$2,850,585, or 6.33 per cent; hay, straw, and fodder from \$11,631,776 to \$12,491,090, or 7.39 per cent; and vegetables from \$5,227,194 to \$6,389,533, or 22.24 per cent. These comparative figures show clearly the present course of agriculture in Massachusetts and its character. The total products, of all kinds, rose from \$47,756,033 to \$52,880,431, or 10.73 per cent.

The reader will, of course, not forget that the comparisons turn upon values and not upon quantities. The decrease noted in certain classes of product may have been caused, or at least affected, by a decline in prices since 1885. Again, 1885 may have been an exceptionally fertile year as to certain crops, when compared with 1895, and therefore a decline in the last named year may be exceptional. This phase of the subject will be more fully considered in connection with the subsequent Census presentation of leading products by name, and is referred to here in order that such qualifying circumstances are ought to be taken into account may not be overlooked.

With respect to property, the value of land declined slightly, that is, from \$110,700,707 to \$110,271,859, or 0.39 per cent; and on the other hand the value of buildings rose from \$74,418,218 to \$77,920,357, or 4.71 per cent. The value of machines, implements, etc., also rose from \$7,397,990 to \$8,128,031, an increase of 9.87 per cent; but the value of domestic animals, etc., declined from \$17,055,153 to \$14,854,417, a loss of 12.90 per cent. The value of fruit trees and vines returned in 1885 was \$6,658,482, and in 1895, \$7,924,878, a gain of 19.02 per cent. The total property value returned in 1895 was \$219,957,214 as against \$216,230,550 in 1885, a gain of 1.72 per cent.

Similar comparisons for each of the counties may, of course, be made from the tables. Nearly every county shows a decline in the value of animal products returned, the only exception being the county of Suffolk; and every county except the counties of Berkshire and Nantucket shows a decline in the value of clothing and needle work produced. On the other hand, in dairy products every county except the county of Suffolk shows an increase. In food products, the counties of Dukes, Hampshire, Nantucket, and Suffolk show increases and all others decreases. Every county shows an increase in greenhouse products, and every county except Berkshire, Hampden, and Suffolk, an increase in hothouse and hotbed products. Every county except Suffolk shows a decrease in the value of liquors and beverages of domestic manufacture. In the value of nursery products returned, the counties of Bristol, Essex, Hampden, Middlesex, Norfolk, and Plymouth show increases, and the counties of Barnstable, Berkshire, Dukes, Franklin, Hampshire, Suffolk, and Worcester, decreases, no nursery product being reported in the county of Nantucket, either in 1885 or 1895. All the counties show an increase in

poultry products, and all except Bristol, Franklin, and Worcester, a decrease in wood products. Every county shows a decline in the value of wooden goods produced as articles of domestic manufacture on farms, except Barnstable and Plymouth. In the cereals, all the counties show a decline except Nantucket. In fruits, berries, and nuts, Barnstable, Bristol, Dukes, Hampden, Nantucket, and Plymouth show increases, and the other counties decreases. On the other hand, in hay, straw, and fodder, the counties of Berkshire and Suffolk show decreases, and all the other counties increases. In the value of meats and game returned from farms, all the counties show decreases except Nantucket, Norfolk, and Suffolk; and in vegetables all show increases except Hampshire, Norfolk, and Suffolk. In the total products all the counties show a gain except Berkshire and Franklin, the decline in Berkshire County amounting to 0.79 per cent, and in Franklin to 2.07 per cent. The value of land shows a decline in the counties of Berkshire, Franklin, Hampden, Hampshire, Middlesex, and Norfolk, and an increase in Barnstable, Bristol, Dukes, Essex, Nantucket, Plymouth, Suffolk, and Worcester counties. An increase in the value of buildings is shown in all the counties except Berkshire, Franklin, Hampshire, and Norfolk; and the value of machines, implements, etc., has increased in all the counties except Berkshire, Franklin, Hampden, and Norfolk. The value of domestic animals shows a decline in every county except Barnstable, Bristol, and Nantucket; and the value of fruit trees and vines an increase in every county except Barnstable, Bristol, Dukes, Franklin, Norfolk, and Worcester.

The following table shows the comparative rank for agriculture and population for each of the cities and towns in the State.

Relative Rank of Cities and Towns as Regards Population and Value of Agricultural Products.

CITIES AND TOWNS.	Counties	Total Population	AGRICULTURAL PRODUCTS		RELATIVE RANK

The final section of the presentation, on pages 334-343, shows the value of agricultural realty, that is, property exclusive of machines, implements, etc., and domestic animals, etc., as derived from the Census returns, compared with the value of real estate as assessed for purposes of taxation, with a recapitulation, pages 344-345, showing the increases or decreases in percentages for the State, by counties. We summarize briefly

the percentages from the recapitulation. For the State at large, agricultural realty shows an increase in the aggregate of 2.71 per cent since 1885, and the value of real estate in the Commonwealth, as assessed for purposes of taxation, an increase of 52.55 per cent. The highest percentage of increase in valuation is found in the county of Norfolk, in which the figures have risen from \$65,612,189 to \$123,495,900, a gain of 88.22 per cent. In this county, however, there has been a decline of 15.42 per cent in the value of agricultural realty. So far as relates to the increase in the value of assessed real estate, the county of Middlesex ranks next to Norfolk, with a gain of 60.89 per cent; and in this county there has been a fractional percentage of decrease, namely, 0.24, in the value of agricultural realty. The other counties which show a decrease in the value of agricultural realty are: Berkshire, the decline amounting to 2.84 per cent, as against a rise of 39.93 per cent in the total assessed value of real estate; Franklin, the decline in agricultural realty being 20.88, and the rise in assessed valuation of real estate 32.14 per cent; Hampden, in which agricultural realty has declined 3.35 per cent, and the assessed valuation of all real estate risen 56.79 per cent; and Hampshire, which shows a decline in agricultural realty of 12.80, and a rise in assessed valuation of real estate of 24.07 per cent. The counties which show gain in the value of agricultural realty are the following, the percentage of gain, and also the percentage of gain in assessed valuation of all real estate being in each case annexed: Barnstable, gain in agricultural realty 24.42 per cent, in assessed valuation 38.20; Bristol, in agricultural realty 33.89, in assessed valuation 51.32; Dukes, in agricultural realty 29.34, in assessed valuation 30.44; Essex, in agricultural realty 7.76, in assessed valuation 44.72; Nantucket, in agricultural realty 41.62, in assessed valuation 43.35; Plymouth, in agricultural realty 11.16, in assessed valuation 45.91; Suffolk, in agricultural realty 64.58, in assessed valuation 50.11; and Worcester, in agricultural realty 2.14, in assessed valuation 47.51.

In the analysis of the Census of 1885, it was mentioned that the total value of cereals was at that time less than that of either animal products; dairy products; poultry products; wood products; fruits, berries, and nuts; hay, straw, and fodder; meats and game; or vegetables; and this is found to be true in 1895, except that the product of meats and game drops slightly below that of cereals. These figures, as was pointed out in 1885, show the great changes in the character of farm work in Massachusetts. The dairy products which in value, as we have seen, comprise 30.70 per cent, nearly one-third, of all the products, have risen from \$7,901,663 in gold in 1875 to \$16,234,049 in 1895. More extended reference to the different products will be made in a subsequent part of the Census volume, relating to agricultural products by name.

The value of agricultural property may be considered as the capital invested by the farmer, and the value of products, as previously pointed out, amounts to 24.04 per cent of this capital. Out of this gross percentage must be paid all the expenses of production of whatever nature, leaving as the farmer's net profit whatever balance remains. The gross percentage in 1885 was 22.09, showing a slight increase during the decade. It is not possible in this analysis to refer to the different cities and towns in detail, but a careful study of the returns will well repay the reader.

In the presentation by towns, as will appear from what has been said, the various details contained upon the original schedules have been condensed in the classification that has been explained. This condensation was required partly in order to bring this volume within practicable limits, and partly to reduce the cost of printing. The Department is prepared, however, to furnish a statement of the details of the various items under the classified titles, for any city or town in the State, if any local interest requires it; and in order to show just what such a statement would cover we present the following, relating to the town of Dartmouth, County of Bristol. This town, as will be seen from the table, page 356, ranks first as to value of agricultural products among the cities and towns of the State.

TOWN OF DARTMOUTH.

It will be seen from the original presentation, page 219, that in Dartmouth the leading classes of products are: Dairy products, \$172,661; hay, straw, and fodder, \$170,602; vegetables, \$102,612; poultry products, \$72,433; wood products, \$69,493; and animal products, \$52,165. The statement for the entire town now presented in detail shows the items that make up these different class aggregates, as well as the aggregates of the other classes shown in the original presentation. It shows, for example, that of the dairy products milk is the largest item, the quantity produced being: for sale, 894,889 gallons, value, \$151,408; for use, 114,733 gallons, value, \$18,715. Under hay, straw, and fodder, the details show 6,271 tons of English hay, value, \$122,752, this being the largest single item. Under vegetables, the details include 260,743 heads of cabbage, value \$12,752; 16,303 bushels of green corn, value \$9,106; 58,668 bushels of potatoes, value \$29,322; 346,104 pounds of squashes, value \$7,840; 22,201 bushels of table turnips, value \$7,950; and various other minor items. Under poultry products, eggs formed the leading item, the production including 206,887 dozen (sold), value \$41,553; and 47,425 dozen (used), value \$9,467. The dressed chickens sold aggregate 27,461 pounds, value \$4,268; and chickens used, 16,628 pounds, value \$2,531. Under wood products, fire wood, for sale, aggregated 10,255 cords, value \$29,209; and fire wood used, 3,699 cords, value \$10,890.

We have touched upon a few of the leading items shown in this detailed statement for the purpose of indicating the character of the information supplied by it. It would require about 700 printed pages to present this complete detail for every city and town. Ordinarily, and for general purposes, the classified returns for the various cities and towns, contained in the presentation in this volume, pages 205-345, will be found sufficiently full, and, so far as relates to the State and counties, that is, covering details relating to quantities and values in the aggregate for the Commonwealth as a whole, full information will be presented in a subsequent section of the Agricultural Census, giving products and property by name.

AGRICULTURAL PRODUCTS:

BY NAME.

AGRICULTURAL PRODUCTS: BY NAME.

The column headed "Returns Reporting Specified Product," on page 375, means the number of producers, or the number of persons raising the product specified in each city and town mentioned. For instance, in the town of Barnstable there were, in 1895, 28 persons who had a product of 56 calf skins, hides, and pelts valued at \$65. This method of reading the table is applicable to all presentations under the general heading Agricultural Products: By Name.

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS RELATING TO AGRICULTURAL PRODUCTS, BY NAME:

	Pages
ANIMAL PRODUCTS,	373-381
DAIRY PRODUCTS,	383-403
POULTRY PRODUCTS,	405-414
OTHER PRODUCTS,	415-417

We have previously presented, pages 205-367, the statistics of Agriculture by towns. By means of these statistics the reader may obtain a consolidated statement of the condition of agriculture in each of the cities and towns of the Commonwealth.

The statistical presentation which begins on page 369 relates to agricultural products by name, this presentation enabling the reader to obtain a statistical view of each of the principal classes of products, with the details of the leading items which are included under the respective class heads. The information is presented for each of the cities and towns, with aggregates for the counties and appropriate recapitulations. Attention is called to the explanatory statement on page 371.

ANIMAL PRODUCTS.

The statistics relating to animal products may be found upon pages 373-381, the final recapitulation appearing on the last named page. The total value of animal products returned in the agricultural statistics of the Commonwealth for the Census year being \$2,434,548, it will be seen from this recapitulation that this aggregate includes the following items: Calf skins, hides, and pelts, \$24,146; manure, \$2,370,236; wool, \$24,671; and other animal products, \$15,495. The value of manure forms 97.36 per cent of the entire value of animal products, wool forming 1.01 per cent, calf skins, hides, and pelts, 0.99 per cent, and other animal products 0.64 per cent.

We have already shown, by comparative figures on page 326, *ante*, the increase or decrease by counties and for the State in the aggregate value of animal products returned in 1895 as compared with 1885, the percentage of decrease for the State being 24.36.

Calf Skins, Hides, and Pelts.

The details relating to calf skins, hides, and pelts, by counties, cities, and towns, appear on pages 375-377. From the recapitulation, page 377, we find that this product is shown in 5,451 returns out of 65,287, the total number. The total number returned is 25,931, the average price being \$0.93, and the average value of product for each person making return \$4.43. The leading counties from which this product is returned, with the aggregate product value returned in each, are the following: Worcester, \$8,691; Berkshire, \$4,535; Hampden, \$2,933; Hampshire, \$2,159; and Franklin, \$1,970. In no other county is a product value exceeding \$1,000 found.

Manure.

The details as to manure, by counties, cities, and towns, will be found on pages 377-379, the recapitulation on the last named page showing that this product is reported on

37,255 returns out of 65,287. The total number of cords returned for the State is 592,406, the average price per cord being \$4.00, and the average value of product for each person making return \$63.62. The county leading in number of cords is Worcester, which reports an aggregate of 135,609, the county ranking next being Middlesex, in which 92,003 cords were reported. The average value of product for each person making return is highest in Suffolk County, however, namely, \$142.82; the county ranking next in this respect being Middlesex, in which the average is \$85.07.

Wool.

The details relating to wool, by counties, cities, and towns, appear on pages 380-381. The recapitulation on page 381 shows that this product is reported in 1,348 returns out of 65,287. The aggregate number of pounds reported is 188,470; the aggregate value being \$24,671, the average price per pound \$0.13, and the average value of product for each person making return \$18.30. The leading county in number of pounds reported is Franklin, the aggregate being 56,333; Berkshire ranking next with 55,494, and Dukes next with 26,380. No product whatever of this kind is reported from Suffolk County. The county which ranks highest in average value of product for each person making return is Dukes, the average being \$49.78. Nantucket ranks next, with \$37.40, while in the county of Franklin, which has the largest aggregate product in pounds, the average value of product for each person making return is but \$17.61.

Comparisons with Previous Censuses.

For purposes of comparison we may say that the aggregate value of manure reported in 1875 was \$2,072,654 gold, the average value per cord being \$4.91 gold. In 1885 the aggregate value was \$3,090,189, and the average value per cord \$4.80. The aggregate quantity and value of wool produced reported in previous censuses, beginning with 1845, is as follows, currency values in all cases being reduced to gold: 1845, 1,016,230 pounds, value \$365,136; 1855, 416,156 pounds, value \$155,046; 1865, 610,255 pounds, value \$296,268; 1875, 206,935 pounds, value \$75,503; 1885, 257,545 pounds, value \$61,432.

DAIRY PRODUCTS.

The statistics relating to dairy products are contained on pages 383-403. From the recapitulation, page 403, it will be seen that the aggregate value is \$16,234,049; composed of butter, \$1,506,638, including butter for sale, \$1,042,336, and butter for use by the person reporting the product, \$464,302; cheese, \$11,661, including cheese for sale, \$10,505, and cheese for use, \$1,156; cream, \$1,011,604, including cream for sale, \$939,750, and cream for use, \$71,854; milk, \$13,704,146, including milk for sale, \$9,372,072, and milk for use, \$4,332,074. Of the total value of dairy products, butter forms 9.28 per cent; cheese, 0.07 per cent; cream, 6.23 per cent; and milk, 84.42 per cent. Butter sold by the person making return forms 6.42 per cent of the entire dairy product, and butter used, 2.86 per cent; cheese sold, 0.06 per cent, and cheese used, 0.01 per cent; cream sold, 5.79 per cent, and cream used, 0.44 per cent; milk sold, 57.73 per cent, and milk used, 26.69 per cent.

A comparison of the increase or decrease in dairy products, by counties and for the State, in 1895 as compared with 1885, will be found on page 326, *ante*, the aggregate increase as there shown being 24.11 per cent.

Butter.

The details relating to butter, by counties, cities, and towns, will be found on pages 385-390. From the recapitulation, page 390, we find that out of 65,287, the total number of returns, 15,844 report butter produced either for sale or use, the aggregate number of pounds being 6,063,343, the aggregate value \$1,506,638, the average price per pound \$0.25, and the average value of product for each person making return \$95.09. In the production of butter the leading county as to quantity is Berkshire, the aggregate number of pounds being 1,347,286, the aggregate value \$323,628, and the average value of product for each person making return \$130.02. The other leading counties, with

aggregate product in pounds, value, and average value for each person making return, are the following: Worcester, 1,250,686 pounds, value \$328,843, average value for each person making return \$99.35; Franklin, 1,011,104 pounds, value \$232,571, average value for each person making return \$118.48; Hampden, 814,689 pounds, value \$199,287, average value for each person making return \$117.78. Hampshire, 731,812 pounds, value \$174,679, average value for each person making return \$98.13. Although the aggregate number of pounds returned from the county of Nantucket is but 21,680, and the aggregate value \$6,552, the average value of product for each person making return is \$112.97, the county ranking fifth in the State in this respect.

Of the total number of returns, 9,132 report butter produced for sale, the aggregate number of pounds sold being 4,172,054, the aggregate value \$1,042,336, the average price per pound \$0.25, and the average value of product for each person making return \$114.14. On the other hand, 15,591 returns report butter produced for use by the person making return, the aggregate number of pounds used being 1,891,289, the aggregate value \$464,302, the average price per pound \$0.25, and the average value of product used for each person making return \$29.78.

The leading counties with respect to butter sold, rank in the same order as with respect to butter produced, previously referred to.

Cheese.

The details relating to cheese, by counties, cities, and towns, appear on pages 390-392. From the recapitulation on page 392, we find that the production of cheese, either for sale or for use, is reported on but 137 returns out of 65,287, the total number: the aggregate number of pounds being 153,464, the aggregate value \$11,661, the average price per pound \$0.08, and the average value of product for each person making return \$85.12. By far the largest quantity of cheese is produced in Berkshire County, the aggregate being 121,825 pounds, value \$7,830, and the average value of product for each person making return in the county \$156.60. Cheese produced for sale is reported in 80 returns, the aggregate number of pounds sold being 143,403, value \$10,505, average price per pound \$0.07, and average value of product for each person making return \$131.31. The production of cheese for use appears on 92 returns, the aggregate number of pounds being 10,061, value \$1,156, average price per pound \$0.11, and average value of product for each person making return \$12.57.

Cream.

The details relating to cream, by counties, cities, and towns, will be found on pages 393-397. In the final recapitulation, page 397, it is shown that this product is reported upon 5,055 returns out of 65,287, the aggregate number of gallons being 2,205,775, value \$1,011,604, average price per gallon \$0.46, and average value of product for each person making return \$200.12. The leading county in quantity returned is Franklin, which reports 677,591 gallons, the aggregate value being \$266,099, and the average value of product for each person making return \$263.20. Other leading counties are: Hampshire, 673,819 gallons, value \$286,111, average value for each person making return \$321.11; Berkshire, 425,423 gallons, value \$198,425, average value for each person making return \$129.27; Worcester, 185,563 gallons, value \$98,193, average value for each person making return \$138.89; and Hampden, 123,908 gallons, value \$64,593, and average value for each person making return \$146.14.

The other recapitulations show that 2,885 returns report cream produced for sale, the aggregate number of gallons being 2,112,309, aggregate value \$939,750, average price per gallon \$0.44, and average value of product for each person making return \$325.74. On the other hand, 2,816 returns report cream produced for use,* the aggregate number of gallons being 93,466, aggregate value \$71,854, average price per gallon \$0.77, and average value of product for each person making return \$25.52.

* Exclusive of cream used in the production of butter.

Milk.

The details relating to milk, by counties, cities, and towns, are shown on pages 397-403. The final recapitulation, page 403, shows that milk produced, either for sale or for use, appears on 32,072 returns out of 65,287, the aggregate number of gallons reported being 92,786,817, the aggregate value \$13,704,146, the average price per gallon \$0.15, and the average value of product for each person making return \$427.29. In this product Worcester County leads, the aggregate number of gallons produced being 21,405,037, aggregate value \$2,892,235, and average value for each person making return \$429.37. Next to Worcester County ranks Middlesex, the aggregate number of gallons reported being 16,222,639, value \$2,394,143, and average value for each person making return \$555.87. The other leading counties rank in the following order: Essex, 8,877,031 gallons, value \$1,450,601, average value for each person making return \$599.92; Berkshire, 8,282,039 gallons, value \$1,001,112, average value for each person making return \$330.18; Hampshire, 7,342,163 gallons, value \$984,964, average value for each person making return \$362.39; Franklin, 7,146,391 gallons, value \$813,471, average value for each person making return \$292.83; Bristol, 6,814,251 gallons, value \$1,265,299, average value for each person making return \$465.53; Hampden, 6,237,725 gallons, value \$851,067, average value for each person making return \$339.48; Norfolk, 5,388,308 gallons, value \$964,077, average value for each person making return \$575.57; and Plymouth, 3,312,097 gallons, value \$683,124, average value for each person making return \$360.68.

The number of returns upon which milk is reported for sale is 16,983, the aggregate number of gallons sold being 59,593,316, value \$9,372,072, average price per gallon \$0.16, and average value of product for each person making return \$551.85. Milk produced for use is reported on 31,897 returns, the aggregate number of gallons used being 33,193,501, value \$4,332,074, average price per gallon \$0.13, and average value of product for each person making return \$135.81.

For the purpose of comparing returns relating to dairy products, we introduce a table showing statistics obtained in each Census of Agriculture, beginning with 1845. The values for 1865 and 1875, originally presented in currency figures, have been reduced to a gold basis in order to remove from the comparisons the fluctuations due to the fact that gold was at a premium in those years.

DAIRY PRODUCTS FOR 1845, 1855, 1865, 1875, 1885, AND 1895.

PRODUCTS.		1845	1855	1865	1875	1885	1895

The figures contained in the foregoing table are no doubt affected by differences in the manner in which the Census was taken in the different years, and the comparisons are to be regarded as representing approximations of the actual facts rather than as absolutely correct. Prior to the year 1885 the enumerations were more or less inexact

and incomplete. The decline in the quantity of butter and cheese produced is largely due to the transfer of the butter and cheese industry from the farms to creameries engaged in the business of producing dairy products as a branch of manufactures.

Duplications of Value in the Dairy Returns.

The inherent difficulties in the collection of returns relating to the dairy products of the Commonwealth are very great, and have been mentioned in previous census reports. It is practically impossible to avoid certain duplications of value. If every farmer kept an exact account of the disposition of the milk produced, that is to say, how much was skimmed for cream, how much sold unskimmed, how much fed to stock, how much cream sold to creameries or used in co-operative creameries, how much used in butter making and otherwise by the family, etc., it would be easy to transcribe such accounts in detail. This, however, is not the case.

It is therefore proper to say that the returns, although taken with all possible care, are subject to certain qualifications if it is desired to eliminate the duplications of value. In the first place, the milk product has been obtained without regard to the subsequent use that was made of it, and may be considered accurate when taken by itself. The returns as to cream are also accurate when considered alone, but the value of the cream is also included in the value of the milk. The "cream used" means cream consumed by the family as cream, that is, it does not include cream turned into butter. The value of the butter, complete by itself, includes the value of the cream entering into its composition, a value which is also included in the value of the milk.

The aggregate number of pounds of butter returned is 6,063,343. According to the estimate of the National Association of Agricultural Colleges, the pounds of commercial butter in a given amount of cream, allowing for mechanical losses, etc., exceeds by one-sixth the pounds of butter fat in the cream. Therefore, on this basis, the pounds of butter fat in the amount of butter returned would be 5,197,002. Cream varies widely as to the amount of butter fat contained in it, the quantity ranging from 15 to 45 per cent, or even higher. The average percentage of butter fat in cream produced by the gravity process like that in use on the majority of the farms in Massachusetts, may, for the purpose of estimate, be placed at 20. To obtain 5,197,002 pounds of butter fat at this rate would require 25,985,010 pounds of cream, or, at 8.20 pounds per gallon, an aggregate of 3,168,904 gallons.

The value of cream sold, as shown by the recapitulation on page 396, is upon the average, for the State as a whole, 44 cents per gallon, but the range of prices upon which this average is based is quite wide, the county averages running from \$1.60 in Barnstable to 39 cents in Franklin. The value depends not only on the quality of the cream, which as we have said varies widely, but also on the market. If sold for family consumption, or to the hotel trade, or in general in such a market as is open to the producer who can sell his product at first hands in every large town or city, the price obtained will be much higher than if sold to a creamery to be turned into butter. Returns from the creameries or firms engaged in the factory production of butter,* indicate an average value upon the cream consumed, of about 39 cents per gallon, and this is the average shown from the farms in the county of Franklin, which may be taken as fairly representing a market restricted to cream sold for the production of butter. Using this unit of value as a basis, the estimated value of the cream which entered into the butter returned, namely, 3,168,904 gallons, becomes \$1,235,873, and this may stand as an estimate of a duplication of the value appearing in the returns relating to milk.

The duplications of value due to the manipulation and transformation of product in the various farm processes are not confined to the dairy products. They are only more manifest there on account of the simplicity of the operations. Of course, the value of hay consumed by the stock is in reality transformed into the value of animal products and milk, and in the latter case, appears finally in the value of the butter. The value of

* Taken as a branch of manufacturing in that division of the Census.

cereals consumed by the poultry is represented in the value of the poultry products, and the same effect may be traced in various other directions. It is plainly impossible to eliminate all such duplications, and if it could be done, the results would be in many cases misleading and even absurd. For example, the value of the hay produced on the farms of the Commonwealth is represented by a certain figure. It is conceivable that all this hay might also be consumed on the farms; at least, a large proportion is so consumed and its value appears in other farm product values. If for that reason the value of the hay were eliminated, we should, as a result, have no hay product represented in the returns. In other words, it would appear that Massachusetts produced no hay.

In fact, each manipulative process, on the farm as in the factory, results in a new product into which a previous product has entered, just as raw stock, or stock which is itself a product of manufacture, is consumed in turning out a product of an entirely different kind in a factory. The final result on the farm or in the factory does not represent wholly new value, and the returns respecting it should not be so understood. But each step in the manipulative processes results in a new product when considered by itself, and each process introduces new labor, and represents what may be termed a new "turn-over."

To return to the subject of dairy products. From a certain standpoint it seems inconsistent to duplicate in other forms the value of cream already once included in the value of the milk when the various operations are conducted on the same farm. When the same operations involve two different farms, however, the case is not quite so clear. For example, suppose A produces a certain amount of milk. Its value, of course, is properly returned by him as part of the product of his farm. All of this milk is sold to B, who with milk of his own and that received from others, turns out a certain amount of butter. Manifestly, this butter product is returned by B; but, intrinsically, the operation is the same as if performed throughout under a single managerial head. In the returns from manufacturers a separate return is made of stock used, and the actual value created in manufactures can be approximately obtained by deducting from the aggregate output the aggregate value of stock and materials consumed. If a similar return were made by each farmer of the articles consumed in the various agricultural processes, the net value created could be similarly ascertained. For example, in the cases cited, the value of cream consumed in making butter is really a value of "stock used." Few farmers, however, keep accurate accounts upon this head, and the collection of such data has never been attempted.

So far as the dairy products are concerned, the duplications may be ascertained by estimate, such as we have made. The value of cream entering into the butter we have estimated at \$1,235,873. The value of cream sold, and used otherwise than in butter, is shown by the recapitulation on page 397 to be \$1,011,604; or an aggregate for all cream produced of \$2,247,477. This value appears also in the aggregate value of milk produced, namely, \$13,704,146, and if deducted, leaves the value of milk exclusive of cream \$11,456,669, and reduces the aggregate of all dairy products from \$16,234,049 to \$13,986,572.

In this computation we have disregarded the duplications of value in the returns relating to cheese, inasmuch as the quantity of cheese produced is insignificant when compared with the grand total, and the reduction of values due to duplications in this product would have little effect upon the aggregates.

If any reader wishes to reduce the value of dairy products reported for any particular city, town, or county by eliminating the estimated duplication, as we have done for the State, he may easily do so by deducting the aggregate value of cream reported from the aggregate value of milk reported; and by deducting a further sum representing the estimated value of the cream used in butter, upon a basis of 82 per cent of the aggregate value of the butter returned. This estimated percentage, while fairly applicable as an average for the entire State, is, however, unquestionably too high when applied to certain cities and towns, and should only be considered an approximate percentage.

Dairy Products Reported as a Branch of Manufactures.

Besides the dairy products returned from the farms, the statistics of manufactures include a considerable product returned from co-operative creameries, private firms, etc., engaged in the factory production of butter, cheese, etc. For the Census year the output of this kind included in the aggregate: butter, \$1,048,664; cheese, \$6,809; other dairy products, \$32,430; total, \$1,087,903. If these values be added to those returned from the farms, the aggregate value of dairy products, both farm and factory, for the Census year 1895, disregarding duplications of value, will be: butter, \$2,555,302; cheese, \$18,470; cream, \$1,011,604; milk, \$13,704,146; other products, \$32,430; total, \$17,321,952.

We have previously shown a possible duplication of value in the foregoing amounting to the estimated sum of \$2,247,477. If it be assumed that all the cream used in the factory production of butter was produced upon the farms of the State, and duplicated in the value of milk reported, and the value of this cream is estimated in the manner previously explained, we shall have a further duplication of \$905,703, part of which appears in the value of cream sold from the farms and part in the value of milk sold. We have already, in considering the effect of duplications, subjected the milk values to a deduction of the entire value of cream sold. How much of this \$905,703 should also be taken from the milk, it is impossible to determine. Indeed, it is not probable that all the cream used in the factories was of Massachusetts production.

POULTRY PRODUCTS.

The details relating to poultry products, by counties, cities, and towns, are presented on pages 405-414. The recapitulation on page 414 shows that the total value of such products is \$3,871,318, including eggs, \$2,731,271, or 70.55 per cent of the aggregate; fancy eggs, \$31,494 or 0.81 per cent; game eggs, \$3,056, or 0.08 per cent; dressed poultry, \$631,796, or 16.32 per cent; and other poultry products, \$473,701, or 12.24 per cent.

The table presented on page 328, *ante*, shows the increase in values and percentages in 1895 as compared with 1885, in each of the counties and for the State, the aggregate percentage of increase being 73.77.

Eggs.

The details relating to eggs, by counties, cities, and towns, are contained upon pages 407-409. This product is reported in 33,908 returns out of 65,287. The aggregate quantity of eggs reported is 12,168,918 dozen, aggregating in value \$2,731,271, the average price per dozen being \$0.22, and the average value of product for each person making return \$80.55. The counties which lead are: Bristol, 2,211,400 dozen, value \$535,435, average value for each person making return \$154.84; Worcester, in which 2,196,824 dozen are returned, the aggregate value being \$483,778, and the average value for each person making return \$68.35; Middlesex, 1,793,650 dozen, value \$423,745, average value for each person making return \$95.46; Essex, 1,292,510 dozen, value \$288,070, average value for each person making return \$125.63. The difference in the aggregate quantity returned in these counties and in the county which ranks next is quite wide, the next in order being Plymouth, in which 777,775 dozen are returned, the aggregate value being \$173,801, and the average value for each person making return \$82.45. The aggregate values of eggs returned in previous censuses are as follows: 1845, \$25,891; 1855, \$52,688; 1865, \$237,524; 1875, \$806,569; 1885, \$1,615,582. The currency values originally reported in 1865 and 1875, have, in this comparison, been reduced to gold. The discrimination as to fancy and game eggs, made in the present census, does not appear in this comparison, and the figures for 1895 should be increased by the value of each of these items, bringing the aggregate for that year to \$2,765,821.

Fancy Eggs.

On pages 410-411 may be found the details relating to fancy eggs, this product appearing in 221 returns, the aggregate quantity being 45,233 dozen, aggregate value \$31,494, average price per dozen \$0.70, and average value of product for each person making return \$142.51.

Game Eggs.

The details relating to game eggs may be found on page 411. The returns specifying this product number 25, the aggregate quantity returned being 4,281 dozen, aggregate value \$3,056, average price per dozen \$0.71, and average value of product for each person making return \$122.24.

Dressed Poultry.

The details relating to dressed poultry are contained on pages 412-414. The recapitulation on page 414 shows that the number of returns reporting this product is 26,670, the aggregate number of pounds of dressed poultry being 3,809,152, aggregate value \$631,796, average price per pound \$0.17, and average value of product for each person making return \$23.69. Worcester County leads, reporting in the aggregate 728,206 pounds, value \$122,072, average value for each person making return \$21.09. Bristol County ranks next, with an aggregate of 627,372 pounds, the aggregate value being \$103,113, and average value for each person making return \$35.51. Middlesex ranks third, with 496,035 pounds, aggregate value \$81,639, and average value for each person making return \$27.70. The other counties are separated by a comparatively wide range from the three just named, the county which ranks fourth being Essex, which reports 366,108 pounds, followed by Berkshire, with 304,705 pounds.

The value of poultry reported in previous censuses is as follows: 1845, \$25,891; 1855, \$52,688; 1865, \$138,848; 1875, \$235,174; 1885, \$431,582. As in previous comparisons the currency values reported in 1865 and 1875 have been reduced to gold. The number of pounds reported in 1875 was 1,206,098, and in 1885, 2,498,750; the average value per pound in 1875 being \$0.19 and in 1885, \$0.17.

OTHER PRODUCTS.

The returns classified as other products are contained on pages 415-417. The term "Other Products" is used in an arbitrary sense, and is not to be understood as including all other products than those previously named in this section of the report. The note upon page 348, *ante*, exhibits a classification of the different products under this head, but the returns are practically restricted to tobacco, which is shown by the recapitulation on page 417, aggregating in value \$544,968, or 86.21 per cent of all the products included under this sub-head, the total value being \$632,142. The increase or decrease in the products thus classified, in 1895 as compared with 1885, is shown on page 328, *ante*, the increase amounting to 3.63 per cent for the State.

Tobacco.

The details relating to tobacco show that this product was included in 863 returns, confined to the counties of Berkshire, Franklin, Hampden, and Hampshire; the aggregate number of pounds reported being 4,967,096, aggregate value \$544,968, average price per pound \$0.11, and average value of product for each person making return \$627.84. Hampshire County leads, the aggregate number of pounds reported therefrom being 2,615,765, value \$265,029, average value of product for each person making return \$664.23. The other counties rank in the following order: Franklin, 1,329,421 pounds, value \$143,583, average value for each person making return \$613.60; Hampden, 987,379 pounds, value \$133,694, average value for each person making return \$610.47; Berkshire, 34,531 pounds, value \$2,662, average value for each person making return \$166.38.

The quantities and values of tobacco returned in previous censuses are as follows: 1845, 265,560 pounds; value, \$16,686; average per pound, \$0.06. 1855, quantity not reported; value, \$57,474. 1865, 9,306,067 pounds; value, \$1,004,522; average per pound, \$0.11. 1875, 5,993,666 pounds; value, \$921,663; average per pound, \$0.15. 1885, 4,210,903 pounds; value, \$474,929; average per pound, \$0.11. Currency values reported in 1865 and 1875, are, in this comparison, expressed in gold.

[In this recapitulation the same agricultural products are considered as in the one preceding, the articles being also arranged alphabetically. Values and percentages only are included in this recapitulation, but the value of the total products for the Commonwealth is considered. The value of the agricultural products presented by name, pages 369-522, *ante*, is \$31,192,337, the total value of agricultural products being \$52,880,431. This leaves a value of \$21,688,094 which appears opposite the line "All Other Products." This value represents 41.01 per cent of the total value of agricultural products. In other words, 58.99 per cent of the total value of agricultural products is shown in detail by cities and towns.]

* Less than one one-hundredth of one per cent.

[In the head note to the preceding recapitulation it is shown that a value of \$21,688,094, being 41.01 per cent of the total value of all agricultural products, was not presented in detail for each city and town in which said products were raised or produced. For all practical purposes, however, the presentation by towns, pages 203-368, *ante*, supplies sufficient specification by name, and for cities and towns, as regards the following classes of agricultural products: Clothing, Needle Work, Etc., Greenhouse Products, Wood Products, and Hay, Straw, and Fodder. It will be seen, therefore, that adequate presentation in detail by name for cities and towns has been given for a value of \$48,240,560, or 91.23 per cent of the total value of all agricultural products for the Census year 1895. The value of products, as shown below, not given in detail, is \$4,639,871, or 8.77 per cent.]

RECAPITULATION: FOR THE STATE. CLASSIFIED AGGREGATES WITH
VALUES AND PERCENTAGES.

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS RELATING TO AGRICULTURAL PRODUCTS, BY NAME:

	Pages
CEREAL PRODUCTS	427-436
FRUITS, BERRIES, AND NUTS	437-455
VEGETABLES	457-510
MINES, QUARRIES, PITS, ETC.	511-522

CEREAL PRODUCTS.

The statistics relating to cereals appear on pages 427-436. The recapitulation on the last named page summarizes the returns, the total value of cereals returned for the Census year being \$1,104,578, composed of the following items: Indian corn, \$875,747; oats, \$91,523; rye, \$59,761; other cereals, \$77,547. These values in the form of percentages are as follows: Indian corn, 79.28 per cent; oats, 8.29 per cent; rye, 5.41 per cent; other cereals, 7.02 per cent.

Indian Corn.

The details relating to Indian corn appear on pages 429-431, the recapitulation being upon the last named page. This product appears in 16,876 returns out of 65,287, the total number of agricultural schedules. The total number of bushels returned, showing the quantity of this product produced during the Census year, is 2,001,794, and the average price per bushel, based upon the aggregate value of \$875,747, is \$0.44, the average value of product for each person making return being \$51.89. The leading counties from which this product is returned, ranked in accordance with the aggregate product value returned in each, are as follows: Worcester, \$178,824; Hampden, \$143,084; Hampshire, \$134,278; Franklin, \$120,496; Berkshire, \$81,347; Middlesex, \$72,151; and Bristol, \$63,028. In no other county is found a product value exceeding \$50,000.

Oats.

The details relating to the production of oats will be found on pages 431-433. From the recapitulation, page 433, it will be seen that this product is reported in 2,711 returns out of 65,287. The total number of bushels reported for the State is 285,826, the average price being \$0.32 per bushel, based upon the aggregate value of \$91,523, the average value of product for each person making return being \$33.76. The largest product value is reported from Berkshire County, namely, \$61,267, the other leading counties in which a product value in excess of \$1,000 is reported being: Bristol, \$10,558; Worcester, \$5,357; Franklin, \$5,319; Hampden, \$3,821; and Hampshire, \$3,601.

Rye.

The details relating to rye appear on pages 433-436. The product is reported in 2,988 instances out of 65,287, the total number of schedules received. The aggregate number of bushels reported is 105,685, the average price per bushel, based upon the

aggregate value, \$59,761, is \$0.57, and the average value of this product for each person making return, \$20.00. The leading counties, with the value produced in each, are: Berkshire, \$16,528; Hampden, \$14,991; Hampshire, \$9,390; Worcester, \$6,153; Franklin, \$3,944; Bristol, \$2,815; Middlesex, \$2,063; Plymouth, \$1,386; Barnstable, \$1,314. The value of rye reported from the other counties is quite small in every case.

Comparisons with previous Censuses.

The following table brings forward from previous censuses such figures as are available for products classified as cereals. The values originally reported in currency in 1865 and 1875 have been reduced to gold.

Cereal Products. 1845-1855-1865-1875-1885-1895.

	1845	1855	1865	1875	1885	1895

FRUITS, BERRIES, AND NUTS.

The statistics relating to the products classed under the head of fruits, berries, and nuts are contained on pages 437-455, closing with a recapitulation including the following items: Apples, \$765,883; cranberries, \$1,038,712; grapes, \$60,256; grapes, hot-house, \$8,050; pears, \$159,416; strawberries, \$404,007; other fruits, berries, and nuts, \$414,261. When these figures are put in the form of percentages of the aggregate value, \$2,850,585, it will be seen that the cranberry product exceeds in value any of the others and constitutes 36.44 per cent of the aggregate. The value of apples produced during the Census year forms 26.87 per cent, strawberries 14.17 per cent, pears 5.59 per cent, and grapes 2.12 per cent.

Apples.

The details relating to apples, by counties, cities, and towns, will be found on pages 439-441. From the recapitulation it will be seen that apples were reported in 26,959 returns out of 65,287, the aggregate number of bushels produced during the Census year being 1,993,916, the average price per bushel \$0.38, based upon the aggregate value of \$765,883, and the average value of this product for each person making return \$28.41. The principal counties, with value reported from each, are as follows: Middlesex, \$138,528; Worcester, \$128,298; Essex, \$125,181; Franklin, \$94,220; Hampden, \$78,132; Berkshire, \$73,260; Hampshire, \$62,296; and Bristol, \$33,357.

Cranberries.

The details relating to cranberries, by counties, cities, and towns, appear on pages 441-443. This product is found in 1,828 returns out of 65,287, the leading counties being Barnstable, Essex, Middlesex, Plymouth, and Worcester, so far as ranked by the number of returns. The aggregate number of barrels produced during the Census year is 169,583, and as the aggregate value is \$1,038,712, the average price per barrel is \$6.13, the average value of product for each person making return being \$568.22. Upon the basis of value of product returned, the leading counties are as follows: Plymouth, \$625,687; Barnstable, \$312,557; Middlesex, \$27,304; Norfolk, \$23,071; Bris-

tol, \$22,796; Worcester, \$6,141; Essex, \$4,677; and Hampden, \$2,380. This product thus may be compared with the number of returns reported from the different counties.

It will be seen that the counties of Plymouth and Barnstable together produced 90.87 per cent of the entire crop, and although there were but 94 returns in which the crop appeared from the county of Bristol as against 148 in the county of Essex, the value reported from the county of Bristol was nearly five times as large as that reported from Essex. Although the product value returned from Middlesex was slightly in excess of that returned from Norfolk, nevertheless, there were 275 instances in which the crop was reported in Middlesex as against 54 in Norfolk.

Grapes.

The details relating to grapes appear on pages 443-448, followed by a brief presentation relating to hothouse grapes, separately classified, on page 449. The grape product was reported in two ways. Out of 65,287, the total number of schedules, 9,767 returns were received in which the quantity measure was a bushel, the aggregate number of bushels reported being 51,230, the aggregate value \$49,586, the average price per bushel \$0.97, and the average value of product for each person making return \$5.08. Besides these, 743 returns reported grapes by the pound, the aggregate number of pounds raised being 294,678, the aggregate value \$10,670, the average price per pound \$0.04, and the average value of product for each person making return \$14.36. With respect to product value, the leading county is Worcester, reporting a product value of \$11,796 (by the bushel) and \$675 (by the pound). The county of Middlesex ranks next, with a product value of \$7,007 (by the bushel) and \$4,069 (by the pound). Other leading counties with respect to this crop are, in order named, Bristol, Essex, Hampshire, and Hampden.

The total amount of hothouse grapes reported was 12,489 pounds, value \$8,050, average price per pound \$0.64, and average value of product for each person making return \$298.15. The three leading counties in product value are: Worcester, \$2,100; Essex, \$1,474; and Berkshire, \$1,380.

Pears.

The returns relating to the pear crop appear on pages 449-452. This product is reported in 16,359 instances out of 65,287, the aggregate number of bushels raised during the Census year being 190,176, the aggregate value \$159,416, the average price per bushel \$0.84, and the average value of product for each person making return \$9.74. The leading counties, with the value of product as reported from each, are as follows: Middlesex, \$46,187; Worcester, \$20,346; Suffolk, \$15,210; Essex, \$14,199; and Bristol, \$13,656. The entire product reported from Suffolk County was included in 84 returns, showing an average value of product for each person making return in that county of \$181.07, this being in excess of any individual average shown elsewhere.

Strawberries.

The returns relating to strawberries, by counties, cities, and towns, will be found on pages 452-455. Although this crop is reported in but 5,285 returns out of 65,287, the aggregate quantity raised during the Census year amounted to 4,150,745 quarts, the aggregate value being \$404,007. The average price per quart is found to be \$0.10, and the average value of product for each person making return \$76.44. The quantity and value reported from Bristol County are far in excess of that shown elsewhere, amounting to 1,995,351 quarts; value \$176,793; average value of product for each person making return \$175.22. Other leading counties, with number of quarts returned, are as follows: Middlesex, 640,873; Essex, 325,659; Plymouth, 289,966; Worcester, 281,405; Hampden, 200,720; Hampshire, 136,454.

Comparisons with previous Censuses.

The following brings together all available comparative figures, the currency values reported in 1865 and 1875 being now given in gold.

Selected Fruits and Berries. 1855-1865-1875-1885-1895.

	1855	1865	1875	1885	1895
Apples,

Total value,	-	\$19,572*	\$191,911	\$406,895	\$404,007

VEGETABLES.

The statistics relating to vegetables are contained on pages 457-510, being summarized in the recapitulation on the last named page. From this recapitulation it appears that the total value of vegetables reported for the Census year was \$6,389,533, including the following items: Beans, \$49,260; beans, string and shell, \$123,672; cabbage, \$478,840; celery, \$275,952; corn, green, \$349,840; cucumbers, \$204,277; cucumbers, hothouse, \$99,422; lettuce, garden, \$120,093; lettuce, hotbed, \$140,617; onions, \$338,304; pease, \$14,100; pease, green, \$207,428; potatoes, \$1,799,525; pumpkins, \$52,006; squashes, \$250,700; tomatoes, garden, \$257,170; tomatoes, hothouse, \$13,785; turnips, table, \$131,755; other vegetables, \$1,482,787. Of these various vegetables, the value of potatoes forms 28.16 per cent of the total value, and far exceeds any other single vegetable returned, other leading items being the following, the percentage of the total value represented by the value of the particular vegetable named being annexed: Cabbage, 7.49; green corn, 5.48; onions, 5.29; celery, 4.32; tomatoes, garden, 4.02; squashes, 3.92; green pease, 3.25; cucumbers, 3.20.

Beans.

The details relating to this product, by counties, cities, and towns, are shown on pages 459-461. The product is reported in 6,729 returns out of 65,287, the aggregate quantity raised during the Census year being 30,434 bushels, the average price per bushel being \$1.62, and the average value of product for each person making return \$7.32. Upon the basis of value of product, excluding the counties of Dukes, Nantucket, and Suffolk, in which the crop was unimportant, the counties range from Middlesex, in which a product value of \$7,855 is returned, to Norfolk, in which the product value is \$1,124, the rank of the counties being as follows: Middlesex, Worcester, Essex, Plymouth, Franklin, Bristol, Hampshire, Hampden, Barnstable, Berkshire, Norfolk. These figures do not include string and shell beans which are separately reported.

String and Shell Beans.

The details appear on pages 461-464, the total number of returns being 6,595, the aggregate number of bushels reported 171,895, the aggregate value \$123,672, average price per bushel \$0.72, and the average value of product for each person making return \$18.75. Middlesex leads all other counties with a product value of \$53,622, the two counties which rank next being Essex, \$14,362, and Plymouth, \$12,032.

Cabbage.

The details appear on pages 464-467. The crop is reported in 8,364 instances, the quantities returned aggregating 15,881,357 heads, the aggregate value being \$478,840, the average price per head \$0.03, and the average value of product for each person making return \$57.25. The product value reported from Essex and Middlesex Counties is much in excess of that found elsewhere, being respectively \$116,067 and \$122,281.

Celery.

The details appear on pages 467-469. Although this product appears in but 930 returns out of 65,287, the aggregate value returned is \$275,952, covering in the aggregate 4,286,840 bunches, the average price being \$0.06 per bunch, and the average value of product for each person making return \$296.72. Middlesex County leads all others, reporting 3,206,308 bunches out of the total, and covering a product value of \$193,836. In comparison with these figures, the amounts returned from the other counties are small, Bristol County standing next, with a product value of \$15,311.

Green Corn.

The details of this crop appear on pages 469-471. The product appears in 9,856 returns, the aggregate number of bushels produced during the Census year being 703,216, aggregate value \$349,840, average price per bushel \$0.50, and the average value of product for each person making return \$35.50. This is distinctively a market garden product. Middlesex County leads in number of bushels reported, 272,437, and value of product, \$106,771. Upon the basis of values, the counties which rank next in order are: Bristol, \$47,257; Essex, \$44,000; Hampden, \$42,954; Worcester, \$27,253; Plymouth, \$25,891; and Norfolk, \$21,859.

Cucumbers.

The details will be found on pages 472-476, followed by a presentation relating to hothouse cucumbers, pages 477-478. This crop is reported in two ways—by the bushel, including 173,841 bushels, value \$141,088, average price \$0.81 per bushel, and average value of product for each person making return \$34.84; and by the number, including 11,258,164, value \$63,189, average price \$0.01, and average value for each person making return \$50.43. The hothouse cucumbers include 19,624 bushels, value \$78,731, average price \$4.01 per bushel, average value of product for each person making return \$1,485.49; and, by number, 415,534, value \$20,691, average price \$0.05, average value of product for each person making return \$574.75. The counties which lead in the production of cucumbers are Middlesex, Plymouth, Norfolk, and Essex, the hothouse production being largely centred in Middlesex and Worcester Counties.

Lettuce.

The details relating to the production of lettuce appear on pages 478-482. The crop is reported in two forms—garden lettuce, including 6,596,032 heads, value \$120,093, average price per head \$0.02, average value of product for each person making return \$73.77; and hotbed lettuce, including 3,874,659 heads, value \$140,617, average price \$0.04, and average value of product for each person making return \$400.62. Both in regard to garden and hotbed lettuce Middlesex County leads, the product value from this county of the former being \$85,400 and the latter \$104,178. No other county approaches these figures.

Onions.

The details will be found on pages 482-487. This product is reported by the bushel and by the bunch. By the bushel the aggregate amounts to 803,797 bushels, value \$321,851, average price \$0.40 per bushel, and average value of product for each person making return \$72.93. By the bunch, 659,025 bunches, value \$16,453, average price

\$0.02 per bunch, and average value of product for each person making return \$42.30. The leading counties with respect to this crop are, in order named, Essex, Middlesex, Franklin, Hampshire, and Bristol.

Pease.

The details relating to this crop appear on pages 488-489, followed by a presentation relating to green pease on pages 489-492. Of pease, 12,353 bushels are reported, value \$14,100, average price \$1.14 per bushel, average value of product for each person making return \$28.03. The counties which lead in the production of this crop are, Middlesex, \$5,163; Plymouth, \$2,917, and Norfolk, \$1,392, more than half the crop being reported from these three counties.

As to green pease, the total quantity reported is 183,842 bushels, value \$207,428, average price \$1.13 per bushel, average value of product for each person making return \$25.34. The counties which lead are: Middlesex, \$63,894; Essex, \$36,364; Plymouth, \$24,322; Bristol, \$20,749; Worcester, \$18,402; Norfolk, \$11,562; Hampden, \$10,092.

Potatoes.

The details will be found on pages 492-494. This important product is reported in 32,909 returns out of 65,287, and includes 4,172,253 bushels, aggregate value \$1,799,525, average price \$0.43 per bushel, average value of product for each person making return \$54.68. Worcester County leads all others, the value of product reported therefrom being \$302,518. The other leading counties rank as follows: Middlesex, \$227,269; Bristol, \$215,451; Essex, \$187,315; Hampden, \$180,947; Berkshire, \$170,033; Hampshire, \$149,428; Franklin, \$118,135; Plymouth, \$118,027.

Pumpkins.

The details will be found on pages 495-497. The product for the Census year, as reported, is 9,117,763 pounds, aggregating in value \$52,006, the average price being \$0.01 per pound, and the average value of product for each person making return \$14.15. In product value Bristol County leads, with \$10,366, the two counties which stand next being Middlesex, \$6,770, and Worcester, \$6,419.

Squashes.

The details appear on pages 497-499, the total number of pounds reported for this product being 27,186,746, aggregate value \$250,700, average price per pound \$0.01, and average value of product for each person making return \$38.30. With respect to this product Middlesex County leads, nearly one-half the total number of pounds being produced therein, namely, 11,782,920, value \$93,006. Next to Middlesex ranks Essex, the aggregate product in quantity being 6,746,357 pounds, value \$47,424.

Tomatoes.

The details relating to tomatoes will be found on pages 500-504. The crop includes garden tomatoes, of which 547,037 bushels were returned, aggregate value \$257,170, average price \$0.47 per bushel, average value of product for each person making return \$37.04; and hothouse tomatoes, comprising 56,800 pounds, aggregate value \$13,785, average price per pound \$0.24, and average value of product for each person making return \$113.93. Middlesex County leads, with a product value of \$106,017 in garden tomatoes and \$9,063 in hothouse tomatoes.

Table Turnips.

The details appear on pages 505-510. The product is reported in two forms — by the bushel, including 304,684 bushels, value \$127,563, average price \$0.42 per bushel, average value of product for each person making return \$25.30; and by the bunch, including 113,286 bunches, value \$4,192, average price \$0.04 per bunch, average value of product for each person making return \$24.37. In the production of table turnips Bristol County

leads, the product value being by the bushel \$38,152, and by the bunch \$173. Next to Bristol ranks Middlesex, with \$22,852 by the bushel and \$2,026 by the bunch.

Comparisons with previous Censuses.

Comparative figures for vegetable products, so far as they can be supplied, are brought forward in a table which follows. As before, currency values originally reported in 1865 and 1875 have been changed to gold values.

Selected Vegetables. 1865-1875-1885-1895.

	1865	1875	1885	1895
Beans,				
Total value,	\$14,311	\$86,654	\$96,339	\$49,260

MINES, QUARRIES, PITS, ETC.

The details relating to mines, quarries, pits, etc., appear on pages 511-522. The recapitulation on pages 521-522 summarizes the returns which are classified under this head, showing an aggregate value of product amounting to \$226,549. This includes products of pits and bogs, aggregating \$100,278, or 44.27 per cent of the whole, subdivided as follows: Clay, \$6,286; gravel, \$55,504; muck, \$3,243; peat, \$495; and sand, \$34,750; also products of quarries aggregating \$114,522, or 50.55 per cent of the total product from mines, quarries, pits, etc., subdivided as follows: Granite, \$24,718; stone, \$89,804. The other items classified under mines, quarries, pits, etc., relate to products of ponds, springs, etc., aggregating \$11,749, or 5.18 per cent of the total, including fish, \$5,055; salt, \$300; and spring water, \$6,394.

It will be understood that these various items which are thus classified are returned from the farms only, although in some cases they are products of the same kind as returned from other sources. For instance, stone from quarries which are worked exclusively as manufacturing enterprises will be found returned in the volume relating to manufactures, while the main product of the fisheries returned from establishments

or persons exclusively engaged in fishing will be found in the report relating to the fisheries.

The details by counties, cities, and towns, relating to the products from mines, quarries, pits, etc., will be found on the following pages: Products of pits and bogs, pages 513-518; quarries, pages 518-519; ponds, springs, etc., pages 520-521.

RECAPITULATION: FOR THE STATE. AGRICULTURAL PRODUCTS BY NAME.

This recapitulation, presented on page 522, summarizes in such form as permits ready comparisons, all the facts as to the various agricultural products which have been separately analyzed in detail. In this recapitulation the products are presented alphabetically, and the figures are accompanied by aggregates and percentages showing the proportion of the returns reporting or not reporting each specified product. As the details relating to the various products have been already sufficiently pointed out, it need only be added that the percentages referred to enable the reader to judge of the number of farms producing the specified products, using the term "farm" in the broad sense in which it is used in the Census returns and as previously defined.* For example, of all the returns received, 41.29 per cent report apples as a product, while 58.71 per cent do not report this product. Selecting a few other products at random, we find that 51.94 per cent of all the returns contain eggs as a product; 50.41 per cent of the returns report potatoes; 48.86 per cent report milk as a product for use on the farm where it was produced; 40.85 per cent report dressed poultry; 26.01 per cent report milk as a product for sale; 25.85 per cent report Indian corn; and 25.06 per cent report pears as a product.

RECAPITULATION: FOR THE STATE. ALL PRODUCTS WITH VALUES AND PERCENTAGES.

In this recapitulation, which appears on page 523, the same products are considered as in the one preceding, the products also being arranged alphabetically. Values and percentages only are included in this recapitulation, but the value of the total product for the Commonwealth is considered. As the total value of all agricultural products for the Census year was \$52,880,431, and as the details presented in this table and in the presentations and analysis heretofore presented cover an aggregate value of \$31,192,337, it will be seen that there remains a product value of but \$21,688,094, which appears in the recapitulation opposite the line "All other products." This value represents 41.01 per cent of the total value of agricultural products. In other words, we have shown in detail, by counties, cities, and towns, in the preceding presentations 58.99 per cent of the total value of agricultural products. Reference to the recapitulation will show also that of the total value of agricultural products produced during the Census year, milk for sale constituted 17.72 per cent; milk for use, including all uses to which the same was put upon the farm where it was produced, such as table use, transformation into butter and cheese, etc., 8.19 per cent; eggs (exclusive of fancy and game eggs) 5.17 per cent; potatoes 3.40 per cent; butter (for sale) 1.97 per cent; cranberries 1.96 per cent; cream (for sale) 1.78 per cent; Indian corn 1.66 per cent; apples 1.45 per cent; dressed poultry 1.19 per cent; and tobacco 1.03 per cent. This includes the leading products produced for sale upon the farms. The value of manure produced as a separate farm product amounted to 4.48 per cent of the total value of agricultural products. Much of this, however, was undoubtedly consumed by the farmers upon the farms where it was produced. In no other case does the value of any single product exceed one per cent of the total value.

RECAPITULATION: FOR THE STATE. CLASSIFIED AGGREGATES WITH VALUES AND PERCENTAGES.

This recapitulation is presented on page 524. The note preceding it shows that while a value of \$21,688,094, being 41.01 per cent of the total value of all agricultural

* See page 346, *ante*.

products, has not been presented in detail for each city and town in which said products were raised or produced, nevertheless, for all practical purposes, the presentation by towns, pages 203-368, *ante*, supplies sufficient specification by name, and for cities and towns, as regards the following classes of agricultural products: Clothing, Needle Work, Etc., Greenhouse Products, Wood Products, and Hay, Straw, and Fodder. It will be seen, therefore, that adequate presentation in detail by name for cities and towns has been given for a value of \$48,240,560, or 91.23 per cent of the total value of all agricultural products for the Census year. The value of products not given in detail by cities and towns is therefore reduced to \$4,639,871, or 8.77 per cent.

The recapitulation presents classified aggregates of the products given in detail by name, covering an aggregate value of \$31,192,337, or 58.99 per cent of the total, and shows that of the products not presented in detail by name, the value of clothing, needle work, etc., comprises \$27,749; greenhouse products (plants, cut flowers, etc.), \$1,749,070; wood products (firewood, lumber, fence rails, telegraph poles, etc.), \$2,780,314; hay, straw, and fodder, \$12,491,090; other products, \$4,639,871. If details respecting any of these are desired for any particular city or town, they can be furnished by the Department upon request, but as the aggregate forms so small a part of the total, it was not thought advisable to extend the volume sufficiently to present them in print.

AGRICULTURAL PROPERTY:
BY NAME.

AGRICULTURAL PROPERTY: BY NAME.

The presentation for Agricultural Property, by name, covers pages 535-654. The presentation includes general classifications, with minor classifications under each general one. The number of persons owning a specified article of property, the number or quantity of the specified article, and the value of the same are given. In the recapitulations for the minor classifications, as well as in those for the general classifications, the specifications of detail are more complete and cover the following points: Total returns, returns reporting specified property, returns not reporting specified property, number, value, average price, and average value of property for each person making return.

The general classifications in this presentation are: Land, Buildings, Domestic Animals, Etc., Fruit Trees and Vines, and Mines, Quarries, Pits, Etc. The minor classifications under Land are as follows: Cultivated land, including hay land, land used for principal crops, land used for market gardens, nurseries, orchards, seed gardens, cranberry bogs, and other cultivated land; uncultivated land, including permanent pasture, other unimproved land, and unimprovable land; woodland, including land with timber of over 30 years' growth, 30 years' growth or less, from seeds or transplanted seedlings, and woodland not classified; land occupied by mines, quarries, pits, etc.; and land owned by non-residents.

The minor classifications under Buildings are dwelling-houses and barns. The minor classifications under Domestic Animals are calves, colts, cows, heifers, hens and chickens, hogs, horses, lambs, oxen, pigs, and sheep. The minor classifications under Fruit Trees and Vines are apple trees, grape vines, peach trees, and pear trees.

The minor classifications under Mines, Quarries, Pits, Etc., are mines of asbestos, gold, iron, other metals, and tripoli; under Pits and Bogs, clay, gravel, peat bogs and muck beds, and sand; under Quarries, those producing bluestone, granite, limestone, marble, sandstone, slate, soapstone, and stone not specified; under Ponds, Springs, Etc., fish ponds, fish ways, ice ponds, salt works, and springs.

As shown in the recapitulation on page 644, we see that the total value of agricultural property presented by name in detail, for each city and town in which located, amounts to \$200,604,146, or 91.20 per cent of the total value of all agricultural property in the Commonwealth as determined by the Census. The items omitted include principally the smaller farm buildings, machines, implements, etc., some few of the domestic animals, and a few of the less important fruit trees and vines.

No specific illustration of the manner of reading the tables is necessary, as special care has been taken to make the column heads as specific and illustrative as possible. The recapitulations of the general classifications and those for the State on pages 643 and 644 are more complete in detail than any tables hitherto presented in any State Census relating to agricultural property.

[The total value of agricultural property as returned by the Census of 1895 was \$219,957,214. The presentation of agricultural property by name on pages 535-643, *ante*, represents a value of \$200,604,146, or 91.20 per cent. This leaves a value of \$19,353,068, or 8.80 per cent, not accounted for in the detail showings. This amount of \$19,353,068 not represented includes the following items: Buildings not specified, \$10,121,672; machines, implements, etc., not shown in detail, \$8,128,031; certain domestic animals not mentioned by name, \$313,930; and fruit trees not specified, \$789,435.

In case any city or town should, for any particular purpose, desire fuller specification in regard to the items above enumerated it can be supplied by the Census office.]

RECAPITULATION: FOR THE STATE. CLASSIFIED AGGREGATES WITH VALUES AND PERCENTAGES.

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS RELATING TO AGRICULTURAL PROPERTY, BY NAME.

	Pages
LAND,	539-573
BUILDINGS,	575-582
DOMESTIC ANIMALS, ETC.,	583-615
FRUIT TREES AND VINES,	617-630
MINES, QUARRIES, PITS, ETC.,	631-643

The statistics of Agriculture by towns, pages 205-367, present aggregates for each city and town, with county and State recapitulations, showing the total value of agricultural property included under each classified head.

The presentations now under consideration, which begin on page 535, entitled "Agricultural Property by Name" give the details of the principal items which made up these totals.

We may remind the reader that the values of the different classes of property are those placed upon them by the farmers from whom the returns were obtained, and that they are not assessors' values made for the purpose of taxation.

LAND.

The returns relating to land in detail are given upon pages 539-573. This, of course, is the leading division or class of agricultural property. The total value returned was \$110,271,859, covering 3,847,749 $\frac{1}{2}$ acres, subdivided as follows: Cultivated land, 902,650 $\frac{1}{2}$ acres; value, \$61,518,613; uncultivated land, 1,320,532 $\frac{1}{2}$ acres; value, \$21,562,822; woodland, 1,460,994 $\frac{1}{2}$ acres; value, \$23,936,362; unclassified land values, including mines, quarries, pits, etc; 7,081 $\frac{1}{2}$ acres; value, \$447,075; and land owned by non-residents of the city or town within which the same is located, 156,490 $\frac{3}{4}$ acres; value, \$2,806,987. The figures appear in the recapitulation on pages 572, 573, which also contains similar data for each county. The changes in total land values in 1895 as compared with 1885 have already been presented by counties upon page 331, *ante*, the percentage of decrease in value for the State being 0.39. The decrease in acreage was 50,679 $\frac{1}{4}$.

Cultivated Land.

The details relating to cultivated land appear on pages 540-551. From the recapitulation for the State by counties, pages 550, 551, we note that the aggregate acreage of cultivated land, namely, 902,650 $\frac{1}{2}$, valued at \$61,518,613, represents land used for hay, 660,056 $\frac{1}{2}$ acres; value, \$38,554,254; that used for principal farm crops, 162,452 $\frac{1}{2}$ acres; value, \$9,989,953; market gardens, 13,432 $\frac{3}{4}$ acres; value, \$3,459,800; nurseries, 941 $\frac{1}{2}$ acres; value, \$243,975; orchards, 30,594 $\frac{1}{2}$ acres; value, \$2,813,782; seed gardens, 180 $\frac{1}{2}$ acres; value, \$16,388; cranberry bogs, 9,372 $\frac{1}{2}$ acres; value, \$2,904,062; other cultivated land, 25,620 $\frac{1}{2}$ acres; value, \$3,536,399.

With respect to acreage and value the following percentages show the relation of each class of cultivated land to the total.

CLASSIFICATION OF LAND.	Percentages of Total Acreage	Percentages of Total Value
Hay (used for),	73.12	62.67
Principal Crops (used for),	18.00	16.24
Market Gardens,	1.49	5.62
Nurseries,	0.10	0.40
Orchards,	3.39	4.57
Seed Gardens,	0.02	0.03
Cranberry Bogs,	1.04	4.72
Other Cultivated,	2.84	5.75
TOTALS (all cultivated land),	100.00	100.00

The land devoted to hay represents 73.12 per cent of the acreage and 62.67 per cent of the value of all cultivated land. The rank of the different counties with respect to all cultivated land and as to hay land, in acreage and values, is as follows:

COUNTIES.	RANK AS TO ALL CULTIVATED LAND		RANK AS TO HAY LAND	
	In Acreage	In Value	In Acreage	In Value
Barnstable,	11	12	11	12
Berkshire,	2	5	2	4
Bristol,	8	6	8	5
Dukes,	12	13	12	13
Essex,	6	3	4	3
Franklin,	7	11	6	10
Hampden,	4	9	7	9
Hampshire,	5	10	5	8
Middlesex,	3	1	3	2
Nantucket,	14	14	14	14
Norfolk,	10	7	9	7
Plymouth,	9	8	10	11
Suffolk,	13	4	13	6
Worcester,	1	2	1	1

The general statement as to values of farm land made on page 354, *ante*, may here be repeated, as follows: "The values of property are affected by its location. In cities, and in towns near cities, values range much higher than in remote parts of the State, because the agricultural land may in many cases be readily transformed into building land, or has a relatively high value on account of its proximity to a market and the character of the product to which it is devoted." For example, the land used for hay in Suffolk County has an average value of \$2,222.80 per acre, while for the State at large the average value is but \$58.41 per acre, and in Berkshire County, the county ranking second as to acreage, it is but \$37.71 per acre. A table hereafter presented shows for each county the average value per acre of each class of cultivated or other farm land.

The counties of Middlesex, Essex, and Bristol lead all others in acreage devoted to market gardens, ranking in this respect in the order named. As to aggregate value of market garden land however, the leading counties are Middlesex, Suffolk, Essex, and Bristol, with Hampden standing next and not far below Bristol. In acreage devoted to this purpose, Hampden outranks Suffolk. By far the largest acreage and value in market gardens are found in Middlesex, which contains 46.32 per cent of the acreage and 53.87 per cent of the value of the entire market garden land in the State.

Although the acreage devoted to nurseries in the State is not large, Middlesex leads the other counties by a wide margin, both in acreage and value, having 44.21 per cent of the former and 35.47 per cent of the latter.

Uncultivated Land and Woodland.

Under this head the details are given on pages 550-561, the recapitulation appearing on pages 560, 561.

The uncultivated farm land comprising a total of 1,320,532 $\frac{1}{8}$ acres, value, \$21,562,822, includes the following: Permanent pasture, 1,119,105 acres; value, \$19,130,475; other unimproved land, 168,740 $\frac{1}{4}$ acres; value, \$2,140,730; unimprovable land, 32,686 $\frac{3}{8}$ acres; value, \$291,617.

The woodland is subdivided as follows, the total acreage being 1,460,994 $\frac{1}{2}$; value, \$23,936,362: Over 30 years' growth, 339,945 $\frac{7}{8}$ acres; value, \$10,372,992; of 30 years' growth or less, 976,400 $\frac{1}{4}$ acres; value, \$12,327,448; from seeds or transplanted seedlings, 10,234 acres; value, \$144,327; not classified, 134,414 acres; value, \$1,091,595.

This classification of woodland conforms to that used in the census of 1885 and was originally fixed by the legislature.

In acreage and value of uncultivated and woodland the counties rank as follows:

COUNTIES.	RANK AS TO UNCULTIVATED FARM LAND		RANK AS TO WOODLAND	
	In Acreage	In Value	In Acreage	In Value
Barnstable,	11	13	11	12
Berkshire,	2	5	2	3
Bristol,	8	4	6	4
Dukes,	12	12	12	13
Essex,	7	3	10	7
Franklin,	3	8	3	8
Hampden,	4	6	8	9
Hampshire,	5	10	5	10
Middlesex,	6	2	4	2
Nantucket,	13	14	14	14
Norfolk,	10	9	9	6
Plymouth,	9	11	7	5
Suffolk,	14	7	13	11
Worcester,	1	1	1	1

Comparative Acreage Values.

The following table permits a comparison of the average values per acre of the different principal sub-classes of land for the State and by counties.

THE STATE, AND COUNTIES.	AVERAGE VALUE PER ACRE OF LAND USED FOR—							
	Hay	Principal Crops	Market Gardens	Nurseries	Orchards	Seed Gardens	Cranberry Bogs	Permanent Pasture
THE STATE.	\$58.41	\$61.49	\$257.57	\$259.13	\$91.97	\$90.79	\$309.86	\$17.09
Barnstable,	31.57	65.99	66.93	156.80	55.49	250.00	327.89	13.31
Berkshire,	37.71	44.41	155.90	280.18	62.00	5.06	41.00	10.37
Bristol,	78.59	76.23	118.87	297.14	71.80	—	116.69	28.35
Dukes,	46.53	52.15	79.35	40.00	63.38	—	150.28	12.32
Essex,	70.73	91.21	128.94	104.04	96.79	123.67	39.36	36.52

THE STATE, AND COUNTIES.	AVERAGE VALUE PER ACRE OF LAND USED FOR —							
	Hay	Principal Crops	Market Gardens	Nurseries	Orchards	Seed Gardens	Cran- berry Bogs	Permanent Pasture
Franklin, . . .	31.57	41.45	53.94	25.96	29.63	—	12.66	7.77
Hampden, . . .	36.61	43.45	152.07	237.35	54.76	168.95	54.65	11.14
Hampshire, . . .	33.89	47.38	69.15	122.73	36.83	25.11	—	8.17
Middlesex, . . .	78.03	90.09	299.57	207.92	112.43	51.88	152.57	32.25

Plymouth, . . .	61.79	70.19	117.77	119.13	56.61	126.00	429.84	21.09
Suffolk, . . .	2,222.80	1,674.82	1,169.85	7,400.00	3,414.00	—	—	1,374.21
Worcester, . . .	50.27	51.51	91.12	264.58	61.36	10.00	37.11	13.81

The entirely abnormal values of land still properly classed as agricultural land in Suffolk County and, of course, largely within the geographical limits of the City of Boston, are forcibly brought out in this table, as well as in the one which follows. Although still in use for agricultural purposes, that is, for some one of the purposes indicated by the class heads, this land has largely appreciated in value on account of its eligibility for residential or business purposes. Inasmuch as these values are entirely out of proportion to those returned from the other counties, and as the averages for the other counties exhibit a much narrower range of dissimilarity than appears between Suffolk County and the county standing next in line, we think it proper to give the average value per acre of the different kinds of land in the State excluding Suffolk County, as follows: Land used for hay, \$53.86; for principal crops, \$58.80; for market gardens, \$209.84; for nurseries, \$182.47; for orchards, \$71.24; for seed gardens, \$90.79; for cranberry bogs, \$309.86; for permanent pasture, \$15.95. If these averages exclusive of Suffolk County be compared with the averages for the State as a whole, given in the preceding table, the effect upon the general average of the unusually high values in Suffolk may be seen.

The following table gives the average value per acre of five main classes of agricultural land, namely, cultivated, uncultivated, woodland as a whole, woodland over 30 years' growth, woodland of 30 years' growth or less.

THE STATE, AND COUNTIES.	AVERAGE VALUE PER ACRE OF —				
	Total Cultivated Land	Total Uncultivated Land	Total Woodland	Woodland Over 30 Years' Growth	Woodland of 30 Years' Growth or Less
THE STATE.	\$68.15	\$16.33	\$16.38	\$30.51	\$12.63
Barnstable,	110.49	10.42	7.82	13.30	8.12
Berkshire,	39.76	9.04	10.45	17.37	7.99
Bristol,	79.89	26.62	18.24	30.31	15.90
Dukes,	49.15	11.23	12.72	17.53	12.79
Essex,	81.29	37.63	36.59	61.59	23.88
Franklin,	33.52	75.30	8.18	13.58	6.51
Hampden,	39.86	10.46	13.31	25.26	11.24
Hampshire,	37.23	8.17	9.25	14.77	8.24
Middlesex,	99.59	31.49	26.39	48.95	19.49
Nantucket,	52.23	9.89	26.09	50.00	26.47
Norfolk,	101.74	26.43	25.85	65.54	16.93
Plymouth,	100.74	18.26	16.28	28.14	12.75
Suffolk,	2,141.67	1,026.17	2,254.59	2,585.49	1,344.58
Worcester,	51.51	13.70	17.05	33.20	13.74

Eliminating, as before, the values for Suffolk County, the values for the State outside its limits show the following averages per acre, which may be compared with those given in the table. The State exclusive of Suffolk County: Cultivated land, \$62.08; uncultivated land, \$15.34; total woodland, \$15.75; woodland over 30 years' growth, \$28.36; woodland of 30 years' growth or less, \$12.46.

BUILDINGS.

The returns relating to buildings on farms contained on pages 575-582, and recapitulated on page 582, include in the total valuation of \$77,920,357, the following: Dwelling-houses, \$45,892,147; barns, \$21,906,538; other buildings, \$10,121,672. Of the entire value of buildings, dwelling-houses represent 58.90 per cent; barns, 28.11 per cent; and other buildings, 12.99 per cent.

Dwelling-Houses.

The details may be found on pages 577-579. The recapitulation on page 579 shows that 46,757 dwelling-houses were reported on farms, 43,060 returns reporting such buildings. The average value was \$981.50, or for each person making return, \$1,065.77. The range of values upon which these averages are based, however, is quite wide, as is shown by the county figures, which run from the exceptional averages per dwelling of \$4,045.78 and per person \$4,866.67 in Suffolk County to \$534.46 per dwelling and \$569.11 per person in Franklin County. The higher values are found in the following counties, the averages per dwelling being as annexed: Suffolk, \$4,045.78; Middlesex, \$1,384.86; Essex, \$1,321.18; Norfolk, \$1,238.44; Bristol, \$1,027.62; Plymouth, \$1,008.14. With these six counties eliminated the range of county averages is narrowed, running from \$884.33 per dwelling in Hampden County to \$534.46, the figure previously quoted for Franklin County.

Barns.

The details are given on pages 580-582 and close with the recapitulation on the last-named page. The total number of barns reported from farms was 51,084, appearing in 42,331 returns out of 65,287. The average values for the State are, per barn, \$428.83; per person making return, \$517.51.

As shown in connection with dwelling-houses the averages for Suffolk County are exceptionally high, being, per barn, \$1,642 and per person, \$2,318.85. Outside of Suffolk County the county averages per barn range from \$649.26 in Middlesex to \$262.25 in Barnstable.

DOMESTIC ANIMALS, ETC.

This class of farm property aggregates in value \$14,854,417. The statistics covering the subject are found upon pages 583-615.

The recapitulation on page 615 subdivides the aggregate value for the State as follows: Calves, \$452,358; colts, \$229,282; cows, \$6,093,245; heifers, \$450,052; hens and chickens, \$920,243; hens and chickens, fancy, \$50,349; hogs, \$647,495; horses, \$5,083,243; lambs, \$62,163; oxen, \$203,707; pigs, \$229,140; sheep, \$119,210; other domestic animals, \$313,930.

The principal animal values comprise the following: Cows, 41.02 per cent; horses, 34.22 per cent; hens and chickens, (not including fancy fowls) 6.20 per cent. All other animals make up the remaining value, namely 18.56 per cent.

The details relating to each group of animals may be found in the main presentation. We shall confine our analysis to the three leading classes, cows, horses, and hens and chickens.

Cows.

The detailed information relating to cows appears on pages 590-592, closing with a recapitulation on page 592.

Out of 65,287 returns, 32,279 specify cows as farm property, the aggregate number being 187,502, the average value being \$33.50, and the value per person making return \$188.77.

The county averages per animal range from \$45.25 in Suffolk to \$26.92 in Berkshire. The largest aggregate value is found in Worcester County, namely, \$1,352,994, Middlesex ranking next with \$1,043,138, followed by the other counties in the following order: Franklin, \$596,877; Essex, \$531,623; Berkshire, \$527,403; Hampshire, \$458,674; Bristol, \$448,504; Hampden, \$426,351; Norfolk, \$340,637; Plymouth, \$243,727; Barnstable, \$56,973; Suffolk, \$32,941; Dukes, \$21,845; Nantucket, \$11,558.

Horses.

The details relating to horses on farms may be found on pages 604-606. From the recapitulation on page 606, we find the total number returned to be 71,579, appearing in 35,206 returns. The average value per animal is \$71.02, and per person making return \$144.39. The county averages per animal range from \$94.37 in Suffolk to \$57.22 in Franklin. In the value of horses on farms, as in the number of cows, Worcester and Middlesex Counties lead, the values in these counties, respectively, being \$943,217 and \$844,053. The other counties range as follows: Berkshire, \$563,466; Essex, \$470,507; Bristol, \$461,785; Hampden, \$386,207; Hampshire, \$376,494; Franklin, \$311,044; Plymouth, \$281,895; Norfolk, \$264,618; Barnstable, \$109,417; Suffolk, \$31,425; Dukes, \$28,505; Nantucket, \$10,610.

Hens and Chickens.

The details relating to hens and chickens on farms, are given on pages 595-601. The recapitulation of the statistics as to hens and chickens (not fancy fowls) on page 600, shows that as the aggregate value reported, \$920,243 covered 1,808,271 fowls the average value is \$0.51 per fowl. The average value per person making return was \$27.35. Worcester and Middlesex lead the other counties in aggregate value returned, the amounts respectively being \$166,914 and \$145,050. Bristol County falls not far behind Middlesex, with \$137,672. The other counties appear in the following order: Essex, \$90,715; Plymouth, \$65,636; Hampden, \$61,929; Berkshire, \$56,368; Norfolk, \$51,938; Franklin, \$48,169; Hampshire, \$46,091; Barnstable, \$37,546; Dukes, \$6,405; Nantucket, \$3,217; Suffolk, \$2,593.

Besides the values given, the value of fancy hens and chickens was \$50,349, the recapitulation for the State by counties appearing on page 601. Middlesex County leads as to value returned, \$20,430 being reported or nearly one-half the total value for the State of property of this kind.

FRUIT TREES AND VINES.

Upon pages 617-630 will be found the statistics relating to farm property in fruit trees and vines. The recapitulation on page 630 enables the reader to judge of the respective values of the different kinds. Of the total value returned, \$7,924,878, apple trees form 73.36 per cent, aggregating in value \$5,813,404; pear trees, 9.15 per cent, aggregating \$725,004; peach trees, 5.03 per cent, aggregating \$398,561; and grape vines, 2.50 per cent, aggregating \$198,474. Various minor fruit trees and vines comprise together 9.96 per cent of the total value, and aggregate in amount \$789,435.

Apple Trees.

The details are upon pages 619-621. The total number of trees returned is 2,092,617. The average value per person making return is \$161.28. Worcester County leads in number, reporting 512,433, value \$1,193,598. Middlesex follows, number 420,365, value, \$1,647,965. The other counties rank as follows as to number of trees: Franklin, 210,918; Essex, 201,083; Hampden, 168,803; Berkshire, 167,696; Hampshire, 163,651; Bristol, 103,841; Plymouth, 63,668; Norfolk, 52,226; Barnstable, 19,028; Dukes, 4,476; Suffolk, 4,408; Nantucket, 21.

Grape Vines.

The details are upon pages 621-624. The total number of vines reported is 210,336, the average value per person making return of property of this kind being but \$12.20. The largest aggregate value in any county is found in Middlesex, namely, \$57,745, Worcester County ranking next with \$35,760; these two counties, it will be seen, having about 47.11 per cent of the total for the State.

Peach Trees.

The details appear on pages 624-627. In all, 316,057 trees are reported, the average value per person making return being \$36.32. Middlesex County contains 94,823 trees; Worcester, 88,129; Hampden, 34,121; Hampshire, 22,974; Franklin, 20,864; and the others diminishing numbers down to 67, the number reported from Nantucket County.

Pear Trees.

The details appear on pages 627-629. The number reported for the State is 290,587, the average value per person reporting being \$28.73. The largest number found in any single county appears in Middlesex, namely, 70,470; while Worcester contains 60,114, the next county in rank being Essex, with 29,475.

MINES, QUARRIES, PITS, ETC.

The statistics relating to this class of agricultural property are shown on pages 631-643. As stated upon page 354, *ante*, the values returned under this head are the values of the mines, quarries, and pits upon farms, as such, exclusive of the value of the land upon which they are located, which is included in the statistics relating to land, under its appropriate title.

The recapitulation on page 643, shows the detailed values of the items which combined make up the aggregate, \$857,672, the round total for the State of property of this kind. These detailed values are as follows: Mines, \$19,215, or 2.24 per cent of the whole; clay pits, \$36,758, or 4.29 per cent; gravel pits, \$252,873, or 29.48 per cent; peat bogs and muck beds, \$22,766, or 2.65 per cent; sand pits, \$168,668, or 19.67 per cent; quarries, \$261,271, or 30.46 per cent; ponds, springs, etc., \$96,121, or 11.21 per cent.

The details under each of these classes appear in the main presentation and, being comparatively brief, may be easily seen by the reader without particular analysis.

RECAPITULATION: FOR THE STATE. AGRICULTURAL PROPERTY BY NAME.

This recapitulation, on page 643, summarizes for ready comparison the facts as to the various classes of property which have been separately presented in detail. Like the two recapitulations which follow it, it is similar in form to the corresponding recapitulations for products given on pages 522-524, *ante*.

RECAPITULATION: FOR THE STATE. ALL PROPERTY WITH VALUES AND PERCENTAGES.

This recapitulation, on pages 643, 644, presents the values as to each class of property, alphabetically arranged, with percentages which the value of each forms of the total for the State. For example, it shows that of all farm property, land forms 50.13 per cent; dwelling-houses, 20.86 per cent; barns, 9.96 per cent; cows, 2.77 per cent; apple trees, 2.64 per cent; horses, 2.31 per cent; and the other classes of property diminished percentages, in no single case exceeding one per cent of the State total.

RECAPITULATION: FOR THE STATE. CLASSIFIED AGGREGATES WITH VALUES AND PERCENTAGES.

This appears on page 644. The note preceding it shows that only property value aggregating \$19,353,068, being but 8.80 per cent of the total value of agricultural

property for the State, has not been shown in detail for each city and town, this 8.80 per cent comprising buildings not specified as to character, \$10,121,672; machines, implements, etc., \$8,128,031; certain domestic animals not mentioned by name, \$313,930; and fruit trees not specified, \$789,435. If any city or town desires, for local use, any fuller information as to the items, it can be supplied by the Department, upon request.

COMPARATIVE PROPERTY STATISTICS.

We close this analysis with two tables permitting comparisons between the statistics of 1895 and preceding census returns. The first gives for the principal classes of property the figures showing quantity and value returned in 1885 and 1895, with increases or decreases in the latter year as compared with the former.

CLASSIFICATION OF PROPERTY.	Basis	1885		1895		INCREASE (+), OR DE- CREASE (-), IN 1895 AS COMPARED WITH 1885	
		Quantity	Value	Quantity	Value	Quantity	Value
<i>Land.</i>							
Hay (used for),	acres	623,521 $\frac{1}{8}$	\$37,010,507	660,056 $\frac{1}{4}$	\$38,554,254	+36,535 $\frac{1}{8}$	+\$1,543,747
Principal crops (used for), .	acres	177,210 $\frac{7}{8}$	10,881,033	162,452 $\frac{1}{8}$	9,989,953	-14,758 $\frac{3}{4}$	-891,080

The land used for hay shows an increase in 1895 as against 1885 in acreage, the gain being 36,535 $\frac{1}{4}$ acres, and also an aggregate increase in value of \$1,543,747. Market gardens show an increase of 4,570 $\frac{3}{4}$ acres and of \$370,974 in value. Nurseries gained 147 $\frac{5}{8}$ acres but declined in value to the extent of \$177,191. Orchards gained 6,794 $\frac{3}{8}$ acres and \$630,946 in value. The gain in cranberry bogs was 5,539 $\frac{1}{4}$ acres and

\$2,065,875 in value. Woodland of over 30 years' growth gained 22,648 $\frac{1}{2}$ acres and \$1,602,533 in value. Land reported as used for principal crops lost 14,758 $\frac{3}{4}$ acres, no doubt partly by its transference to other classes which report gains, and the decline in aggregate value of such land was \$891,080. Land reported as used for seed gardens shows a comparatively slight decline in acreage and value. The permanent pasture land was reduced to the extent of 140,635 $\frac{3}{8}$ acres and the aggregate value of such land declined \$2,030,002. Woodland of 30 years' growth or less declined 16,162 $\frac{1}{2}$ acres and the value of such land lost \$2,862,514.

As to buildings upon farms, the dwellings increased 648 in number and decreased \$666,809 in value. Barns gained 809 in number, and \$1,359,107 in value.

Under the head of domestic animals on farms the following show gains in number as stated: Calves, 65,713; cows, 24,655; hens and chickens (all kinds), 92,771; hogs, 617; horses, 10,575; lambs, 1,177; pigs, 9,126. On the other hand the following declined in number: Colts, 291; heifers, 8,463; oxen, 6,664; sheep, 13,892. The increases or decreases in aggregate value reported of these different kinds of animals are as follows, the changes either up or down not always corresponding to the fact of increase or decrease in number. Increases: Calves, \$74,394; hens and chickens (all kinds), \$10,724. Decreases: Colts, \$132,023; cows, \$62,885; heifers, \$314,243; hogs, \$111,450; horses, \$610,595; lambs, \$212; oxen, \$507,167; pigs, \$25,532; sheep, \$84,367.

Under the head of fruit trees and vines only peach trees show an increase in number, the gain being 39,211.

The number of apple trees declined 414,921; grape vines, 146,640; and pear trees, 66,404. The value of apple trees in the aggregate increased however to the extent of \$840,508; and of peach trees, \$206,215. The value of grape vines shows a decline of \$148,445; and of pear trees, \$25,014.

With respect to the acreage of agricultural land in the aggregate, as well as by leading classes reported at different census dates, the following table is of interest.

THE STATE, AND CLASSIFICATION OF LAND.	Basis	1865				1875				1885				1895			
		1865				1875				1885				1895			
THE STATE.	acres	3,235,479 $\frac{3}{8}$				3,402,368 $\frac{7}{8}$				3,898,429 $\frac{1}{4}$				3,847,749 $\frac{1}{2}$			
Cultivated land,	acres	881,402				912,521				939,260 $\frac{1}{2}$				902,650 $\frac{1}{4}$			
Unimproved land,	acres	1,052,374 $\frac{3}{4}$				1,469,988 $\frac{1}{4}$				1,479,454 $\frac{1}{4}$				1,287,845 $\frac{3}{4}$			
Unimprovable land,	acres	232,359				89,457 $\frac{1}{4}$				90,212 $\frac{3}{4}$				32,686 $\frac{3}{8}$			
Woodland,	acres	1,019,343 $\frac{3}{4}$				930,402 $\frac{1}{2}$				1,389,501 $\frac{3}{4}$				1,460,994 $\frac{5}{8}$			
Unclassified land,	acres	—				—				—				163,572 $\frac{1}{2}$			

The land returned in 1895, aggregating 3,847,749 $\frac{1}{2}$ acres, shows a decline as compared with 1885 of 50,679 $\frac{3}{4}$ acres. As compared with the returns of 1865 and 1875 an increase is shown both in 1895 and in 1885, partly accounted for no doubt by the more complete enumeration in the later as compared with the earlier years.

Classified, and confining the comparisons to 1895 as against 1885, the character of the enumeration in these years being more nearly uniform, a decrease of 36,610 $\frac{1}{4}$ acres is shown in cultivated land; of 191,608 $\frac{1}{2}$ acres in land classed as unimproved; of 57,526 $\frac{3}{8}$ acres in so-called unimprovable land; and a gain of 71,492 $\frac{7}{8}$ acres in woodland. There remains a comparatively small amount of land outside of these classifications in 1895, namely 163,572 $\frac{1}{2}$ acres, mainly held by owners non-resident in the cities or towns where it is located or else having thereon mines, quarries, pits, etc.

The net loss in acreage of agricultural land is principally due to the turning of farm land into residential property, the transformation being especially caused by the rapid growth of the Commonwealth, and to the centralization of the population in the larger cities and towns, which, as the suburbs extend their area, leads to a constant absorption of farm land for building purposes. No doubt a part of the land returned as cultivated in 1885 has been thus turned into residential property. Some of the land classed as

unimproved in 1885 has probably been transformed in the same way. A portion of the so-called unimproved land existing in 1885 has without question now come under cultivation, thus offsetting part of the loss in cultivated land turned into residential property, and reducing the net loss in cultivated land to 36,610 $\frac{1}{4}$ acres. The word "unimprovable" is applied to land deemed practically useless or waste land, such as farm roads, etc. Such land however has been reduced in acreage as compared with 1885, that is, has gone out of that class into some other. It is possible that a portion of land thus returned in 1885 has now become covered with a growth of wood, which has transferred it to the woodland class and that this accounts for part of the gain in acreage of woodland. Part of it may, however, have been actually reclaimed by cultivation, or turned to uses outside the domain of agriculture.

The various changes thus indicated have resulted in a larger proportionate loss in land termed unimproved, than in any other class, or than in agricultural land as a whole, reducing the aggregate acreage of so-called unimproved farm land to the extent of 191,608 $\frac{1}{2}$ acres.

FARM STATISTICS.

FARM LAND CLASSIFIED BY ACREAGE:
BY TOWNS.

FARM LAND CLASSIFIED BY ACREAGE: BY TOWNS.

The "Farm Land" included in this presentation covers the land returned by all persons engaged in raising any agricultural products, whether the land constituted a farm, or a market garden, orchard, nursery, seed garden, etc. There are 35 sub-divisions in the classification ranging from farms containing less than one acre to those having 1,000 acres or over. The manner of reading the table is obvious, but it should be borne in mind that the presentation extends over three pages in connection with each section of cities and towns; for instance, for the towns from Barnstable, in Barnstable County, to Norton, in Bristol County, the classifications from "under 1 acre" to "above 10 but under 15" acres are given on page 661; for the same towns the classifications from "15 but under 20" to "80 but under 90" acres are shown on page 662; while the balance of the classifications, "90 but under 100" to "1,000 acres and over," for the same towns, is given on page 663. The classifications for the towns from Raynham, in Bristol County, to Shelburne, in Franklin County, are given in a similar manner on pages 664, 665, and 666, and this method of presentation is followed for the remaining cities and towns of the Commonwealth, ending on page 678; and for the counties and the State on pages 676, 677, and 678.

In the succeeding presentation, "COMPARISONS OF FARM ACREAGE: 1885 AND 1895," page 681, *post*, the 35 sub-divisions of farm acreage used in the presentation for 1895 have been condensed to nine, and the 28 sub-divisions used in the Census of 1885 have also been condensed to nine, in order to afford a basis for comparison between the two Census years.

CLASSIFICATION OF FARM LAND; WITH
COMPARATIVE VALUES OF
PRODUCTS AND PROPERTY, ACREAGE, ETC.:
BY TOWNS.

CLASSIFICATION OF FARM LAND; WITH COMPARATIVE VALUES OF PRODUCTS AND PROPERTY, ACREAGE, ETC.: BY TOWNS.

The object of this presentation is to show comparative statistics for each city and town in the Commonwealth regarding farms, dairy farms, egg and poultry farms, market gardens, orchards, nurseries, seed gardens, cranberry bogs, florists (cut flowers, leaves and vines, flowering plants, etc.), detached lots, mines, quarries, pits, etc., grass lots, wood lots, and grass and wood lots. In classifying farms if 50 per cent or over of the value of products of a farm was dairy products, the farm has been classified as a dairy farm; if 50 per cent or over of the value of products was eggs and poultry, the farm has been considered as an egg and poultry farm; this method of classification has been followed with all the kinds of farm land.

The statistical features presented for comparison are the number in each class, total acreage, average size, total value of products, total value of property, average value of products, average value of property, percentages of value of products of value of property, and average value of products per acre.

The proper manner of reading the table is as follows, the locality taken for purposes of illustration being the town of Dartmouth in Bristol County, the facts being given on page 737. The whole number of agricultural returns in the town was 654, of which 501 were for farms having a total acreage of 30,716½. The average size of these farms is 61.31 acres. The total value of these farms was \$2,348,906, while the total value of agricultural products obtained therefrom in 1895 was \$601,707. The average value of each farm was \$4,688, while the average value of agricultural products obtained from each in 1895 was \$1,201. The average value of products per acre was \$20; the product value was 25.62 per cent of the property value, or, in other words, there was an annual return from the investment of 25.62 per cent *gross*. The other lines presented for the town may be read in a similar way.

From such an examination it will be seen that the largest gross income, in the town considered, was from dairy farms (65.46), and the next largest from egg and poultry farms (37.42). The percentage for market gardens is nearly the same as for egg and poultry farms, being 37.35.

The agricultural conditions in each city and town in the Commonwealth, in the Census year 1895, may be learned from an examination of pages 731 to 777, while the conditions existing in the various counties and in the State as a whole may be found on pages 777 to 780.

CLASSIFICATION OF FARM LAND; WITH COMPARATIVE VALUES OF PRODUCTS AND PROPERTY, ACREAGE, ETC.: BY TOWNS.

COUNTY OF BARNSTABLE.

[In the following table the asterisk (*) indicates in the columns headed "Average Value of Products," "Average Value of Property," and "Average Value of Products per Acre," that the average value is less than one dollar.]

FARMS, MARKET GARDENS, ETC.
NUMBER OWNED,
HIRED, WORKED ON SHARES, ETC.:
BY TOWNS.

FARMS, MARKET GARDENS, ETC. NUMBER OWNED, HIRED, WORKED ON SHARES, ETC.: BY TOWNS.

In this presentation the number of farms, dairy farms, egg and poultry farms, market gardens, orchards, nurseries, seed gardens, cranberry bogs, florists (cut flowers, leaves and vines, flowering plants, etc.), detached lots, mines, quarries, pits, etc., grass lots, wood lots, and grass and wood lots, is classified in such a way as to show for each city and town the number in each class owned, hired, or worked on shares by the person or persons making the Census return. In case this information could not be obtained, returns thus incomplete are included in the column headed "Not Given."

The table should be read in the following manner: The number of farms in the town of Dartmouth, county of Bristol, (see page 791, *post*), was 501; of these 474 were owned by the person or persons making the Census return, 26 were hired, none were worked on shares, while for one the fact upon this point was not ascertained. Considering dairy farms, it is found that out of 14 there were 13 owned and one hired. For the basis of classification of farms, market gardens, etc., see explanation on page 729, *ante*.

The information for all the cities and towns in the State is given on pages 785 to 830, and a recapitulation for the counties and for the State appears on pages 830 to 832. The county and State lines are to be read in the same manner as those for cities and towns; for instance, on page 830, for the State, we find that out of 975 market gardens 768 were owned, 193 were hired, 13 were worked on shares, and for one the fact was not ascertained.

FARMS, MARKET GARDENS, ETC. NUMBER OWNED, HIRED, WORKED ON SHARES, ETC.: BY TOWNS.

AND VALUES OF PRODUCTS AND PROPERTY:
BY TOWNS.

FARMS, MARKET GARDENS, ETC. NUMBER OWNED, HIRED, ETC.; WITH COMPARA- TIVE ACREAGE, AND VALUES OF PRODUCTS AND PROPERTY: BY TOWNS.

The preceding presentation (pages 781 to 832), gave the number of farms, market gardens, etc., owned, hired, or worked on shares, in each city and town of the State. In order to show the comparative acreage, value of products, and value of property belonging to the farms owned, hired, or worked on shares in each city and town, the table which follows has been prepared. The need of such a presentation is obvious. For instance, in a town there might be 25 farms owned, ten farms hired, and five farms worked on shares, and yet the acreage, value of products, and value of property of the five farms worked on shares might be larger than the corresponding figures for the ten farms hired or the 25 farms owned; it might be possible, also, that the 25 farms owned might represent ten times the acreage of the 15 farms hired and worked on shares, with a corresponding excess as regards value of products and property.

For purposes of illustration we will take the town of Dartmouth, on page 840, *post*. By reference to page 791, *ante*, we find that the number of farms, market gardens, etc., owned was 622; the number hired was 30, and the fact for two was not ascertained. Referring again to page 840, *post*, we find that the 622 farms owned had an aggregate acreage of 34,690½, products valued at \$638,016, and agricultural property worth \$2,439,549. Considering the 30 farms that were hired we find that they represented a total acreage of 1,629, a product valued at \$59,287, and agricultural property worth \$163,422. Comparing these figures we find that in size the hired farms averaged about the same as those owned, but the average product derived from the hired farms was nearly twice as great as that obtained from the owned farms, and the value of property in connection with the hired farms was 38.88 per cent greater than the average property returned from owned farms.

For a similar consideration of results for the State see page 881, *post*.

FARM STATISTICS.

Under the general title of Farm Statistics are grouped several important presentations beginning on page 655, which close the Census returns relating to agriculture. Some of these contain data of the highest value, if an accurate portrayal of the condition of agriculture in Massachusetts is desired. The details showing the sub-divisions of agricultural estates by classes, for example, farms in general, dairy farms, egg and poultry farms, etc., and bringing out the respective values of products and property, the relations of product values to property values, and the average value of products per acre, in the different classes, are now set forth for the first time in any Census, either State or national.

Some delay, unavoidable under the circumstances controlling the different departments of the Census tabulation, has been encountered between the collection and the publication of the material for this final section of the volume. This does not, it is believed, diminish the value of the information contained in it, inasmuch as any slight changes that may have taken place during the interim are not likely to affect materially the general results.

Farm Land classified by Acreage: By Towns.

This presentation begins on page 657 and closes with the recapitulation, pages 676-679. It shows for every city and town in the Commonwealth the number of persons making return for estates, classified by acreage, beginning with parcels containing less than one acre and proceeding by various combinations (35 in number) up to 1,000 acres and over. As explained in the note on page 659, the general term "farm land," as used in this presentation, includes all land returned by persons engaged in raising agricultural products, whether such land constituted a farm, market garden, orchard, nursery, or seed garden, etc. The information contained in the presentation shows clearly the relations which the different sizes of agricultural plots bear to one another in the different cities and towns, the respective numbers of agricultural estates of different sizes, and therefore the extent to which the sub-division or consolidation of land devoted to agri-

cultural purposes has proceeded. Reference to the recapitulation on pages 676-678, wherein the figures for the counties and for the State are brought together, will enable the reader to compare the counties with one another and with the State as a whole.

The figures for the State are repeated on page 679, with percentages. The number of persons making return of agricultural land was 65,287. Of these, 677 reported their holdings as less than one acre in extent. At the other extremity of the scale are found 48 persons who return 1,000 acres and over. The more numerous classes are the following, the percentages which the number of persons in each class forms of the total number of persons making return being annexed: Reporting 15 but under 20 acres, 4,262, or 6.53 per cent; 100 but under 125 acres, 4,150, or 6.36 per cent; above 10 but under 15 acres, 4,070, or 6.23 per cent; 20 but under 25 acres, 3,914, or 5.99 per cent; 50 but under 60, 3,558, or 5.45 per cent; 30 but under 35, 3,269, or 5.01 per cent; 60 but under 70, 3,192, or 4.89 per cent; 25 but under 30, 3,037, or 4.65 per cent; 9 to 10 both inclusive, 2,800, or 4.29 per cent; 150 but under 200, 2,740, or 4.20 per cent; 40 but under 45, 2,713, or 4.15 per cent. The foregoing include all the classes in which the number of persons making return exceeds four per cent of the total number making return. In the aggregate they constitute 57.75 per cent of the total number of persons making return.

The persons who return holdings of 10 acres or less than 10 acres in extent include the following classes, the percentage which the number of persons in each class constitutes of the total number of persons making return being in each case annexed: Under one acre, 677, or 1.04 per cent; one but under two, 1,057, or 1.62 per cent; two but under three, 1,389, or 2.13 per cent; three but under four, 1,451, or 2.22 per cent; four but under five, 1,599, or 2.45 per cent; five but under six, 1,754, or 2.69 per cent; six but under seven, 1,554, or 2.38 per cent; seven but under eight, 1,233, or 1.89 per cent; eight but under nine, 1,409, or 2.16 per cent; nine to 10 both inclusive, 2,800, or 4.29 per cent. In the aggregate the number of persons making return of 10 acres or less constitutes 22.87 per cent of the total number of persons making return of agricultural land.

Persons making return of holdings amounting to 300 acres or more include the following classes: 300 but under 400, 690, or 1.06 per cent; 400 but under 500, 231, or 0.35 per cent; 500 but under 600, 128, or 0.20 per cent; 600 but under 700, 59, or 0.09 per cent; 700 but under 800, 32, or 0.05 per cent; 800 but under 900, 23, or 0.03 per cent; 900 but under 1,000, 11, or 0.02 per cent; 1,000 acres and over, 48, or 0.07 per cent. In the aggregate these persons constitute only 1.87 per cent of the total number of persons making return.

The holders of parcels of land containing 1,000 acres and over are distributed as follows by counties: Barnstable, four; Berkshire, 16; Bristol, three; Dukes, four; Franklin, six; Hampden, two; Hampshire, one; Norfolk, one; Plymouth, six; Worcester, five. The largest parcel of land returned in Middlesex County is 900 but under 1,000 acres, reported in one instance only, while in Essex County the largest individual parcel is contained in a single return in the class 800 but under 900 acres. In Nantucket two returns appear in the class 600 but under 700 acres, and this is the maximum for that county. In Suffolk County the largest parcel returned is found in the class 600 but under 700 acres, only one estate appearing in this class, in this county, although as just stated there are 59 in the State.

Comparisons of Farm Acreage: 1885 and 1895.

The presentation just analyzed related to the sub-division of agricultural land under different acreage designations in the different cities and towns, as disclosed in the present Census. The presentation for each city and town, with a recapitulation for the State and counties, contained on pages 681-701, permits a comparison between the returns of 1885 and 1895 so as to show the increase or decrease in the last mentioned year in the number of parcels of different sizes returned in eight classes. The first of these classes contains parcels under five acres; the others are: five to 10 both inclusive, above 10 but under 20, 20 but under 50, 50 but under 100, 100 but under 200, 200 but under 300, 300 acres and over. In a limited number of returns the acreage was not sufficiently discriminated in 1885 to permit a comparison.

The recapitulation for the State and counties appears on pages 700-701. As to the State, each class shows an increase. That is to say, the number of persons returning under five acres in 1885 was 2,232, rising to 6,173 in 1895; those returning five to 10 both inclusive numbered 3,242 in 1885, rising to 8,750 in 1895; above 10 but under 20, 5,085 in 1885, and 8,332 in 1895; 20 but under 50, 11,136 in 1885, and 16,772 in 1895; 50 but under 100, 11,156 in 1885, and 12,931 in 1895; 100 but under 200, 7,431 in 1885, and 9,076 in 1895; 200 but under 300, 1,645 in 1885, and 2,031 in 1895; 300 acres and over, 735 in 1885, and 1,222 in 1895. In the counties individually, in nearly every instance an increase in the number of persons reporting the specified acreage of land is shown in 1895 as compared with 1885. A few instances of decline appear however. Thus, in Dukes County 39 persons reported under five acres in 1885, and only 28 in 1895. In Suffolk County the number of persons reporting from five to 10 acres, above 10 but under 20, 20 but under 50, 50 but under 100, and 200 but under 300 acres each show a decline in 1895 as compared with 1885.

Total Wages paid in Agriculture.

This presentation appears on pages 703-709, closing with a recapitulation on the last named page. The total number of returns for the State being as before mentioned 65,287, there are 28,963 which report expenditures for wages, the total amount disbursed being \$7,988,090, and the average amount of wages paid out by each employer \$275.80. The purpose of this table should not be misunderstood. It does not show the average wages received by employes upon farms, but the average amount which the employers of agricultural labor paid out to the persons, one or more, employed by them.

The counties rank as follows in order as to the total amount disbursed in wages in agriculture: Middlesex, \$1,811,960; Worcester, \$1,307,635; Essex, \$817,758; Plymouth, \$696,283; Berkshire, \$679,884; Bristol, \$582,478; Norfolk, \$447,564; Hampshire, \$428,777; Hampden, \$406,304; Franklin, \$387,880; Barnstable, \$208,958; Suffolk, \$182,473; Dukes, \$22,738; Nantucket, \$7,398.

The average amount paid out by each individual employer is highest in Suffolk County, namely, \$1,067.09, the other counties ranging in the following order: Middlesex, \$420.12; Norfolk, \$315.85; Essex, \$313.08; Plymouth, \$292.56; Berkshire, \$277.96; Worcester, \$239.49; Barnstable, \$236.11; Bristol, \$225.94; Hampshire, \$205.75; Franklin, \$185.86; Hampden, \$172.90; Dukes, \$169.69; Nantucket, \$160.83. Of course, the total amount paid out in wages, as well as the average amount paid by each employer, depends upon a variety of causes, such as the character of the agricultural work performed, the number of employes, the extent of the farms, and the proximity of the farms to places giving opportunity for employment other than that upon the land. These figures, therefore, simply indicate the relative position of the different counties in respect to the aggregate amount of wages, without throwing light upon the causes for the differences noted.

Commercial Fertilizers.

The statistics relating to the subject of commercial fertilizers include the total amount expended for such fertilizers and the average amount expended by each person making return of such expenditure. The information is for the various cities and towns in detail, and is recapitulated for the State, by counties, on page 717. The total value of commercial fertilizers purchased for the State for the Census year was \$1,069,717, expenditure for this purpose appearing in 23,520 returns out of 65,287, the total number. The average value of commercial fertilizers purchased by each person making such a return was \$45.48.

With respect to the total amount expended for commercial fertilizers, the counties rank as follows: Middlesex, \$197,569; Worcester, \$168,588; Bristol, \$142,952; Hampshire, \$130,138; Essex, \$98,218; Franklin, \$91,535; Hampden, \$80,701; Berkshire, \$63,079; Plymouth, \$44,239; Norfolk, \$31,575; Barnstable, \$15,686; Suffolk, \$3,106; Dukes, \$1,390; Nantucket, \$941.

Destruction by Forest Fires.

The presentation showing the total value of timber or wood (whether growing or cut) destroyed by forest fires during the Census year, and the average value of such timber or wood for each person making return of loss, appears on pages 719-726. The recapitulation for the State, by counties, on page 726, shows that 768 returns reported the loss of timber or wood destroyed by forest fires during the Census year, aggregating \$107,154, an average of \$139.52 for each person making return.

With respect to the aggregate loss the counties rank as follows: Worcester, \$24,384; Middlesex, \$18,928; Norfolk, \$11,303; Essex, \$10,625; Bristol, \$8,368; Plymouth, \$8,226; Hampden, \$8,140; Franklin, \$7,410; Berkshire, \$4,175; Hampshire, \$3,130; Barnstable, \$1,665; Dukes, \$800. No loss was reported from Nantucket or Suffolk Counties.

Classification of Farm Land; with Comparative Values of Products and Property, Acreage, etc.: By Towns.

This presentation appears upon pages 727-780. The recapitulation for the State will be found on pages 777-780. The material contained in this presentation is of very great value to the different cities and towns, respectively, inasmuch as it shows for each a detailed classification of the land devoted to agriculture under the following heads: Farms (including under this designation all farms not specifically designated as devoted to a particular specialty); dairy farms (including farms especially devoted to dairy products); egg and poultry farms (including only such farms as are especially devoted to the purpose named); market gardens; orchards (including under this head only parcels of land especially devoted to the purpose named); nurseries; cranberry bogs (independently classified); florists; detached lots (devoted to agricultural production, but not connected with the farms previously classified); mines, quarries, pits, etc.; grass lots (not connected with the farms as previously classified); wood lots (not connected with the farms as previously classified); grass and wood lots (not connected with the farms as previously classified). Under each class specified the total acreage is shown, the average size of the parcels of land, the total value of products thereupon for the Census year, the total value of the property, the average value of products for the year, the average value of the property, and the relation of the value of the products to the value of the property expressed in percentages, with the average value of the products per acre.

Referring to the recapitulation for the State, page 777, it will be seen that the 65,287 agricultural schedules received included 37,599 independent farms; 4,876 dairy farms; 1,493 egg and poultry farms; 975 market gardens; 84 orchards; 23 nurseries; 686 independent cranberry bogs; 533 florists; 3,037 detached lots used for agricultural purposes; 65 mines, quarries, pits, etc.; 4,225 grass lots, not included under previous designations; 8,781 independent wood lots; and 2,910 grass and wood lots combined.

It should be explained that in deciding whether an estate used for agricultural purposes should be placed under one or another of the classes named, the kind of product which was in excess of 50 per cent of the total product for the year, on the basis of value, was the determining factor. Thus if no single kind of product represented a value in excess of 50 per cent of the total value of all products the estate was classed as a "farm" simply. If dairy products showed a value in excess of 50 per cent, the estate was classed as a "dairy farm;" if the value of eggs and poultry was in excess of 50 per cent, an "egg and poultry farm;" if market garden products, a "market garden," etc. It will be understood, of course, that the term "florist" is used to indicate land devoted to the production of flowers and plants for market purposes, whereon, as just explained, the value of such products for the year was in excess of 50 per cent of the total. Generally, under this head, the product named was not only in excess of 50 per cent but was practically all that was produced.

The following table will show the percentage which the number of schedules in each of the above named classes forms of the total number of schedules received:

CLASSIFICATION.	THE STATE	
	Number	Percentages
Farms,	37,599	57.59
Farms, dairy	4,876	7.47
Farms, egg and poultry	1,493	2.29
Market gardens,	975	1.49
Orchards,	84	0.13
Nurseries,	23	0.03
Cranberry bogs,	686	1.05
Florists,	533	0.82
Detached lots,	3,037	4.65
Mines, quarries, pits, etc.,	65	0.10
Grass lots,	4,225	6.47
Wood lots,	8,781	13.45
Grass and wood lots,	2,910	4.46
TOTAL,	65,287	100.00

From this table it plainly appears that of the different parcels of land used for agricultural purposes, 57.59 per cent, or slightly more than one-half of the whole number, were farms devoted to general agricultural production and not to special products; 7.47 per cent were, in accordance with the method of classification previously explained, dairy farms; 2.29 per cent egg and poultry farms; 1.49 per cent market gardens; 1.05 per cent independent cranberry bogs; 4.65 per cent detached lots devoted to agricultural purposes, but not constituting farms in the common acceptance of that term; 6.47 per cent independent grass lots; 13.45 per cent wood lots, not connected with farms as previously classified, and for the most part owned by persons who were not resident in the city or town where the lots were found; 4.46 per cent grass and wood lots, not separable upon the face of the returns; and the remainder comprised fractional percentages of the total.

Again referring to the recapitulation on page 777, it will be seen that, the total acreage of land devoted to agricultural purposes being 3,847,749½, the amount classified under the general term "farms" aggregated 2,640,988½ acres; the dairy farms as classified included 398,891½ acres; the egg and poultry farms, 25,765½ acres; market gardens, 23,295½ acres; orchards, independent of farms, 84½ acres; nurseries, 581 acres; independent cranberry bogs, 14,345½ acres; land operated by florists, 3,280½ acres; detached lots, 121,396½ acres; mines, quarries, pits, etc., 78½ acres; independent grass lots, 103,415½ acres; independent wood lots, 300,325½ acres; independent grass and wood lots combined, 213,836 acres.

The total value of agricultural products for the State being \$52,880,431, it will also be seen that the value derived from farms not devoted to specialties forms a large proportion of the total value, namely, \$35,806,914; the dairy farms, so called, \$10,582,771; the egg and poultry farms, \$1,022,345; market gardens, \$2,297,506; cranberry bogs, \$750,203; and florists, \$1,597,501. The remainder of the total value was derived from the other classes shown in the table, in each case being much less than the minimum amount returned from the classes mentioned in detail.

The total value of the agricultural property in the State being returned as \$219,957,214, there is to be credited to the farms, as classified, \$158,993,363; to dairy farms, \$28,450,111; to egg and poultry farms, \$3,785,532; to market gardens, \$7,307,961; to independent cranberry bogs, \$2,292,172; to establishments conducted by florists, \$4,780,482; to detached lots used for agricultural purposes, \$2,601,350; to independent grass lots not otherwise returned, \$3,133,122; to independent wood lots, \$4,224,034; to grass and wood lots combined, \$3,327,572. The remainder of the value of property, aggregating about one million dollars, is distributed under the head of orchards, nurseries, and mines, quarries, pits, etc., as shown in the table.

The table shows the average size of the parcels of land used for each of the specified purposes, the average value of products derived from each, and the average value of the property. For the purpose of determining the percentage of gross return obtained from the different classes the percentage which the value of the annual product forms of the value of the property is in each case given. It is, for example, seen that while the total value of product derived from all forms of property used for agricultural purposes is 24.04 per cent of the total value of the property, the percentage derived from the farms simply is 22.52 per cent of the value of the property, while for the other classes the percentage of value of product of value of property is as follows: Dairy farms, 37.20; egg and poultry farms, 27.01; market gardens, 31.44; orchards, independently classified, 7.27; nurseries, 33.40; cranberry bogs, independently classified, 32.73; florists, 33.42; detached lots, 0.21; mines, quarries, pits, etc., 16.21; grass lots, 5.66; wood lots, 5.15; grass and wood lots, 6.69. In the comparison of the percentages of the value of product of value of property, the dairy farms are followed in order of rank by florists, nurseries, cranberry bogs (independently classified), market gardens, egg and poultry farms, farms, mines, quarries, pits, etc., orchards (independently classified),

TOTALS,	15	32	20	7	35	26

The foregoing table is to be read as follows: It appears from the final columns, devoted to the State at large, that in six municipalities the return of product value from agricultural land classified under the head of farms simply, that is, farms devoted to general agricultural products, showed a larger percentage of the aggregate value of the property returned than was derived in these towns from any of the other classes. These towns constituted 1.70 per cent of the total number of cities and towns in the State. On the other hand, in 164 cities and towns the returns of product from so-called dairy farms showed the largest percentage of value of property, and these cities and towns constituted 16.46 per cent of the total number of cities and towns in the State. That is to say, to put it in other words, when the value of product is figured as a percentage of the value of property,* we find that in nearly one-half of the total number of cities and towns in the State the returns from the farms classed as dairy farms outranked all the other classes which appear in the table. This was the case in nine towns in Barnstable County, 22 in Berkshire, six in Bristol, two in Dukes, 19 in Essex, 17 in Franklin, 13 in Hampden, 13 in Hampshire, 16 in Middlesex, seven in Norfolk, 11 in Plymouth, and 29

* If the value of property be considered as the investment of capital in agriculture, disregarding, of course, any possible investment in cash not represented in the value of property, such a percentage would, in effect, constitute the percentage of gross income upon such capital, for the year.

grass and wood lots, grass lots, wood lots, and detached lots, each independently returned.

With respect to the average value of products per acre, which is also shown in the table, the florists stand first, the average being \$487; followed by nurseries, \$172; mines, quarries, pits, etc., \$104; market gardens, \$99; cranberry bogs (independently returned), \$52; egg and poultry farms, \$40; dairy farms, \$27; orchards, \$22; and farms devoted to general agricultural products, \$14.

The details which we have thus pointed out for the State may, as we have said, be noted in the main presentation for each of the cities and towns in the Commonwealth. Locally, they will be of value in determining the direction in which the agricultural development of the different cities and towns has proceeded.

For the purpose of determining the respective rank of the different forms of agricultural enterprise considered as investments in the different cities and towns and for the State, we present the following analysis table which shows the number of cities and towns in the State, by counties, in which the designated kind of agricultural estates as classified showed the largest return of product in proportion to the value of property.

COUNTIES								THE STATE		
Hampden	Hampshire	Middlesex	Nantucket	Norfolk	Plymouth	Suffolk	Worcester	Aggregates	Percentages

in Worcester. In 55 towns the returns from florists showed a higher percentage of the value of property than appeared in any of the other classes. These cities and towns formed 15.58 per cent of the total number of cities and towns in the State, and 20 of them were located in Middlesex County. In 50 towns, or 14.17 per cent of the total number of cities and towns in the State, the percentage of product of property returned from market gardens outranked all other classes, 10 of these towns being in Worcester County, nine in Middlesex, six in Bristol, six in Hampden, and the others distributed among the different counties except Dukes and Nantucket.

The main presentation showing the relation of product values to property values from which the consolidated figures which appear in this analysis table were derived will show which of the cities and towns lead in this respect in the different classes. This table, we repeat, gives the number of cities and towns in which the product returned in the specified classes respectively, showed the highest proportion of the value of property, when expressed as a percentage of such property value. It may be interesting to compare these figures with those contained in the table which follows, based upon data contained in another section of this report, representing the number of cities and towns in which the value of the specified products outranked any other, considered merely as a sum total, without regard to the value of property invested in the farms or estates.

Referring merely to the figures for the State in the foregoing table we note that in 246 cities and towns, 69.69 per cent of the whole number, the value of dairy products for the year exceeded the value of any other product. The table, page 871, it will be remembered, showed that in 164 cities and towns the value of product returned from farms classed as dairy farms formed a higher percentage of the property value involved than was shown by any of the other classes. The present table shows that the value of greenhouse products for the year outranked all others in 12 towns; nursery products in one town; poultry products in five; wood products in five; fruits, berries, and nuts (under which cranberries are included) in 17; hay, straw, and fodder (a general farm product) in 48; and vegetables (in which the product from market gardens is mainly included) in 18. 23	23	54	1	27	27	4	59	353	100.00	

these figures we note from the table, page 871, that computed as a percentage upon the value of property involved, that is to say, invested in the estate, florists (which includes a large proportion of the greenhouse products) led in 55 cities and towns; nurseries in nine; egg and poultry farms in 35; wood lots (independently classed) in eight; cranberry bogs (independently classed) in 13; farms devoted to general products in six, and market gardens in 50. Of course the figures in the two tables have no direct relation, but taken together they clearly reveal the forms of culture which lead in the State, either in aggregate sums returned or considered as investments of capital.

The analysis table which follows presents a comparison of the value of product for the year with respect to acreage.

In the preceding table the individual returns are classed, with respect to the aggregate value of product shown in each, under 28 different heads, rising from under \$500 to \$50,000 and over. Tracing the line for the State which appears first in the table, and bearing in mind that the total number of returns received was 65,287, we note the significant fact that in 21,509 instances the value of product was under \$500. The number of returns in excess of 1,000 in the different classes which showed a product value for the year is as follows: \$500 but under \$600, 2,713; \$600 but under \$700, 2,420; \$700 but under \$800, 1,986; \$800 but under \$900, 1,717; \$900 but under \$1,000, 1,536; \$1,000 but under \$1,500, 5,624; \$1,500 but under \$2,000, 3,397; \$2,000 but under \$2,500, 2,260; \$2,500 but under \$3,000, 1,452; \$3,000 but under \$3,500, 1,037. Above the limit of the \$15,000 product the returns rapidly diminish in number, as will be seen from the following summary: Returns showing a product value of \$15,000 but under \$20,000, 41; \$20,000 but under \$25,000, 22; \$25,000 but under \$30,000, eight; \$30,000 but under \$35,000, two; \$35,000 but under \$40,000, two; \$40,000 but under \$45,000, one; \$45,000 but under \$50,000, one; \$50,000 and over, four.

It will be seen from the table that there are 17,060 returns which report no product.

These, it should be said, are mainly returns which cover detached lots, mines, quarries, pits, etc., or grass lots and wood lots independently returned, and in many cases the property of owners not resident in the city or town where the land was found.

Referring again to the first column of the table, we may note the distribution, by acreage, of the 21,509 returns which report a product value of less than \$500. It will be seen, for example, that 330 of these were from estates of less than one acre; 644 from those reporting one acre but under two; 795, two acres but under three; 809, three acres but under four; and so on through the different designations given in the table. Condensing, it will be seen that the total number of returns showing a product of less than \$500 from parcels of land eight acres in extent or less than eight was 6,241. On the other hand, the number of returns showing this product value from parcels of land in excess of 100 acres was 1,875; while the remaining returns, 13,393 in number, were from estates reporting an acreage of at least nine acres but not exceeding 100 acres.

The analysis table which follows presents a similar comparison between the value of annual product, as previously classified, and the value of property.

Reference to the first column of the table will show that with respect to the 21,509 returns, each of which included a product value of less than \$500, 3,140 were from estates or establishments reporting an aggregate value of property of less than \$500; 4,004 such returns appeared in cases where the aggregate property value was \$500 but under \$1,000; in 4,097 instances the aggregate property value was \$1,000 but under \$1,500; in 3,250, \$1,500 but under \$2,000; in 2,256, \$2,000 but under \$2,500; and in 1,537, \$2,500 but under \$3,000. The returns in no other class exceed 1,000 in number.

The figures derived from the schedules showing a product value of less than \$500, if aggregated, show that in 21,353 instances this product value was returned from estates reporting an aggregate property value of less than \$10,000. In only 156 instances was the property value in excess of \$10,000. This table and the one which precedes it clearly show that in the majority of cases the product sold from the farms in Massachusetts does not exceed \$500 each, and also that in the majority of cases this annual product value is derived from farms aggregating less than \$10,000 in value.

A few instances at the other extremity of the scale may be noted. Three of the schedules which show a product value in the class \$50,000 and over are derived from estates which show an aggregate property value of \$100,000 and over. The one additional schedule in this product class is from an estate which falls within the property class \$80,000 but under \$90,000. The single return in the product class \$40,000 but under \$45,000 is found in the property class \$100,000 and over. There are two returns which show a product value of \$35,000 but under \$40,000. One of these was from an establishment wherein the aggregate value of property was returned as \$30,000 but under \$35,000, and the other \$35,000 but under \$40,000. And, generally speaking, the limited number of returns which show a product value in excess of \$10,000 in the Census year are from estates of comparatively high property value; that is to say, in excess of \$15,000. There are, however, 33 returns in which the value of product was in excess of \$10,000, which are from estates showing a property value of less than \$15,000.

Farms, Market Gardens, etc. Number Owned, Hired, Worked on Shares, etc.: By Towns.

This presentation is contained on pages 781-832, and shows the distribution of the various classes of agricultural land according to the tenure of the holding; that is to say, whether owned, held under rental, or worked upon shares by the person or persons making the return. The information is for all the cities and towns in the State, and a recapitulation for the counties and for the State appears on pages 830-832.

Referring to the facts for the State at large, shown in the recapitulation on page 830, we note that the 65,287 returns of agricultural estates include 58,634 owned by the person operating them; 3,729 were hired; 276 carried on on shares; while the information for 2,648 was not given in the returns. Of the parcels owned, 34,531 are classed as farms simply; the others including 4,323 dairy farms; 1,322 egg and poultry farms; 768 market gardens; 78 orchards, independently classified; 15 nurseries; 667 cranberry bogs, independently classified; 440 parcels cultivated by florists; 2,161 detached lots used for agricultural purposes; 60 mines, quarries, pits, etc.; 3,573 grass lots, independently classified; 8,005 wood lots, independently classified; and 2,691 grass and wood lots, independently classified but not separable.

As against 34,531 farms devoted to general culture and owned by the person carrying them on, there were 2,503 hired, 204 operated on shares, the information being not given for 366. It will be noticed that where the information was not given in the returns, the parcels of land were for the most part detached lots or grass and wood lots independently classified. As previously stated, these in many cases were held by non-residents, and for that reason the character of the tenure, whether owned, hired, or on shares, was not obtainable.

Farms, Market Gardens, etc. Number Owned, Hired, etc.; with Comparative Acreage, and Values of Products and Property: By Towns.

This presentation, contained on pages 833-864, with a recapitulation beginning on page 863, shows for each city and town, as well as for the counties and the State at

large, the aggregate acreage of agricultural land owned by those who cultivate it, the aggregate acreage held under rental, and the aggregate acreage cultivated on shares, with the total value of products and total value of property in each class.

Referring to the aggregates for the State, shown in the recapitulation on page 863, we note that out of 3,847,749½ acres of land devoted to agricultural purposes in the State during the Census year, there were 3,487,918½ acres owned by the persons who cultivated the land; 222,104½ acres hired; 29,846 acres held on shares; the information for 107,880½ acres only being not given in the returns.

The value of products raised upon land owned by those who cultivated it was in the aggregate \$48,290,568, out of a total value of agricultural products for the State amounting to \$52,880,431. The total value of agricultural property upon estates owned, including, of course, the value of the land itself, was \$201,032,965, out of an aggregate value of agricultural property amounting to \$219,957,214.

As a general statement, therefore, it may be said that by far the larger part of the agricultural acreage of the State is held by direct ownership, and that upon this acreage the larger part of the products of the State are obtained, and in connection with it is found the larger part of the value of agricultural property.

Of the agricultural land not owned, the larger part was held under rental, amounting to 222,104½ acres in the aggregate, while only 29,846 acres were held on shares. The aggregate value of products obtained on land hired was \$4,092,919, and the value of products obtained on land held on shares amounted in the aggregate to \$362,558.

The total value of agricultural property in connection with land hired was \$15,249,801, and the total value of agricultural property in connection with land held on shares was \$1,196,952.

Although we have analyzed in detail the facts given in this and the preceding presentation only so far as relates to the State as a whole, similar lines of information are obtainable from the presentations for each of the cities and towns and for the counties, and therefore the reader who is interested in the development of agriculture in any particular municipality may easily determine how far forms of tenure other than ownership may have become operative therein.

In the note upon page 835 the returns for the town of Dartmouth have been considered in the form of averages for the purpose of bringing out the relative sizes of agricultural estates held under the different forms of tenure, and also for determining the relative returns of product value and of property value in connection with agricultural holdings owned, hired, or worked on shares, respectively.

Of course, similar comparisons may be made for any other town, as the figures in the presentation, pages 833-864, afford a basis for determining the corresponding averages. So far as relates to the State as a whole, the average acreage of the farms owned is 59.49; of the estates hired, 59.56; and of those worked on shares, 108.14. The average product value returned from the different classes respectively is: Owned, \$824; hired, \$1,098; on shares, \$1,314; and the average aggregate property value in connection with estates of the different classes is: Owned, \$3,429; hired, \$4,090; on shares, \$4,338. Therefore, although the number and aggregate acreage of the owned agricultural estates far exceed the number and acreage returned in either of the other classes, nevertheless, the average product value from the estates hired and worked on shares considerably exceeds that returned from those owned; and the same statement applies to the average aggregate property value.

Expressed in percentages, the average product returned from the hired estates is 33.25 per cent greater than from those owned, and the average aggregate property value 19.28 per cent greater. The average product and property values returned from the estates worked on shares as compared with those owned show still wider differences.

The larger average return from the hired and share estates is probably connected with the fact that such estates are of a higher grade than the average owned farm, as shown by the relatively larger average value of the investment in them. The product return in every class is affected materially by the character of the product, and whether a particular kind of product may have a greater influence in enlarging the average

money return in estates hired or worked on shares than is felt in general among the owned farms does not, of course, appear from the tabular presentations. The influence upon the product return of the character of the tenure cannot be clearly determined without full knowledge as to the other influential factors.

Comparison of Holdings by Residents and Non-residents.

The following analysis table presents a comparison of the number of agricultural returns relative to estates held by residents and non-residents, respectively.

THE STATE, AND COUNTIES.	Resident	Non-Resident	Total	PERCENTAGES	
				Resident	Non-Resident
THE STATE.	45,176	20,111	65,287	69.20	30.80
Barnstable,	1,603	521	2,124	75.47	24.53
Berkshire,	4,009	1,284	5,293	75.74	24.26
Bristol,	3,980	1,613	5,593	71.16	28.84
Dukes,	339	144	483	70.19	29.81
Essex,	3,324	1,908	5,232	63.53	36.47
Franklin,	3,593	1,705	5,298	67.82	32.18
Hampden,	3,554	1,396	4,950	71.80	28.20
Hampshire,	3,652	1,411	5,063	72.13	27.87
Middlesex,	6,055	2,305	8,360	72.43	27.57
Nantucket,	115	32	147	78.23	21.77
Norfolk,	2,347	1,414	3,761	62.40	37.60
Plymouth,	2,972	1,616	4,588	64.78	35.22
Suffolk,	175	13	188	93.09	6.91
Worcester,	9,458	4,749	14,207	66.57	33.43

The next table, which closes the analysis, shows the distribution of the parcels of land held by resident and non-resident persons through the different classes of agricultural property, according to the basis of classification previously specified.

CLASSIFICATION.	Resident	Non-Resident	Total	PERCENTAGES	
				Resident	Non-Resident
Farms,	34,437	3,162	37,599	91.59	8.41
Farms, dairy	4,788	88	4,876	98.20	1.80
Farms, egg and poultry . . .	1,478	15	1,493	99.00	1.00
Market gardens,	921	54	975	94.46	5.54
Orchards,	54	30	84	64.29	35.71
Nurseries,	22	1	23	95.65	4.35
Cranberry bogs,	305	381	686	44.46	55.54
Florists,	528	5	533	99.06	0.94
Detached lots,	77	2,960	3,037	2.54	97.46
Mines, quarries, pits, etc., . .	36	29	65	55.38	44.62
Grass lots,	768	3,457	4,225	18.18	81.82
Wood lots,	1,081	7,700	8,781	12.31	87.69
Grass and wood lots,	681	2,229	2,910	23.40	76.60
TOTALS,	45,176	20,111	65,287	69.20	30.80

The information in the preceding table is for the State, by counties. Of the total number of returns received, namely, 65,287, there were, as shown by the first table,

45,176, comprising 69.20 per cent of the entire number, which covered estates held by persons who were residents of the city or town to which the returns were credited. On the other hand, 20,111 related to estates or parcels of land held by persons non-resident in such cities or towns. These comprised 30.80 per cent of the entire number of returns received. The largest percentage of returns from resident holders appears in Suffolk County, namely, 93.09; the next largest percentage, 78.23, appearing in the county of Nantucket; followed by 75.74 in the county of Berkshire. This last percentage is closely paralleled in several other counties.

Of the farms devoted to general culture, there were, as shown by the second table, 34,437 returned by persons who were residents of the towns in which the farms were located, while 3,162 were held by non-residents. Of the dairy farms, 4,788 were returned by residents and 88 by non-residents; of the egg and poultry farms, 1,478 were held by residents and 15 by non-residents. Of these three principal classes, the percentages returned by resident owners, that is to say, owners resident in the towns where the estates were located, are, respectively, 91.59, 98.20, and 99.00. It will be seen, therefore, that with respect to these three principal classes, nearly all of the estates were held by residents.

On the other hand, of the detached lots devoted to agricultural purposes, only 77 were held by residents, while 2,960, or 97.46 per cent, were held by non-residents. Of the grass lots, independently classified, 768 were held by residents, and 3,457, or 81.82 per cent, by non-residents. Of the wood lots, independently classified, 1,081 were held by residents, and 7,700, or 87.69 per cent, by non-residents. Of the grass and wood lots, independently classified but not separable, 681 were held by residents, and 2,229, or 76.60 per cent, by non-residents. Slightly more than one-half the whole number of cranberry bogs independently returned, namely, 55.54 per cent, were held by non-residents. Disregarding details or classes, and considering the entire number of returns received relating to agricultural holdings, 45,176, or 69.20 per cent, were from residents, and 20,111, or 30.80 per cent, related to lands held by non-residents.
